Statement of Principles concerning malignant neoplasm of the lung No. 93 of 2014

made under subsection 196B(3) of the

Veterans' Entitlements Act 1986

Compilation No. 1

Compilation date: 18 September 2017
Includes amendments up to: Veterans' Entitlements (Statements of Principles—Cumulative Equivalent Dose) Amendment Determination 2017 (No. 58 of 2017) (F2017L01067)

The day of commencement of this Amendment Determination is 18 September 2017.

Prepared by the Repatriation Medical Authority Secretariat, Brisbane
About this compilation

This compilation

This is a compilation of the Statement of Principles concerning malignant neoplasm of the lung No. 93 of 2014 that shows the text of the law as amended and in force on 18 September 2017.

The notes at the end of this compilation (the endnotes) include information about amending laws and the amendment history of provisions of the compiled law.

Uncommenced amendments

The effect of uncommenced amendments is not shown in the text of the compiled law. Any uncommenced amendments affecting the law are accessible on the Legislation Register (www.legislation.gov.au). The details of amendments made up to, but not commenced at, the compilation date are underlined in the endnotes. For more information on any uncommenced amendments, see the series page on the Legislation Register for the compiled law.

Application, saving and transitional provisions for provisions and amendments

If the operation of a provision or amendment of the compiled law is affected by an application, saving or transitional provision that is not included in this compilation, details are included in the endnotes.

Modifications

If the compiled law is modified by another law, the compiled law operates as modified but the modification does not amend the text of the law. Accordingly, this compilation does not show the text of the compiled law as modified. For more information on any modifications, see the series page on the Legislation Register for the compiled law.

Self-repealing provisions

If a provision of the compiled law has been repealed in accordance with a provision of the law, details are included in the endnotes.
Statement of Principles
concerning

MALIGNANT NEOPLASM OF THE LUNG

No. 93 of 2014

for the purposes of the

Veterans’ Entitlements Act 1986
and

Military Rehabilitation and Compensation Act 2004

Title

1. This Instrument may be cited as Statement of Principles concerning malignant neoplasm of the lung No. 93 of 2014.

Determination

2. The Repatriation Medical Authority under subsection 196B(3) and (8) of the Veterans’ Entitlements Act 1986 (the VEA):

   (a) revokes Instrument No. 18 of 2006 concerning malignant neoplasm of the lung; and

   (b) determines in its place this Statement of Principles.

Kind of injury, disease or death

3. (a) This Statement of Principles is about malignant neoplasm of the lung and death from malignant neoplasm of the lung.

   (b) For the purposes of this Statement of Principles, "malignant neoplasm of the lung" means a primary malignant neoplasm arising
from the respiratory epithelium of the trachea, bronchus, bronchioles or alveoli. This definition excludes soft tissue sarcoma, non-Hodgkin’s lymphoma, Hodgkin’s lymphoma, carcinoid tumour and mesothelioma.

(c) Malignant neoplasm of the lung attracts ICD-10-AM code C33 or C34.

(d) In the application of this Statement of Principles, the definition of "malignant neoplasm of the lung" is that given at paragraph 3(b) above.

Basis for determining the factors

4. On the sound medical-scientific evidence available, the Repatriation Medical Authority is of the view that it is more probable than not that malignant neoplasm of the lung and death from malignant neoplasm of the lung can be related to relevant service rendered by veterans or members of the Forces under the VEA, or members under the Military Rehabilitation and Compensation Act 2004 (the MRCA).

Factors that must be related to service

5. Subject to clause 7, at least one of the factors set out in clause 6 must be related to the relevant service rendered by the person.

Factors

6. The factor that must exist before it can be said that, on the balance of probabilities, malignant neoplasm of the lung or death from malignant neoplasm of the lung is connected with the circumstances of a person’s relevant service is:

(a) smoking at least one half of a pack-year of cigarettes, or the equivalent thereof in other tobacco products, before the clinical onset of malignant neoplasm of the lung, where smoking commenced at least ten years before the clinical onset of malignant neoplasm of the lung; or

(b) being in an atmosphere with a visible tobacco smoke haze in an enclosed space:

(i) for at least 5 000 hours before the clinical onset of malignant neoplasm of the lung; and

(ii) where the first exposure to that atmosphere commenced at least ten years before the clinical onset of malignant neoplasm of the lung; or

(c) inhaling respirable asbestos fibres in an enclosed space:
(i) at the time material containing respirable asbestos fibres was being applied, removed, dislodged, cut or drilled; and

(ii) where the first inhalation of respirable asbestos fibres commenced at least ten years before the clinical onset of malignant neoplasm of the lung; or

(d) inhaling respirable asbestos fibres in an open environment:

(i) for a cumulative period of at least 1 000 hours before the clinical onset of malignant neoplasm of the lung; and

(ii) at the time material containing respirable asbestos fibres was being applied, removed, dislodged, cut or drilled; and

(iii) where the first inhalation of respirable asbestos fibres commenced at least ten years before the clinical onset of malignant neoplasm of the lung; or

(e) being within 100 metres of an industrial coke oven for a cumulative period of at least 4 500 hours, at least ten years before the clinical onset of malignant neoplasm of the lung; or

(f) being heavily exposed to diesel engine exhaust for a cumulative period of at least 15 000 hours, at least ten years before the clinical onset of malignant neoplasm of the lung; or

(g) being exposed to mustard gas at least ten years before the clinical onset of malignant neoplasm of the lung; or

(h) having received a cumulative equivalent dose of at least 0.5 sievert of ionising radiation to the lung, at least ten years before the clinical onset of malignant neoplasm of the lung; or

(i) being exposed to at least 100 Working Level Months of radon in an enclosed space before the clinical onset of malignant neoplasm of the lung, where the first exposure to radon occurred at least ten years before the clinical onset of malignant neoplasm of the lung; or

(j) having a pulmonary disease from the specified list at least ten years before the clinical onset of malignant neoplasm of the lung; or

(k) working as a painter for a cumulative period of at least 10 000 hours before the clinical onset of malignant neoplasm of the lung, where the first inhalation occurred at least ten years before the clinical onset of malignant neoplasm of the lung; or

(l) inhaling respirable crystalline silica dust in an enclosed space:

(i) for a cumulative period of at least 3 000 hours before the clinical onset of malignant neoplasm of the lung; and
(ii) at the time material containing crystalline silica was being produced, excavated, drilled, cut or ground, or used in construction, manufacturing, cleaning or blasting; and

(iii) where the first inhalation of respirable crystalline silica dust commenced at least ten years before the clinical onset of malignant neoplasm of the lung; or

(m) inhaling respirable crystalline silica dust in an open environment:

(i) for a cumulative period of at least 6000 hours before the clinical onset of malignant neoplasm of the lung; and

(ii) at the time material containing crystalline silica was being produced, excavated, drilled, cut or ground, or used in construction, manufacturing, cleaning or blasting; and

(iii) where the first inhalation of respirable crystalline silica dust commenced at least ten years before the clinical onset of malignant neoplasm of the lung; or

(n) inhaling fumes, vapours or dusts of a metal or metalloid from the specified list:

(i) for a cumulative period of at least 3500 hours before the clinical onset of malignant neoplasm of the lung; and

(ii) where the first inhalation of fumes, vapours or dusts occurred at least ten years before the clinical onset of malignant neoplasm of the lung; or

(o) inhaling fumes of bis(chloromethyl)ether or chloromethyl methyl ether:

(i) for a cumulative period of at least 3500 hours before the clinical onset of malignant neoplasm of the lung; and

(ii) where the first inhalation of fumes occurred at least ten years before the clinical onset of malignant neoplasm of the lung; or

(p) having berylliosis at the time of the clinical onset of malignant neoplasm of the lung; or

(q) being exposed to arsenic as specified before the clinical onset of malignant neoplasm of the lung, where the first exposure to arsenic occurred at least ten years before the clinical onset of malignant neoplasm of the lung; or

(r) inhaling smoke from the combustion of coal, wood, charcoal or another solid biomass fuel while in an enclosed space with a visible smoke haze:

(i) for a cumulative period of at least 15000 hours before the clinical onset of malignant neoplasm of the lung; and
(ii) where the first inhalation of smoke commenced at least ten years before the clinical onset of malignant neoplasm of the lung; or

(s) inhaling ambient polluted air as specified:

(i) for a cumulative period of at least 70,000 hours before the clinical onset of malignant neoplasm of the lung; and

(ii) where the first inhalation of ambient polluted air occurred at least ten years before the clinical onset of malignant neoplasm of the lung; or

(t) inhaling soot, whilst engaged in the cleaning of chimneys or flues:

(i) for a cumulative period of at least 3,500 hours before the clinical onset of malignant neoplasm of the lung; and

(ii) where the first inhalation of soot occurred at least ten years before the clinical onset of malignant neoplasm of the lung; or

(u) inhaling mist from a strong inorganic acid:

(i) for a cumulative period of at least 3,500 hours before the clinical onset of malignant neoplasm of the lung; and

(ii) where the first inhalation of mist from a strong inorganic acid commenced at least ten years before the clinical onset of malignant neoplasm of the lung; or

(v) inhaling fumes in an enclosed space, while working in a specified industry or manufacturing process generating high concentrations of volatile polycyclic aromatic hydrocarbons:

(i) for a cumulative period of at least 3,500 hours before the clinical onset of malignant neoplasm of the lung; and

(ii) where the first inhalation of fumes occurred at least ten years before the clinical onset of malignant neoplasm of the lung; or

(w) inhaling fumes of coal tar pitch or concentrated coal tar distillates involving exposure to high levels of volatile polycyclic aromatic hydrocarbons:

(i) for a cumulative period of at least 3,500 hours before the clinical onset of malignant neoplasm of the lung; and

(ii) where the first inhalation of fumes occurred at least ten years before the clinical onset of malignant neoplasm of the lung; or

(x) inhaling fumes generated during iron and steel founding or in rubber production, while in an enclosed space in immediate proximity to production facilities:

(i) for a cumulative period of at least 3,500 hours before the clinical onset of malignant neoplasm of the lung; and
(ii) where the first inhalation of fumes occurred at least ten years before the clinical onset of malignant neoplasm of the lung; or
(y) receiving MOPP at least five years before the clinical onset of malignant neoplasm of the lung; or
(z) in current smokers only, receiving 20 milligrams of beta-carotene supplement daily for a continuous period of at least five years before the clinical onset of malignant neoplasm of the lung; or
(aa) inability to obtain appropriate clinical management for malignant neoplasm of the lung.

Factors that apply only to material contribution or aggravation

7. Paragraph 6(aa) applies only to material contribution to, or aggravation of, malignant neoplasm of the lung where the person’s malignant neoplasm of the lung was suffered or contracted before or during (but not arising out of) the person’s relevant service.

Inclusion of Statements of Principles

8. In this Statement of Principles if a relevant factor applies and that factor includes an injury or disease in respect of which there is a Statement of Principles then the factors in that last mentioned Statement of Principles apply in accordance with the terms of that Statement of Principles as in force from time to time.

Other definitions

9. For the purposes of this Statement of Principles:
"a metal or metalloid from the specified list" means:
(a) arsenic and inorganic arsenic compounds;
(b) beryllium and beryllium compounds;
(c) cadmium and cadmium compounds;
(d) hexavalent chromium (chromium VI) compounds; or
(e) mixtures that include nickel metal and nickel compounds;

"a pulmonary disease from the specified list" means:
(a) bacterial pneumonia;
(b) chronic obstructive pulmonary disease; or
(c) pulmonary tuberculosis;

"a specified industry or manufacturing process" means:
(a) aluminium production;
(b) coal gasification; or
(c) coke production;
"ambient polluted air as specified" means air with annual average levels of:
(a) particulates with an aerodynamic diameter <2.5 μm (PM2.5) exceeding 30 μg/m³; or
(b) particulates with an aerodynamic diameter <10 μm (PM10) exceeding 50 μg/m³;

"being exposed to arsenic as specified" means:
(a) consuming drinking water with an average arsenic concentration of at least 50 micrograms per litre for a cumulative period of at least ten years;
(b) consuming drinking water resulting in a cumulative total arsenic exposure equivalent to having consumed drinking water containing at least 50 micrograms per litre for at least ten years; or
(c) having clinical evidence of chronic arsenic toxicity;

"being heavily exposed to diesel engine exhaust" means:
(a) being an occupant in an enclosed diesel powered vehicle cabin contaminated with diesel fumes;
(b) repairing or servicing diesel engines; or
(c) working in an enclosed space where diesel powered engines or motors are being operated;

"berylliosis" (synonymous with chronic beryllium disease) means a granulomatous disease usually involving the lungs, but which may involve the skin or other structures, and is induced by a delayed hypersensitivity reaction to beryllium fumes;

"cumulative equivalent dose" means the total dose of ionising radiation received by the particular organ or tissue from external exposure, internal exposure or both, apart from normal background radiation exposure in Australia, calculated in accordance with the methodology set out in Guide to calculation of 'cumulative equivalent dose' for the purpose of applying ionising radiation factors contained in Statements of Principles determined under Part XIA of the Veterans' Entitlements Act 1986 (Cth), Australian Radiation Protection and Nuclear Safety Agency, as in force on 2 August 2017;

Note 1: Examples of circumstances that might lead to exposure to ionising radiation include being present during or subsequent to the testing or use of nuclear weapons, undergoing diagnostic or therapeutic medical procedures involving ionising radiation, and being a member of an aircrew, leading to increased levels of exposure to cosmic radiation.

Note 2: For the purpose of dose reconstruction, dose is calculated as an average over the mass of a specific tissue or organ. If a tissue is exposed to multiple sources of ionising radiation, the various dose estimates for each type of radiation must be combined.
"death from malignant neoplasm of the lung" in relation to a person includes death from a terminal event or condition that was contributed to by the person’s malignant neoplasm of the lung;

"ICD-10-AM code" means a number assigned to a particular kind of injury or disease in The International Statistical Classification of Diseases and Related Health Problems, 10th Revision, Australian Modification (ICD-10-AM), Eighth Edition, effective date of 1 July 2013, copyrighted by the Independent Hospital Pricing Authority, and having ISBN 978-1-74128-213-9;

"mist from a strong inorganic acid" means a visible suspension of liquid sulphuric, nitric or hydrochloric acid in gas;

"MOPP" means chemotherapy involving a combination of mechlorethamine, vincristine, procarbazine and prednisone;

"pack-year of cigarettes, or the equivalent thereof in other tobacco products" means a calculation of consumption where one pack-year of cigarettes equals 20 tailor-made cigarettes per day for a period of one calendar year, or 7300 cigarettes. One tailor-made cigarette approximates one gram of tobacco or one gram of cigar or pipe tobacco by weight. One pack-year of tailor-made cigarettes equates to 7.3 kilograms of smoking tobacco by weight. Tobacco products mean cigarettes, pipe tobacco or cigars, smoked alone or in any combination;

"relevant service" means:

(a) eligible war service (other than operational service) under the VEA;
(b) defence service (other than hazardous service and British nuclear test defence service) under the VEA; or
(c) peacetime service under the MRCA;

"soot" means a carbonaceous by-product material produced from the incomplete combustion of fossil fuel or other carbon-containing material, including airborne residual pyrolysed fuel particles such as coal, cenospheres, charred wood, petroleum coke;

"terminal event" means the proximate or ultimate cause of death and includes:

(a) pneumonia;
(b) respiratory failure;
(c) cardiac arrest;
(d) circulatory failure; or
(e) cessation of brain function;

"working as a painter" means applying paint, including solvent- or water-based conventional paint, spray paint, varnish, enamel, lacquer, water-emulsion and solution finish, nonaqueous dispersion or organosol, plastisol,
and powder coating, during the course of activities such as building, maintenance and construction, interior and exterior decoration, artistic painting, and wood and metal painting. This definition includes mixed activities in which application of paint occurs with other tasks such as wallpapering and plastering. This definition includes activities that are preparatory to painting, such as mixing paints, maintaining painting equipment, and background preparation of surfaces for application of paint;

"Working Level" is any combination of radon progeny in one litre of air that ultimately releases $1.3 \times 10^5$ million electron volts of alpha energy during decay;

"Working Level Month" is exposure to one Working Level for 170 hours.

Application

10. This Instrument applies to all matters to which section 120B of the VEA or section 339 of the MRCA applies.

Date of effect

11. This Instrument takes effect from 17 November 2014.
Endnotes

Endnote 1—About the endnotes

The endnotes provide information about this compilation and the compiled law.

The following endnotes are included in every compilation:

Endnote 1—About the endnotes
Endnote 2—Abbreviation key
Endnote 3—Legislation history
Endnote 4—Amendment history

Abbreviation key—Endnote 2
The abbreviation key sets out abbreviations that may be used in the endnotes.

Legislation history and amendment history—Endnotes 3 and 4
Amending laws are annotated in the legislation history and amendment history.

The legislation history in endnote 3 provides information about each law that has amended (or will amend) the compiled law. The information includes commencement details for amending laws and details of any application, saving or transitional provisions that are not included in this compilation.

The amendment history in endnote 4 provides information about amendments at the provision (generally section or equivalent) level. It also includes information about any provision of the compiled law that has been repealed in accordance with a provision of the law.

Misdescribed amendments
A misdescribed amendment is an amendment that does not accurately describe the amendment to be made. If, despite the misdescription, the amendment can be given effect as intended, the amendment is incorporated into the compiled law and the abbreviation “(md)” added to the details of the amendment included in the amendment history.

If a misdescribed amendment cannot be given effect as intended, the abbreviation “(md not incorp)” is added to the details of the amendment included in the amendment history.
