- (a) either:

- (A) the income of or the property attributable to the product or option; or
- (B) the income of or the property attributable to an interposed vehicle in or through which the property attributable to the product or option is invested; or

- (ii) satisfies both the following:

- (A) the amount is paid or payable by or on behalf of a person who may make payments that form part of the return on, or the value of, the product or option whether directly or through an interposed vehicle;
- (B) payment of the amount is a benefit that increases the returns or value of the product or option or provides a benefit to the issuer in relation to the product or option that is retained by the issuer; and

 - (i) is not an interposed vehicle; and
 - (ii) is not the trustee or responsible entity.
- (3) Without limiting subclause (1), the indirect costs of a product or investment option referred to in subclause (1) include:
- (a) the following amounts where the responsible person knows, or reasonably ought to know or, where this is not the case, may reasonably estimate those amounts:
 - (i) in relation to a derivative financial product that is not an option to acquire or dispose of a financial

product—the amount that is the difference between the underlying return and the actual return for the derivative financial product, where the actual return on the product or option is less than the underlying return on the derivative financial product over the relevant financial year; or

- (ii) in relation to a derivative financial product that is an option to acquire or dispose of a financial product—any amount by which the cost incurred to acquire the derivative financial product exceeds the amount that would be obtained on its disposal at that time; or
- (b) where the responsible person does not know, does not believe they reasonably ought to know, and is not able to reasonably estimate without taking steps that the responsible person considers unreasonable, the amount in paragraph (a) (as applicable) in relation to a derivative financial product—the following amounts in relation to the derivative financial product:

- (i) in relation to a derivative financial product that is not an option to acquire or dispose of a financial product—the greater of:

- (A) the amount calculated using the following formula:

$$\text{relevant percentage} \times \text{value} \times (n/365)$$

where:

n means the number of days that the derivative financial product was held by the responsible person or interposed vehicle during the relevant financial year.

relevant percentage means 0.1%.

value, in relation to a derivative financial product, means the value of the ultimate reference assets, in each case taking into account any leverage, offsets or similar

adjustments applied to or between the ultimate reference assets under the terms of the derivative financial product; and

- (B) the minimum amount that the responsible person believes or has reasonable grounds to believe would apply under paragraph (a);
- (ii) in relation to a derivative financial product that is an option to acquire or dispose of a financial product—the lesser of:
 - (A) the amount that would apply under subparagraph (i) if the exclusion from that subparagraph (i) of options did not apply; and
 - (B) the premium paid by the responsible person or interposed vehicle for the option,

where the amount referred to in paragraph (a) or (b) is attributable to:

- (c) the product or investment option; or
- (d) an interposed vehicle through which the property attributable to the product or investment option is invested.

(3A) In subclause (3):

actual return means the return that has been or would be received (as applicable), or loss that would be payable, by the responsible entity, trustee or interposed vehicle in relation to the derivative financial product over the relevant financial year if the derivative financial product was:

- (a) acquired at the time the derivative financial product was acquired, or, if the derivative financial product was not acquired during the relevant financial year, acquired at the commencement of the relevant financial year for the same price at which it would have been disposed at the end of the preceding financial year; and
- (b) disposed of at the time the derivative financial product was disposed of, or, if the derivative financial product

was not disposed of during the relevant financial year, disposed of at the end of the relevant financial year for the price at which it would have been disposed of at that time.

derivative financial product means a financial product that:

- (a) is:
 - (i) a derivative; or
 - (ii) either:
 - (A) a security other than a share in a body or a debenture of a body; or
 - (B) a collective investment product or financial product referred to in paragraph 764A(1)(ba) of the Act other than an interest in a managed investment scheme,

under which:

- (C) financial products (***delivery products***) will be delivered or an amount paid at a specified time (***maturity***) in the future; and
- (D) the value of the delivery products to be delivered at maturity or the amount to be paid is ultimately determined, derived from or varies by reference to the value or amount of one or more of the following (each, a ***reference asset***):
 - (I) financial products other than the delivery products;
 - (II) an asset other than a financial product;
 - (III) a rate (including an interest rate or exchange rate);
 - (IV) an index;

provided that the reference asset is not related to the value of:

- (V) a share in a body or debenture of a body to which the delivery products relate; or
 - (VI) the assets of the managed investment scheme to which the delivery products relate; or
 - (VII) the assets attributable to a class of interests in the managed investment scheme to which the delivery products relate; and
- (b) is not able to be traded on a financial market at the time it is acquired.

reference asset:

- (a) in relation to a derivative financial product that is a derivative—means the something else that the amount of the consideration, or the value of the arrangement, is ultimately determined, derived from, or varies by reference to and, if the something else is a rate of interest or inflation, the amount on which that rate is applied under the derivative financial product in determining the amount to be paid or received;
- (b) in relation to a derivative financial product that is a security, collective investment product or financial product referred to in paragraph 764A(1)(ba) of the Act other than an interest in a managed investment scheme—has the meaning given by clause 101A(3A)(a)(ii)(D).

relevant financial year means the financial year for which responsible person is calculating indirect costs.

ultimate reference asset, in relation to a derivative financial product and each reference asset for the derivative financial product, means:

- (a) to the extent that the reference asset is:
 - (i) a derivative financial product; or

- (ii) rights in an entity that would be an interposed vehicle if it were held by the superannuation entity or scheme; or
- (iii) an index that includes a derivative financial product referred to in sub-paragraph (i) or rights in an entity referred to in sub-paragraph (ii),

the asset or assets from which the returns from the derivative financial product or rights in the entity are determined, or any asset or assets that are held in or through any other derivative financial products or entities that would be an interposed vehicle if they were held as part of the superannuation entity or scheme;

- (b) to the extent that the reference asset is not covered by any of the subparagraphs in paragraph (a)—the reference asset.

underlying return, in relation to a derivative financial product, means the return that has been or would be received (as applicable), or loss that would be payable, because of the change in the value of the ultimate reference assets taking into account any leverage, offsets or similar adjustments applied to or between the ultimate reference assets under the terms of each relevant derivative financial product or interest in an interposed vehicle over the relevant financial year for which the derivative financial product was held.

- (4) Despite subclause (1) and (3), indirect costs of a collective investment product or an investment option of a managed investment scheme do not include amounts referred to in subclause (3):
 - (a) where the derivative financial product referred to in subclause (3) is acquired or disposed of for the primary purpose of avoiding or limiting the financial consequences of fluctuations in, or in the value of, receipts or costs of the managed investment scheme whether or not the receipts or costs arise in or through an interposed vehicle; and
 - (b) where the indirect costs were calculated under paragraph (3)(a), to the extent that the difference would result from the incurring of transactional or

operational costs in relation to the ultimate reference assets.

Note: Costs excluded under subparagraph (4) are likely to be transaction costs under clause 102. Indirect costs for superannuation products generally include transaction costs.”;

- (v) by inserting after the notional clause 101A (as inserted by this instrument):

“101B Interposed vehicle

- (1) A body, partnership or trust (each an *entity*) is an *interposed vehicle* in relation to a product or investment option if both of the following are satisfied:
- (a) property attributable to the product or investment option to which the Product Disclosure Statement relates is invested in or through the entity;
 - (b) the responsible person for the Product Disclosure Statement believes or has reasonable grounds to believe that the entity has more than 70% of its assets by value invested in securities or other financial products.
- (2) For the purposes of subclause (1) and subject to subclause (3), in determining whether an entity (the *first entity*) has more than 70% of its assets by value invested in securities or other financial products, disregard for the numerator, securities or other financial products that:
- (a) are reasonably regarded as a means by which the first entity makes an investment in real property or an infrastructure entity; or
 - (b) confer on the first entity control of another entity (the *second entity*), unless the responsible person for the Product Disclosure Statement has reasonable grounds to believe that the second entity has more than 70% of its assets by value invested in securities or other financial products.
- (3) For the purposes of paragraph (2)(b), in determining whether the second entity has more than 70% of its assets by value invested in securities or other financial products, apply subclause (2) to the

second entity as if the second entity was the first entity referred to in that subclause.

(4) An entity is also an ***interposed vehicle*** in relation to a product or investment option if, having regard to the Product Disclosure Statement for the product or investment option and any other information issued by the responsible person, a security or interest in the entity could be reasonably regarded, by retail clients who may be expected to be given the Product Disclosure Statement or other information, as the means by which the benefit of investments by or through the entity is obtained, rather than the investment of the superannuation entity, registered scheme or notified foreign passport fund to which the product or investment option relates.

(4A) Subject to subclause (4B), an entity is also an ***interposed vehicle*** in relation to a product or investment option if:

- (a) the Product Disclosure Statement for the product or investment option or any other information issued by the responsible person relating to the product or investment option issued by the responsible person that has been given or may be reasonably be expected to be given to retail clients refers to “property”, “real estate” or “land” or similar terms in the description of the product or investment option or as one of the assets (***relevant asset***) in which investment may be made under the product or investment option; and
- (b) real property or an interest in land to which the reference relates is directly or indirectly held by or through the entity;

(4B) An entity is not an ***interposed vehicle*** because of subclause (4A) if both the following are satisfied:

- (a) the reference in the Product Disclosure Statement or other information is merely part of a reference to an entity (whether specified or not) that directly or indirectly invests in real property or interests in land or to physical infrastructure referred to in paragraphs (a) to (j) of the definition of ***infrastructure entity*** in subclause (6);
- (b) a retail client who has read the Statement or other information could not reasonably believe that the product or investment option or the relevant asset may be intended for persons predominantly intending to benefit from increases in

the value of, or returns from holding, real property or an interest in land other than physical infrastructure referred to in paragraphs (a) to (j) of the definition of **infrastructure entity** in subclause (6).

- (4C) Subject to subclause (4D), an entity is also an **interposed vehicle** in relation to a product or investment option if:
- (a) the Product Disclosure Statement for the product or investment option or any other information issued by the responsible person relating to the product or investment option that has been given or may be reasonably expected to be given to retail clients refers to the product or option as being directly or indirectly invested in or through an entity (whether specified or not) other than an infrastructure entity which the responsible person believes has a majority of its assets invested in physical infrastructure referred to in paragraphs (a) to (j) of the definition of **infrastructure entity** in subclause (6); and
 - (b) the reference relates to the entity.
- (4D) An entity is not an **interposed vehicle** because of subclause (4C) if:
- (a) either of the following is satisfied:
 - (i) the entity is admitted to the official list of a prescribed financial market or a financial market operated outside of this jurisdiction that is regulated by a foreign government or an agency of a foreign government;
 - (ii) the issuer of the securities or financial products of the entity has applied, or stated in a regulated disclosure that they will apply, for such admission; and
 - (b) the securities or financial products of the entity are, or are to be, held under an investment strategy for the product or investment option that:

(B) that represent at least 80% by value of the net assets attributable to the investment strategy; and

(c) the value of all the securities or financial products of the entity that are in the same class as the securities or financial products held under the investment strategy does not exceed 30% of the value of the reference index.

Note: If paragraphs (a) to (c) are satisfied in relation to an entity, the entity may still be an *interposed vehicle* because of provisions of clause 101B other than subclause (4C).

(5) Despite anything in subclauses (1) to (4D), an entity will not be an *interposed vehicle* in relation to a product or investment option if all of the following apply:

(a) the Product Disclosure Statement for the product or an investment option states that a holder of the product may give instructions, directions or requests for financial products to be acquired;

(b) the responsible person for the Product Disclosure Statement has published a list of financial products in relation to which the instructions, directions or requests may be given that includes a security or interest in the entity;

(1) *Superannuation products*

DID YOU KNOW?

Small differences in both investment performance and fees and costs can have a substantial impact on your long term returns.

For example, total annual fees and costs of 2% of your account balance rather than 1% could reduce your final return by up to 20% over a 30 year period (for example reduce it from \$100 000 to \$80 000).

You should consider whether features such as superior investment performance or the provision of better member services justify higher fees and costs.

You or your employer, as applicable, may be able to negotiate to pay lower fees. Ask the fund or your financial adviser.

If you would like to find out more, or see the impact of the fees based on your own circumstances, the **Australian Securities and Investments Commission (ASIC)** website (www.moneySMART.gov.au) has a superannuation calculator to help you check out different fee options.
