If printed, the type shall not be less than pica, and there shall not be more than three line spaces per inch. The date and the signature shall be on the last sheet, which shall, in the case of the complete specification, also contain the conclusion of the claims, and, in the case of the provisional specification, the conclusion of the description of the nature of the invention. 40.—(1.) The provisional or complete specification need not be accompanied by drawings if the specification sufficiently describes the invention without them; but if drawings are furnished they should accompany the provisional or complete specification to which they refer, unless the applicant desires to adopt the drawings lodged with the provisional specification as the drawings for the complete specification, when they must be referred to as those "left with the provisional specification." Drawings.

(2.) The drawings must show every feature of the invention covered by the specification.

(3.) When the invention consists of an improvement upon an old machine, the drawing must exhibit the invention disconnected from the old structure, and also, in another view, the specific improvement and such parts of the old structure as necessarily co-operate with it. When the drawings illustrate an invention for which an additional patent is sought under section 85 of the Act, the improved or varied portions shall be drawn in full black lines, and so much of the original invention as may be necessary to show the connexion or action shall be repeated and shown in dotted outlines in proper relation to the improved part.

(4.) Drawings must be delivered at the Patent Office either flat or on rollers, so as to be free from creases, folds, or breaks.

Requirements  
as to paper,  
&c.

drawings.

42. Drawings must be on sheets 13 inches at the sides by 8 inches at the top and bottom. The illustrations shall be inside a border rectangle 12 inches by 7 inches, leaving a margin half-an-inch wide. When an exceptionally large drawing is essential, it may be drawn in sections on several detached sheets. There is no limit to the number of sheets. The figures should be numbered consecutively throughout.

Quality of ink,  
&c.

43.—(1.) To insure their satisfactory reproduction on a reduced scale, all lines shall be in absolutely black Indian ink, and shall be uniform in thickness or gradation.

(2.) Section and shade lines shall not be closer than 30 per inch, and shading lines shall preferably be avoided.

(3.) Sections of plates and small pieces may be in solid black.

(4.) Reference letters and figures must be bold, distinct, not less than one-eighth of an inch in height, and should be placed in an upright position, and the same letters and figures must be used in different views of the same parts. Reference letter or figures shall in case of the larger parts be placed upon the parts, and in the case of smaller parts be placed to one side of the drawing and connected by a fine line to the parts to which they refer.

(5.) When the character of the drawings permits, such words as "plan," "elevation," and brief descriptive names of parts, such as "generator," "dipping tank," "high pressure cylinder," may be added; but no connected description, phrase, or sentence, shall appear on the drawings.

Scale of  
drawings.

44.—(1.) The scale adopted shall be large enough to show clearly wherein the invention consists, and only so much of the apparatus, machine, &c., need be shown as effects this purpose.

(2.) When the scale is shown on the drawing, it should be denoted, not by words, but by a divided line. Related drawings, such as "plan" and "elevation," shall be drawn to the same scale, and be arranged in proper relative positions, where practicable.

Drawings to  
be signed by  
applicant, &c.

45. Each sheet of the drawings shall be signed by the applicant or his agent, as near the lower right-hand corner inside the border line as is convenient.

Identifying  
marks.

46.—(1.) In the case of drawings left with a complete specification after a provisional specification, the number and date of the application shall be given in the lower left-hand corner, outside the border line.

(2.) In the case of all drawings, the total number of sheets, and the number of each sheet, shall be stated on each sheet in the top right-hand corner, outside the border line.

Professional  
designation.

47. No professional designation, or advertisements, or addresses, will be permitted upon the face of the drawings or anywhere upon the tracings.

Duplicates of  
drawings.

48.—(1.) A *fac-simile* of the original drawings prepared strictly in accordance with the regulations governing original drawings must be lodged with the original drawings.

Tracing.

(2.) A *fac-simile* prepared on tracing cloth must also be lodged.

Marking of  
original and  
copies.

49. The words "Original" or "True Copy," as the case requires, must, in each case, be placed in the centre at the top of each sheet, outside the border line.

## DECLARATIONS AND AFFIDAVITS.

50. The declarations and the affidavits required by these Regulations, or used in any proceeding thereunder, shall be headed in the matter or matters to which they relate, and shall be in the first person, and shall be divided into paragraphs consecutively numbered, and each paragraph shall, as nearly as possible, be confined to one subject. Every declaration or affidavit shall state the description and true place of abode of the person making it, and shall be written or printed bookwise, and shall bear the name and address of the person leaving it, and the name of the person on whose behalf it is left.

- (c) In Foreign Countries—Any Judge of a Superior Court, British Consul or Consular Officer, or Notary Public.

(2.) The Commissioner may take notice of the signature to any declaration, and of the signature of the person before whom it purports to have been declared, without proof of those signatures or of the official character of the person before whom the declaration purports to have been made.

52. Unless any particular form of declaration is prescribed, any declaration for the purposes of these Regulations may be in accordance with the Form E1 in the Second Schedule. A statutory declaration in accordance with the law of the place in which the declaration is made may, however, be accepted as a declaration in lieu of a declaration in accordance with that Form.

53. Nothing in these Regulations as regards declarations shall necessitate any further signature or attestation to the declaration contained in the form of application for a patent than that directed by section 33 of the Act.

## EXERCISE OF DISCRETIONARY POWERS BY THE COMMISSIONER.

54. The Commissioner, before exercising any discretionary power given to him by the Act adversely to an applicant for a patent or for amendment of a specification, shall give him ten days' notice at least of the time when he may be heard personally, or by his patent attorney, solicitor, or person authorized on his behalf, before the Commissioner.

55. Within five days from the date when such notice would be delivered in the ordinary course of post, or such longer time as the Commissioner appoints in the notice, the applicant shall notify to the Commissioner whether he desires to be heard in the matter.
