These Regulations commence on 1 July 2000.

3 Interpretation

(1) In these Regulations:

metropolitan area means an area that:

- (b) is specified in the table in regulation 4.

non-metropolitan area means an area of land that does not include:

- (a) a metropolitan area or a part of a metropolitan area; or

remote area means an area of land that has an ARIA score that is greater than 5.8.

Note 1 ARIA is a publication of the National Key Centre for Social Applications of Geographical Information Systems of the University of Adelaide. It is an Occasional Paper in New Series No. 6 published by that University.

Note 2 ARIA produces scores that vary from zero (high accessibility) to 12 (high remoteness).

(3) A location that abuts a road (or the road reserve) the centre line of which is the boundary between a metropolitan area and a non-metropolitan area is taken to be in the non-metropolitan area.

- (4) A location that abuts a road (or the road reserve) the centre line of which is the boundary between a non-metropolitan area and a remote area is taken to be in the remote area.

4 Urban centres/localities

For the purposes of the definition of *metropolitan area* in subregulation 3 (1), the following areas listed as urban centres/localities in the *Statistical Geography: Volume 3 — Australian Standard Geographical Classification (ASGC) Urban Centres/Localities* (published by the Australian Bureau of Statistics), as in force on 30 June 2000, are specified:
