“101A Indirect costs

- (1) Despite subsection 1013C(2) of the Act, the indirect cost of a MySuper product, an investment option offered within a superannuation product other than a MySuper product, managed investment product or investment option offered by a managed investment scheme means any amount that:
 - (a) a responsible person knows, or reasonably ought to know or, where this is not the case, may reasonably estimate has reduced or will reduce (as applicable) whether directly or indirectly the return on the product or option that is paid from or reduces the amount or value of:
 - (i) the income of or the property attributable to the product or option; or
 - (ii) the income of or property attributable to an interposed vehicle in or through which the property attributable to the product or option is invested; and
 - (b) is not charged to a member as a fee; and
 - (c) is not a fee as defined in clause 209A or an insurance fee.
- (2) For the purposes of subclause (1):
 - (a) property is invested in or through an interposed vehicle even if:
 - (i) the property is in turn invested in or through one or more other interposed vehicles; or

- (ii) the property was invested in the first mentioned interposed vehicle through or by another interposed vehicle; and
- (b) property is not invested in or through an interposed vehicle if the property is invested in the vehicle by a body, trust or partnership that:
 - (i) is not an interposed vehicle; and
 - (ii) is not the trustee or responsible entity.
- (3) Without limiting subclause (1), the indirect costs of a product or investment option referred to in subclause (1) include:
 - (a) the following amounts where the responsible person knows, or reasonably ought to know or, where this is not the case, may reasonably estimate those amounts:
 - (i) in relation to a derivative financial product that is not an option to acquire or dispose of a financial product—the amount that is the difference between the underlying return and the actual return for the derivative financial product, where the actual return on the product or option is less than the underlying return on the derivative financial product over the relevant financial year; or
 - (ii) in relation to a derivative financial product that is an option to acquire or dispose of a financial product—any amount by which the cost incurred to acquire the derivative financial product exceeds the amount that would be obtained on its disposal at that time; or
 - (b) where the responsible person does not know, does not believe they reasonably ought to know, and is not able to reasonably estimate without taking steps that the responsible person considers unreasonable, the amount in paragraph (a) (as applicable) in relation to a derivative financial product—the following amounts in relation to the derivative financial product:
 - (i) in relation to a derivative financial product that is not an option to acquire or dispose of a financial product—the greater of:
 - (A) the amount calculated using the following formula:

$$\text{relevant percentage} \times \text{value} \times (n/365)$$

where:

n means the number of days that the derivative financial product was held by the responsible person or interposed vehicle during the relevant financial year.

relevant percentage means 0.1%.

value, in relation to a derivative financial product, means the value of the ultimate reference assets, in each case taking into account any leverage, offsets or similar adjustments applied to or between the ultimate reference assets under the terms of the derivative financial product; and

- (B) the minimum amount that the responsible person believes or has reasonable grounds to believe would apply under paragraph (a);
- (ii) in relation to a derivative financial product that is an option to acquire or dispose of a financial product—the lesser of:
 - (A) the amount that would apply under subparagraph (i) if the exclusion from that subparagraph (i) of options did not apply; and
 - (B) the premium paid by the responsible person or interposed vehicle for the option,

where the amount referred to in paragraph (a) or (b) is attributable to:

- (c) the product or investment option; or
- (d) an interposed vehicle through which the property attributable to the product or investment option is invested.

(3A) In subclause (3):

actual return means the return that has been or would be received (as applicable), or loss that would be payable, by the responsible entity, trustee or interposed vehicle in relation to the derivative financial product over the relevant financial year if the derivative financial product was:

- (a) acquired at the time the derivative financial product was acquired, or, if the derivative financial product was not acquired during the relevant financial year, acquired at

the commencement of the relevant financial year for the same price at which it would have been disposed at the end of the preceding financial year; and

- (b) disposed of at the time the derivative financial product was disposed of, or, if the derivative financial product was not disposed of during the relevant financial year, disposed of at the end of the relevant financial year for the price at which it would have been disposed of at that time.

derivative financial product means a financial product that:

(a) is:

(i) a derivative; or

(ii) either:

(A) a security other than a share in a body or a debenture of a body; or

(B) a managed investment product or financial product referred to in paragraph 764A(1)(ba) of the Act other than an interest in a managed investment scheme,

under which:

(C) financial products (***delivery products***) will be delivered or an amount paid at a specified time (***maturity***) in the future; and

(D) the value of the delivery products to be delivered at maturity or the amount to be paid is ultimately determined, derived from or varies by reference to the value or amount of one or more of the following (each, a ***reference asset***):

(I) financial products other than the delivery products;

(II) an asset other than a financial product;

(III) a rate (including an interest rate or exchange rate);

(IV) an index;

provided that the reference asset is not related to the value of:

- (V) a share in a body or debenture of a body to which the delivery products relate; or
 - (VI) the assets of the managed investment scheme to which the delivery products relate; or
 - (VII) the assets attributable to a class of interests in the managed investment scheme to which the delivery products relate; and
- (b) is not able to be traded on a financial market at the time it is acquired.

reference asset:

- (a) in relation to a derivative financial product that is a derivative—means the something else that the amount of the consideration, or the value of the arrangement, is ultimately determined, derived from, or varies by reference to and, if the something else is a rate of interest or inflation, the amount on which that rate is applied under the derivative financial product in determining the amount to be paid or received;
- (b) in relation to a derivative financial product that is a security, managed investment product or financial product referred to in paragraph 764A(1)(ba) of the Act other than an interest in a managed investment scheme—has the meaning given by clause 101A(3A)(a)(ii)(D).

relevant financial year means the financial year for which responsible person is calculating indirect costs.

ultimate reference asset, in relation to a derivative financial product and each reference asset for the derivative financial product, means:

- (a) to the extent that the reference asset is:
 - (i) a derivative financial product; or
 - (ii) rights in an entity that would be an interposed vehicle if it were held by the superannuation entity or scheme; or
 - (iii) an index that includes a derivative financial product referred to in sub-paragraph (i) or rights in an entity referred to in sub-paragraph (ii),

the asset or assets from which the returns from the derivative financial product or rights in the entity are determined, or any asset or assets that are held in or through any other derivative financial products or entities that would be an interposed vehicle if they were held as part of the superannuation entity or scheme;

- (b) to the extent that the reference asset is not covered by any of the subparagraphs in paragraph (a)—the reference asset.

underlying return, in relation to a derivative financial product, means the return that has been or would be received (as applicable), or loss that would be payable, because of the change in the value of the ultimate reference assets taking into account any leverage, offsets or similar adjustments applied to or between the ultimate reference assets under the terms of each relevant derivative financial product or interest in an interposed vehicle over the relevant financial year for which the derivative financial product was held.

- (4) Despite subclause (1) and (3), indirect costs of a managed investment product or an investment option of a managed investment scheme do not include amounts referred to in subclause (3):
 - (a) where the derivative financial product referred to in subclause (3) is acquired or disposed of for the primary purpose of avoiding or limiting the financial consequences of fluctuations in, or in the value of, receipts or costs of the managed investment scheme whether or not the receipts or costs arise in or through an interposed vehicle; and
 - (b) where the indirect costs were calculated under paragraph (3)(a), to the extent that the difference would result from the incurring of transactional or operational costs in relation to the ultimate reference assets.

Note: Costs excluded under subparagraph (4) are likely to be transaction costs under clause 102. Indirect costs for superannuation products include transaction costs.”;

- (v) by inserting after the notional clause 101A (as inserted by this instrument):

“101B Interposed vehicle

- (1) A body, partnership or trust (each an ***entity***) is an ***interposed vehicle*** in relation to a product or investment option if both of the following are satisfied:

- (3) For the purposes of paragraph (2)(b), in determining whether the second entity has more than 70% of its assets by value invested in securities or other financial products, apply subclause (2) to the second entity as if the second entity was the first entity referred to in that subclause.
- (4) An entity is also an **interposed vehicle** in relation to a product or investment option if, having regard to the Product Disclosure Statement for the product or investment option, a security or interest in the entity could be reasonably regarded, by retail clients who may be expected to be given the Product Disclosure Statement, as the means by which the benefit of investments by or through the entity is obtained, rather than the investment of the superannuation entity or registered scheme to which the product or investment option relates.
- (5) Despite anything in subclauses (1) to (4), an entity will not be an **interposed vehicle** in relation to a product or investment option if all of the following apply:

(1) *Superannuation products*

DID YOU KNOW?

Small differences in both investment performance and fees and costs can have a substantial impact on your long term returns.

For example, total annual fees and costs of 2% of your account balance rather than 1% could reduce your final return by up to 20% over a 30 year period (for example reduce it from \$100 000 to \$80 000).

You should consider whether features such as superior investment performance or the provision of better member services justify higher fees and costs.

You or your employer, as applicable, may be able to negotiate to pay lower fees. Ask the fund or your financial adviser.

If you would like to find out more, or see the impact of the fees based on your own circumstances, the **Australian Securities and Investments Commission (ASIC)** website (www.moneySMART.gov.au) has a superannuation calculator to help you check out different fee options.
