  - (b) if the instrument is of a class for which a re-verification period is prescribed—the period since it was last verified or re-verified does not exceed that re-verification period.
- (2) The Chief Metrologist may determine, in writing, the national instrument test procedures. The determination is not a legislative instrument.
- (3) A re-verification period must not be prescribed for utility meters.
- (4) The regulations may:

However, a person who is actually or apparently in control of the instrument is not an ***affected person***.

- (3) By marking a package with an AQS mark, a person represents that if the package is included in a group of like packages sampled and tested in accordance with AQS procedures, the group will be found on average to contain a measurement at least equal to the marked measurement.
- (4) This Division contains offences to deal with cases where this is not so (see Subdivision 3-C).
- (5) This Division also contains offences to deal with cases where misleading marks are used, or an AQS mark is placed in the wrong place (see Subdivision 3-B).
