Statement of Principles concerning external burn (Reasonable Hypothesis) (No. 110 of 2015)

made under subsection 196B(2) of the

Veterans' Entitlements Act 1986

Compilation No. 1

Compilation date: 18 September 2017

Includes amendments up to: Veterans' Entitlements (Statements of Principles—Cumulative Equivalent Dose) Amendment Determination 2017 (No. 58 of 2017) (F2017L01067)

The day of commencement of this Amendment Determination is 18 September 2017.

Prepared by the Repatriation Medical Authority Secretariat, Brisbane
About this compilation

This compilation

This is a compilation of the Statement of Principles concerning external burn (Reasonable Hypothesis) (No. 110 of 2015) that shows the text of the law as amended and in force on 18 September 2017.

The notes at the end of this compilation (the endnotes) include information about amending laws and the amendment history of provisions of the compiled law.

Uncommenced amendments

The effect of uncommenced amendments is not shown in the text of the compiled law. Any uncommenced amendments affecting the law are accessible on the Legislation Register (www.legislation.gov.au). The details of amendments made up to, but not commenced at, the compilation date are underlined in the endnotes. For more information on any uncommenced amendments, see the series page on the Legislation Register for the compiled law.

Application, saving and transitional provisions for provisions and amendments

If the operation of a provision or amendment of the compiled law is affected by an application, saving or transitional provision that is not included in this compilation, details are included in the endnotes.

Modifications

If the compiled law is modified by another law, the compiled law operates as modified but the modification does not amend the text of the law. Accordingly, this compilation does not show the text of the compiled law as modified. For more information on any modifications, see the series page on the Legislation Register for the compiled law.

Self-repealing provisions

If a provision of the compiled law has been repealed in accordance with a provision of the law, details are included in the endnotes.
Statement of Principles concerning
EXTERNAL BURN
(Reasonable Hypothesis)
(No. 110 of 2015)

The Repatriation Medical Authority determines the following Statement of Principles under subsection 196B(2) of the Veterans’ Entitlements Act 1986.

Dated 21 August 2015

Statement of Principles concerning
External Burn (Reasonable Hypothesis) (No. 110 of 2015)
Veterans' Entitlements Act 1986

Compilation No. 1
Compilation date: 18/09/2017

Authorised Version F2017C00862 registered 18/09/2017
1 Name

This is the Statement of Principles concerning external burn (Reasonable Hypothesis) (No. 110 of 2015).

2 Commencement

This instrument commences on 21 September 2015.

3 Authority

This instrument is made under subsection 196B(2) of the Veterans' Entitlements Act 1986.

4 Revocation

The Statement of Principles concerning external burn No. 41 of 2006 made under subsection 196B(2) of the VEA is revoked.

5 Application

This instrument applies to a claim to which section 120A of the VEA or section 338 of the Military Rehabilitation and Compensation Act 2004 applies.

6 Definitions

The terms defined in the Schedule 1 - Dictionary have the meaning given when used in this instrument.

7 Kind of injury, disease or death to which this Statement of Principles relates

(1) This Statement of Principles is about external burn and death from external burn.

Meaning of external burn

(2) For the purposes of this Statement of Principles, external burn:

(a) means a burn due to external application of an agent; and
(b) includes burns of the eye and sunburn; and
(c) excludes burns of the respiratory tract, gastrointestinal tract and internal genitourinary tract, 'wind burn', frostbite and burns due to electrical injury or friction.
Death from *external burn*

(3) For the purposes of this Statement of Principles, external burn, in relation to a person, includes death from a terminal event or condition that was contributed to by the person’s external burn.

Note: *terminal event* is defined in the Schedule 1 – Dictionary.

8 Basis for determining the factors

The Repatriation Medical Authority is of the view that there is sound medical-scientific evidence that indicates that external burn and death from external burn can be related to relevant service rendered by veterans, members of Peacekeeping Forces, or members of the Forces under the VEA, or members under the MRCA.

Note: *relevant service* is defined in the Schedule 1 – Dictionary.

9 Factors that must exist

At least one of the following factors must as a minimum exist before it can be said that a reasonable hypothesis has been raised connecting external burn or death from external burn with the circumstances of a person’s relevant service:

(1) having exposure to a heat source sufficient to cause erythema at the affected area of the body at the time of the clinical onset of external burn;

(2) having exposure to extreme cold sufficient to cause erythema at the affected area of the body at the time of the clinical onset of external burn;

Note: *extreme cold* is defined in the Schedule 1 - Dictionary.

(3) having contact with vesicant or corrosive chemicals sufficient to cause erythema at the affected area of the body within the 48 hours before the clinical onset of external burn;

(4) having received a cumulative equivalent dose of at least 1.0 sievert of ionising radiation to the affected area of the body within the 30 days before the clinical onset of external burn;

Note: *cumulative equivalent dose* is defined in the Schedule 1 - Dictionary.

(5) having exposure to radiofrequency or microwave radiation sufficient to cause erythema at the affected area of the body at the time of the clinical onset of external burn;
(6) having exposure to infrared radiation sufficient to cause erythema at the affected area of the body at the time of the clinical onset of external burn;

(7) having laser applied, sufficient to cause erythema, at the affected area of the body at the time of the clinical onset of external burn;

(8) having exposure to ultraviolet radiation sufficient to cause erythema at the affected area of the body at the time of the clinical onset of external burn;

(9) having exposure to high intensity, focussed ultrasound sufficient to cause erythema at the affected area of the body at the time of the clinical onset of external burn;

(10) inability to obtain appropriate clinical management for external burn.

10 Relationship to service

(1) The existence in a person of any factor referred to in section 9 must be related to the relevant service rendered by the person.

(2) The factor set out in subsection 9(10) applies only to material contribution to, or aggravation of, external burn where the person’s external burn was suffered or contracted before or during (but did not arise out of) the person’s relevant service.

11 Factors referring to an injury or disease covered by another Statement of Principles

In this Statement of Principles:

(1) if a factor referred to in section 9 applies in relation to a person; and

(2) that factor refers to an injury or disease in respect of which a Statement of Principles has been determined under subsection 196B(2) of the VEA;

then the factors in that Statement of Principles apply in accordance with the terms of that Statement of Principles as in force from time to time.
Schedule 1 - Dictionary

Note: See Section 6

1 Definitions

In this instrument:

*cumulative equivalent dose* means the total dose of ionising radiation received by the particular organ or tissue from external exposure, internal exposure or both, apart from normal background radiation exposure in Australia, calculated in accordance with the methodology set out in *Guide to calculation of 'cumulative equivalent dose' for the purpose of applying ionising radiation factors contained in Statements of Principles determined under Part XIA of the Veterans' Entitlements Act 1986 (Cth)*, Australian Radiation Protection and Nuclear Safety Agency, as in force on 2 August 2017.

Note 1: Examples of circumstances that might lead to exposure to ionising radiation include being present during or subsequent to the testing or use of nuclear weapons, undergoing diagnostic or therapeutic medical procedures involving ionising radiation, and being a member of an aircrew, leading to increased levels of exposure to cosmic radiation.

Note 2: For the purpose of dose reconstruction, dose is calculated as an average over the mass of a specific tissue or organ. If a tissue is exposed to multiple sources of ionising radiation, the various dose estimates for each type of radiation must be combined.

*external burn*—see subsection 7(2).

*extreme cold* means zero degrees Celsius or below.

*MRCA* means the *Military Rehabilitation and Compensation Act 2004*.

*relevant service* means:

(a) operational service under the VEA;
(b) peacekeeping service under the VEA;
(c) hazardous service under the VEA;
(d) British nuclear test defence service under the VEA;
(e) warlike service under the MRCA; or
(f) non-warlike service under the MRCA.
**terminal event** means the proximate or ultimate cause of death and includes the following:

(a) pneumonia;
(b) respiratory failure;
(c) cardiac arrest;
(d) circulatory failure; or
(e) cessation of brain function.

**VEA** means the *Veterans’ Entitlements Act 1986*.

Endnotes

Endnote 1—About the endnotes

The endnotes provide information about this compilation and the compiled law.

The following endnotes are included in every compilation:

Endnote 1—About the endnotes
Endnote 2—Abbreviation key
Endnote 3—Legislation history
Endnote 4—Amendment history

Abbreviation key—Endnote 2

The abbreviation key sets out abbreviations that may be used in the endnotes.

Legislation history and amendment history—Endnotes 3 and 4

Amending laws are annotated in the legislation history and amendment history.

The legislation history in endnote 3 provides information about each law that has amended (or will amend) the compiled law. The information includes commencement details for amending laws and details of any application, saving or transitional provisions that are not included in this compilation.

The amendment history in endnote 4 provides information about amendments at the provision (generally section or equivalent) level. It also includes information about any provision of the compiled law that has been repealed in accordance with a provision of the law.

Misdescribed amendments

A misdescribed amendment is an amendment that does not accurately describe the amendment to be made. If, despite the misdescription, the amendment can be given effect as intended, the amendment is incorporated into the compiled law and the abbreviation “(md)” added to the details of the amendment included in the amendment history.

If a misdescribed amendment cannot be given effect as intended, the abbreviation “(md not incorp)” is added to the details of the amendment included in the amendment history.
