Section 303DB of the Environment Protection and Biodiversity Conservation Act 1999 (the EPBC Act) provides for the establishment of a list of exempt native specimens. Specimens included on the list are exempt from the trade control provisions that apply to regulated native specimens.

The effect of this instrument is to include the following specimens to the list of exempt native specimens and to make those inclusions subject to the notations specified below:

- Specimens that are or are derived from fish or invertebrates, other than specimens that belong to species listed under Part 13 of the EPBC Act, taken in the South Australia Lakes and Coorong Fishery, as defined in the Fisheries Management (Lakes and Coorong Fishery) Regulations 2006 and the Fisheries Management (General) Regulations 2007 in force under the Fisheries Management Act 2007 (South Australia).

The inclusion of the specimens in the list is subject to the following notations:

- The specimen, or the fish or invertebrate from which it is derived, was taken lawfully; and
- The specimens are included on the list until 27 May 2009.

Listing of the specimens described above on the list of exempt native specimens will allow continued export of these specimens until 27 May 2009.

In determining to include the specimens in the list of exempt native specimens regard was had to the Australian Government’s Guidelines for the Ecologically Sustainable Management of Fisheries – 2nd Edition. Those Guidelines establish the criteria for assessment of the ecological sustainability of the relevant fisheries management arrangements.

Subsection 303DC(3) of the EPBC Act provides that before amending the list, the Minister must consult such other Minister or Ministers, including a Minister or Ministers of each State and self-governing Territory and such other persons and organizations as the Minister considers appropriate. In this instance, the Delegate of the Minister for Environment, Heritage and the Arts consulted with the South Australian Minister for Agriculture, Food and Fisheries and the Department of Primary Industries and Resources South Australian as the Minister and Department have management responsibilities for the fishery concerned. In addition, the proposal to amend the list of exempt native specimens was advertised on DEWHA’s website and comment was invited from interested people for a period of 20 days. All comments received were taken into account in the decision to include the fishery on the list of exempt native specimens.

This instrument is a legislative instrument for the purposes of the Legislative Instruments Act 2003.

The instrument commences on 25 March 2009.
