British Aerospace BAe 3100 (Jetstream) Series Aeroplanes

AD/JETSTREAM/99  Revised Airworthiness Limitations  13/2004

Applicability: All Model Jetstream Series 3200 aircraft.

Requirement: Comply with the requirements of BAE Jetstream Series 3200 Aircraft Maintenance Manual, Chapter 05-10-05, Airworthiness Limitations Description and Operations Section, Revision 14, or later EASA approved revision.

Only the structural fatigue tasks are mandated by this Directive. The following tasks are not addressed by this Directive:

All the tasks recorded in Tables No. 2, 4, 5, and 8; together with Table No. 3 - task 27-70-000, Gust lock system.

Note: UK CAA AD G-2004-0024 refers.

Compliance: From the effective date of this Directive.

This Airworthiness Directive becomes effective on 23 December 2004.

Background: The Airworthiness Limitations Section of the Aircraft Maintenance Manual applicable to the Jetstream 3200 has been revised. Some retirement lives have been amended and new lives introduced. Compliance with these requirements is necessary for continuing airworthiness.

David Villiers
Delegate of the Civil Aviation Safety Authority
