| 7(2)    | Replace the existing definition in subsection 7(2) with the following:  
For the purposes of this Statement of Principles, osteoarthritis:  
(a) means a degenerative joint disorder with:  
   (i) clinical manifestations of pain, impaired function and stiffness; and  
   (ii) osteophytes or loss of articular cartilage; and  
(b) excludes acute articular cartilage tear and osteochondritis dissecans.  
Note 1: Other commonly associated features are sclerosis of the underlying bone, inflammation of the synovium and, for osteoarthritis in the knee, degenerative tears of the menisci and, for osteoarthritis in the hip or shoulder, degenerative tears of the labrum.  
Note 2: The osteophytes or loss of articular cartilage may be assessed by radiological, other imaging or arthroscopic investigations. |
