 - (b) if the entitlement is in respect of an accumulation interest (other than a partially vested accumulation interest or an interest in a self managed superannuation fund)—the amount in relation to the interest at the termination time that a court would determine in accordance with regulation 28 and subregulation 31(2A), multiplied by the specified percentage, less the amount of any fees payable by the non-member spouse under regulation 59; or
 - (c) if the entitlement is in respect of an interest in a self managed superannuation fund—the value of the interest at the termination time, determined by the method that the court would consider appropriate if it were determining the value of the interest under paragraph 90MT(2)(b) of the Act, multiplied by the specified percentage, less the amount of any fees payable by the non-member spouse under regulation 59.

28 Method for determining amount in relation to a superannuation interest—general

- (1) The method for determining an amount in relation to the superannuation interest at the relevant date is as follows:

Step 1	Determine the gross value of the superannuation interest at the relevant date.
Step 2	Deduct from the amount determined under Step 1 any amount payable under a payment split that applies to a splittable payment in respect of the superannuation interest and has an operative time that is before the relevant date.
Step 3	Deduct from the amount determined under Step 2: <ul style="list-style-type: none">(a) if the superannuation interest is a defined benefit interest in a superannuation fund that is not a constitutionally protected fund—the amount (if any) of any surcharge debt of the member spouse as stated in the most recent member information statement provided by the fund to the member spouse before the relevant date; or(b) if the superannuation interest is in a superannuation fund that is a constitutionally protected fund—the amount (if any) stated in the surcharge debt account maintained for the member spouse by the Commissioner of Taxation at the relevant date.
The resulting amount is the amount in relation to the superannuation interest at the relevant date.	

- (2) For Step 1 of the table in subregulation (1), the gross value of the superannuation interest at the relevant date is the gross value of the interest as determined in accordance with the regulation in this Division that applies to the interest.

29 Method for determining gross value—defined benefit interest

- (1) If the whole of the superannuation interest is a defined benefit interest, the gross value at the relevant date of the interest is to be determined in accordance with this regulation.
- (2) If:
 - (a) under regulation 38, the Minister has approved a method or factors to be used to determine the gross value of the interest; and
 - (b) evidence is before the court in the relevant proceeding of the contents of a statement issued by the trustee of the plan in which the interest is held, being a statement that states the gross value of the interest determined in accordance with the approved method or factors;the gross value of the interest at the relevant date is the value of the interest stated in the statement.
- (3) If:
 - (a) the Minister has not approved, under regulation 38, a method or factors to be used to determine the gross value of the interest; and
 - (b) evidence is before the court in the relevant proceeding of the contents of a statement issued by the trustee of the plan in which the interest is held, being a statement that states the value of the interest determined in accordance with the method set out in Schedule 2;the gross value of the interest at the relevant date is the value of the interest stated in the statement.
- (4) If no evidence is before the court in the relevant proceeding of the contents of a statement mentioned in paragraph (2)(b) or (3)(b), the gross value at the relevant date of the interest is to be determined using:
 - (a) if, under regulation 38, the Minister has approved a method or factors to be used to determine the gross value of the interest—the approved method or factors; or
 - (b) in any other case—the method set out in Schedule 2.

30 Approval of retirement age

- (1) For the purpose of determining the gross value of a defined benefit interest in accordance with the method set out in Schedule 2 or a method approved under regulation 38, the Minister may approve, in writing, as the retirement age for all members of the eligible superannuation plan in which the interest is held, or an identifiable class of members of the plan, an age other than:
 - (a) the retirement age specified in the governing rules of the plan; or
 - (b) the age of 65 years.
- (2) An approval by the Minister under subregulation (1) is a legislative instrument.

Regulation 31

31 Method for determining gross value—accumulation interest (other than a partially vested accumulation interest)

- (1) If the whole of the superannuation interest is an accumulation interest (other than a partially vested accumulation interest), the gross value at the relevant date of the interest is to be determined in accordance with this regulation.

- (2) Subject to subregulation (2B), if:

- (a) a member information statement stating the value of the interest at the relevant date has been provided to the member spouse; and
- (b) evidence of the contents of the statement is before the court in the relevant proceeding;

the gross value at the relevant date of the interest is the value of the interest stated in the statement.

- (2A) If:

- (a) a statement has been issued by the trustee of the plan in which the interest is held, being a statement that states the value of the benefits (before any taxes or other charges have been deducted) that would have been payable in respect of the interest at the relevant date if the member spouse had voluntarily ceased to be a member of the plan on that date; and
- (b) evidence of the contents of the statement is before the court in the relevant proceeding;

the gross value at the relevant date of the interest is the value of the interest stated in the statement.

- (2B) If:

- (a) evidence of the contents of a member information statement mentioned in subregulation (2) and a statement of the kind mentioned in subregulation (2A) is before the court in the relevant proceeding; and

the gross value at the relevant date of the interest is the value of the interest stated in the statement mentioned in subregulation (2A).

- (3) If subregulation (2) or (2A) does not apply, the gross value of the interest at the relevant date is:

$$V1 + \frac{(V2 - V1) \times X}{D}$$

where:

V1 is the sum of:

- (a) the value of the interest at the first valuation date; and
- (b) the value of any benefits rolled over, or transferred, by the member spouse to the plan in which the interest is held (other than regular contributions made by or for the member spouse to the plan) in the period between the first valuation date and the relevant date (excluding both those dates), less

the value of any partial payment of benefits to the member made in that period.

V2 is the sum of:

- (a) the value of the interest at the second valuation date; and
- (b) the value of any partial payment of benefits made to the member in the period beginning on the day after the relevant date and ending at the end of the second valuation date, less the value of any benefits rolled over, or transferred, by the member spouse to the plan in which the interest is held (other than regular contributions made by or for the member spouse to the plan), and any interest earned on those benefits, in that period.

X is the number of days in the period between the first valuation date and the relevant date (excluding both those dates).

D is the number of days in the period beginning on the day after the first valuation date and ending at the end of the second valuation date.

- (4) For the purpose of determining the gross value of a member spouse's interest at the relevant date under subregulation (3):
 - (a) if, in relation to the interest, evidence of the contents of one member information statement only is before the court in the relevant proceeding, and the relevant date is after the valuation date stated in that statement:

 - (iv) the **value of the interest at the second valuation date** is the value of the interest at that date; and
 - (b) if, in relation to the interest, evidence of the contents of 2 member information statements is before the court in the relevant proceeding, and the relevant date is between the valuation date stated in one of those statements (the **first statement**) and the valuation date stated in the other statement (the **second statement**):
 - (i) the **first valuation date** is the valuation date stated in the first statement; and
 - (ii) the **value of the interest at the first valuation date** is the value of the interest stated in the first statement; and
 - (iii) the **second valuation date** is the valuation date stated in the second statement; and
 - (iv) the **value of the interest at the second valuation date** is the value of the interest stated in the second statement; and
 - (c) if, in relation to the interest, evidence of the contents of one member information statement only is before the court in the relevant proceeding, and the relevant date is before the valuation date stated in that statement:

Regulation 32

- (4B) For this regulation, a reference to the value of the interest stated in a statement:
- (a) is a reference to the value stated in the statement, however that value is described (for example, the member's account balance, share in the plan, withdrawal benefit); and
 - (b) if 2 or more values are stated in the statement, is taken to be a reference to the value of the benefits (before any taxes or other charges have been deducted) that would have been payable in respect of the interest if the member spouse had voluntarily ceased to be a member of the plan at the date at which the value is stated.
- (5) In this regulation:
- valuation date**, in relation to a superannuation interest to which a member information statement applies, means the date as at which the value of the interest is stated in the statement.

32 Method for determining gross value—partially vested accumulation interest

- (1) If the whole of the superannuation interest is a partially vested accumulation interest, the gross value at the relevant date of the interest is to be determined in accordance with this regulation.
 - (2) If:
-

- (a) under regulation 38, the Minister has approved a method or factors to be used to determine the gross value of the interest; and
 - (b) evidence is before the court in the relevant proceeding of the contents of a statement issued by the trustee of the plan in which the interest is held, being a statement that states the gross value of the interest determined in accordance with the approved method or factors;
- the gross value of the interest at the relevant date is the value of the interest stated in the statement.
- (3) If:
- (a) the Minister has not approved, under regulation 38, a method or factors to be used to determine the gross value of the interest; and
 - (b) evidence is before the court in the relevant proceeding of the contents of a statement issued by the trustee of the plan in which the interest is held, being a statement that states the value of the interest determined in accordance with the method set out in Schedule 3;
- the gross value of the interest at the relevant date is the value of the interest stated in the statement.
- (4) If no evidence is before the court in the relevant proceeding of the contents of a statement mentioned in paragraph (2)(b) or (3)(b), the gross value at the relevant date of the interest is to be determined using:
- (a) if, under regulation 38, the Minister has approved a method or factors to be used to determine the gross value of the interest—the approved method or factors; or
 - (b) in any other case—the method set out in Schedule 3.

33 Method for determining gross value—combination of defined benefit interest and accumulation interest

- (1) Subject to subregulation (2), if the superannuation interest is made up of a component that is a defined benefit interest and a component that is an accumulation interest (other than a partially vested accumulation interest), the gross value at the relevant date of the interest is to be determined by adding:
- (a) the gross value at the relevant date of the defined benefit interest, determined in accordance with the method set out in regulation 29; and
 - (b) the gross value at the relevant date of the accumulation interest, determined in accordance with the method set out in regulation 31.
- (2) This regulation does not apply to a superannuation interest in relation to which a method or factor has been approved in an instrument made under regulation 38 after the commencement of this subregulation.

34 Method for determining gross value—combination of defined benefit interest and partially vested accumulation interest

- (1) Subject to subregulation (2), if the superannuation interest is made up of a component that is a defined benefit interest and a component that is a partially

Regulation 35

vested accumulation interest, the gross value at the relevant date of the interest is to be determined by adding:

- (a) the gross value at the relevant date of the defined benefit interest, determined in accordance with the method set out in regulation 29; and
 - (b) the gross value at the relevant date of the partially vested accumulation interest, determined in accordance with the method set out in regulation 32.

35 Method for determining gross value—interest that is the greater of a defined benefit interest and an accumulation interest

If the superannuation interest is the greater of a defined benefit interest and an accumulation interest (other than a partially vested accumulation interest), the gross value at the relevant date of the interest is to be determined to be the greater of:

- (a) the gross value at the relevant date of the defined benefit interest, determined in accordance with the method set out in regulation 29; and
- (b) the gross value at the relevant date of the accumulation interest, determined in accordance with the method set out in regulation 31.

36 Method for determining gross value—interest that is the lesser of a defined benefit interest and an accumulation interest

If the superannuation interest is the lesser of a defined benefit interest and an accumulation interest (other than a partially vested accumulation interest), the gross value at the relevant date of the interest is to be determined to be the lesser of:

- (a) the gross value at the relevant date of the defined benefit interest, determined in accordance with the method set out in regulation 29; and
- (b) the gross value at the relevant date of the accumulation interest, determined in accordance with the method set out in regulation 31.

- (1) If the superannuation interest is a defined benefit interest the benefit in respect of which is, under the governing rules of the eligible superannuation plan in which the interest is held, the amount of a defined benefit less any other amount (other than an amount of superannuation contributions surcharge that the trustee is liable to pay in respect of the interest), the gross value at the relevant date of the interest is to be determined as the difference between:
- (a) the gross value at the relevant date of the defined benefit interest, determined in accordance with the method set out in regulation 29; and
 - (b) the value at the relevant date of the other amount.
- (2) For the purpose of determining the value at the relevant date of the other amount under paragraph (1)(b), if:

- (a) the other amount is in respect of a superannuation interest; and
- (b) this Division provides a method for determining an amount in relation to that kind of interest;

the value at the relevant date of the other amount is to be determined in accordance with that method.

38 Approval of methods and factors for determining gross value of particular superannuation interests

- (1) The Minister may approve, in writing, for the purposes of this regulation, methods or factors that are to be used to determine the gross value of any of the following:
 - (a) a superannuation interest the whole of which is a defined benefit interest;

 - (d) the gross value, in particular circumstances, of a particular component of a superannuation interest in a particular eligible superannuation plan.
- (3) An approval by the Minister under subregulation (1) is a legislative instrument.
- (4) An approval made under this regulation before the commencement of this subregulation has effect as if it had been made under this regulation as in force at the commencement of this subregulation.

Note: If, under this regulation, the Minister approves a method or factors to be used to determine the gross value of a superannuation interest, the approved method or factors are to be used to determine the gross value of the interest instead of the method set out in these Regulations.

Division 5.2—Superannuation interest in payment phase at relevant date

39 Application of Division 5.2 (Act s 90MT)

For paragraph 90MT(2)(a) of the Act and paragraph 22(1)(b) of these Regulations, this Division sets out the method for determining an amount in relation to a superannuation interest of a member spouse at the relevant date if the interest:

- (a) is not a percentage-only interest; and
- (b) is in the payment phase at the relevant date.

Note: This Division does not apply to a superannuation interest of a kind mentioned in subregulation 22(2).

40 Method for determining amount in relation to a superannuation interest—general

- (1) The method for determining an amount in relation to the superannuation interest at the relevant date is as follows:

Step 1	Determine the gross value of the superannuation interest at the relevant date.
Step 2	Deduct from the amount determined under Step 1 any amount payable under a payment split that applies to a splittable payment in respect of the superannuation interest and has an operative time that is before the relevant date.
The resulting amount is the amount in relation to the superannuation interest at the relevant date.	

- (2) For Step 1 of the table in subregulation (1), the gross value of the superannuation interest at the relevant date is the gross value of the interest as determined in accordance with the regulation in this Division that applies to the interest.

41 Method for determining gross value—benefits payable only as one or more lump sums

If the whole, or the remaining part, of the benefits in respect of the superannuation interest is payable only as one or more lump sums, the gross value at the relevant date of the interest is to be the withdrawal benefit in relation to the member spouse at that date.

42 Method for determining gross value—benefits paid as pension

- (1) This regulation applies to the superannuation interest if the benefits in respect of the interest are being paid as a pension at the relevant date.
- (2) If the pension is payable for the life of the member spouse, the gross value of the superannuation interest at the relevant date is to be determined using:

- (a) if, under regulation 43A, the Minister has approved a method or factors to be used to determine the gross value of the interest—the approved method or factors; or
 - (b) in any other case—the method set out in Schedule 4.
- (3) If the pension is payable for a fixed term only and the pension is not a market linked pension, the gross value of the superannuation interest at the relevant date is to be determined using the method set out in Schedule 5.
- (4) If the pension is an allocated pension, the gross value of the superannuation interest at the relevant date is to be the withdrawal benefit in relation to the member spouse at that date.
- (5) If the pension is a market linked pension, the gross value of the superannuation interest at the relevant date is the market linked pension account balance at that date.

43 Method for determining gross value—benefits paid as pension and lump sum also payable

- (1) This regulation applies to the superannuation interest if:
 - (a) part of the benefits in respect of the interest is being paid as a pension at the relevant date; and
 - (b) the remaining part of the benefits is payable as a lump sum (whether at the relevant date or at any time after that date) that is not a commutation of the pension.
- (2) If the lump sum is payable at the relevant date, the gross value of the superannuation interest at the relevant date is to be determined by adding:
 - (a) the gross value of the pension, determined using the relevant method set out in regulation 42; and
 - (b) the amount of the lump sum.
- (3) If the lump sum is payable at any time after the relevant date, the gross value of the superannuation interest at the relevant date is to be determined using the method set out in Schedule 6.

43A Approval of methods and factors for determining gross value of superannuation interest being paid as a life pension

- (1) The Minister may approve, in writing, for the purposes of this regulation, methods or factors that are to be used to determine the gross value of a superannuation interest the benefits in respect of which are being paid as a pension that is payable for the life of the member spouse.
- (2) An approval by the Minister under subregulation (1) is a legislative instrument.

Note: If the Minister approves a method or factors to be used to determine the gross value of a superannuation interest, the approved method or factors are to be used to determine the gross value of the interest instead of the method set out in Schedule 4 to these Regulations—see subregulation 42(2).

Part 6—Entitlement of non-member spouse in respect of certain superannuation interests

- (1) For the purpose of calculating:
 - (a) the amount (if any) that the non-member spouse is entitled to be paid in respect of a splittable payment that becomes payable in respect of a superannuation interest in the growth phase that is subject to a payment split; or
 - (b) the value of the non-member spouse's entitlement under a superannuation agreement, flag lifting agreement or splitting order in respect of a superannuation interest in the growth phase;the base amount allocated to the non-member spouse in relation to the interest must be adjusted by the trustee of the eligible superannuation plan in which the interest is held for each adjustment period applicable to the interest under this Division.
- (2) After each applicable adjustment period, the trustee must, if necessary, adjust the base amount in accordance with the rate of interest that applied to the superannuation interest in that adjustment period under regulation 45D.

Note: Depending on the rate of interest that applied to the superannuation interest in an adjustment period, the base amount may be adjusted by a positive amount or a negative amount or, if the rate was nil, not adjusted.
- (3) For this regulation, a superannuation interest is in the growth phase if:
 - (a) in the case of an interest that is identified in a superannuation agreement or flag lifting agreement—the interest was in the growth phase at the date when the agreement was served on the trustee under section 90MI of the Act; and

- (1) If the whole of a superannuation interest is an accumulation interest in a regulated superannuation fund (other than a self managed superannuation fund), an approved deposit fund or an RSA, the applicable adjustment periods for the interest are:
- (a) if a splittable payment becomes payable, or a terminating action occurs, in respect of the interest before the end of the first allotment period—the period beginning at the operative time and ending at the end of the period for which the plan would allot net earnings to the member spouse if he or she voluntarily ceased to be a member of the plan on the day when the splittable payment becomes payable or the terminating action occurs; and
 - (b) in any other case, the following periods:
 - (i) the period beginning at the operative time and ending at the end of the first allotment period;

45D Interest rates for adjustment of base amount

- (1) The rate of interest that applies to a superannuation interest in an adjustment period is the interest rate that applies to the interest for the adjustment period under this regulation.
- (2) If the whole of the superannuation interest is an accumulation interest (other than an interest in a self managed superannuation fund), the interest rate for the adjustment period is:
 - (a) for an interest in a regulated superannuation fund, an approved deposit fund or an RSA:
 - (i) the rate of any allotment (being the allotment of a positive amount, a nil amount or a negative amount) to the member spouse of net

- (3) If:
- (a) the whole, or any component, of the superannuation interest is a defined benefit interest, or the superannuation interest is in a self managed superannuation fund; and
 - (b) the adjustment period is a financial year;

- (b) under regulation 38, the Minister has approved a method or factors to be used to determine the gross value of the superannuation interest or the component of the interest;

the Minister may, by written determination, provide either or both of the following:

- (c) that the trustee is not required to provide the information about the interest, or the component of the interest, mentioned in one or more paragraphs of subregulation (4A);
- (d) that the trustee must provide other information, as specified in the determination, about the interest or the component of the interest.

(6B) If, under regulation 43A, the Minister has approved a method or factors to be used to determine the gross value of the superannuation interest, the Minister may, by written determination, provide either or both of the following:

- (a) that the trustee is not required to provide the information about the interest mentioned in one or more paragraphs of subregulations (2) and (3);
- (b) that the trustee must provide other information, as specified in the determination, about the interest.

(6C) A determination by the Minister under subregulation (6A) or (6B) is a legislative instrument.

(7) For this regulation, a reference to the value of the interest stated in a statement:

- (a) is a reference to the value stated in the statement, however that value is described (for example, the member's account balance, share in the plan, withdrawal benefit); and
- (b) if 2 or more values are stated in the statement, is taken to be a reference to the value of the benefits (before any taxes or other charges have been deducted) that would have been payable in respect of the interest if the member spouse had voluntarily ceased to be a member of the plan at the date at which the value is stated.

(8) In this regulation:

Regulation 63A

total member credit, in relation to a superannuation interest of a member and a date, means the total amount that would be standing to the credit of the member in respect of the interest if the benefit in respect of the interest were fully vested at that date.

valuation date, in relation to a superannuation interest to which a member information statement applies, means the date as at which the value of the interest, or the total member credit, is stated in the statement.

63A Giving valuation information—partially vested accumulation interest (Act s 90MZB)

- (1) If an application for information under section 90MZB of the Act specifically requested the trustee to provide the information mentioned in paragraph 63(4A)(aa) and the trustee, in response to that application:
 - (a) provided the gross value of the partially vested accumulation interest at the appropriate date, determined in accordance with a method or factors approved by the Minister under regulation 38; but
 - (b) has not provided sufficient information to enable the applicant to check whether that gross value of the interest has been correctly determined in accordance with the approved method or factors;

the applicant may make an application for information that will enable the applicant do so.

Note: This subregulation applies on or after 1 July 2007 to an interest if a determination has not been made under subregulation 63(6A) requiring the trustee to give information, not otherwise required under subregulation 63(4A), which would enable the applicant to check if the gross value of the interest was correctly determined.

- (2) The trustee must, within a reasonable time after receiving the later application, provide the information requested by the applicant in a document that is addressed to the applicant.
- (3) Subregulation 68B(2) applies to information that is provided by the trustee to the applicant under this regulation.

Regulation 64A

- (c) in relation to the gross value of a superannuation interest at the appropriate date, determined in accordance with a method or factors approved by the Minister under regulation 38:
 - (i) if a determination under subregulation 64(7), (7AA), (7A) or (7B) is in effect in relation to the interest—information required to be provided under the determination; or
 - (ii) in any other case—information that will enable the applicant to check whether the gross value of the interest has been correctly determined in accordance with the approved method or factors.
- (2) If, before 1 July 2007, an application for information under section 90MZB of the Act specifically requested the trustee to provide the information mentioned in paragraph 64(4)(p) and, in response to that application:
 - (a) the trustee provided the gross value of the superannuation interest at the appropriate date, determined in accordance with Schedule 2, but did not provide all of the information mentioned in paragraphs 64(4)(a) to (i); or
 - (b) the trustee provided the gross value of the superannuation interest at the appropriate date, determined in accordance with a method or factors approved by the Minister under regulation 38, but has not provided sufficient information to enable the applicant to check whether that gross value has been correctly determined in accordance with the approved method or factors;

the applicant may make an application for specific underlying valuation information.

- (3) If, on or after 1 July 2007, an application for information under section 90MZB of the Act specifically requested the trustee to provide the information mentioned in paragraph 64(3)(g) and the trustee, in response to that application:
 - (a) provided the gross value of the defined benefit interest at the appropriate date, determined in accordance with a method or factors approved by the Minister under regulation 43A; but
 - (b) has not provided sufficient information to enable the applicant to check whether that gross value of the interest has been correctly determined in accordance with the approved method or factors;

the applicant may make an application for specific underlying valuation information.

- (4) If, on or after 1 July 2007, an application for information under section 90MZB of the Act specifically requested the trustee to provide the information mentioned in paragraph 64(4)(p) and the trustee, in response to that application:
 - (a) provided the gross value of the defined benefit interest at the appropriate date, determined in accordance with a method or factors approved by the Minister under regulation 38; but
 - (b) has not provided sufficient information to enable the applicant to check whether that gross value of the interest has been correctly determined in accordance with the approved method or factors;

the applicant may make an application for specific underlying valuation information.

- (5) Subject to subregulation (6), the trustee must, within a reasonable time after receiving the later application, provide the underlying valuation information requested by the applicant in a document that is addressed to the applicant.
- (6) The trustee is not required to provide to the applicant underlying valuation information of the kind mentioned in paragraph 64(4)(b) or (c) unless a record of that information is in the trustee's possession, power or control.
- (7) Subregulation 68B(2) applies to information that is provided by the trustee to the applicant under this regulation.

65 Information about certain defined benefit interests—meaning of *accrued benefit multiple*

- (1) For paragraph 64(4)(b), the ***accrued benefit multiple*** for a lump sum, or pension, payable in respect of a superannuation interest of a member in an eligible superannuation plan is the accrued benefit multiple that applies under this regulation.
- (2) If an accrued benefit multiple is defined under the governing rules of the eligible superannuation plan in which the defined benefit interest is held, the accrued benefit multiple is the multiple as defined.
- (3) If an accrued benefit multiple is not defined under the governing rules of the eligible superannuation plan in which the defined benefit interest is held, but a multiple is, under the governing rules of the plan, used to define the benefit payable to the member at the appropriate date, the accrued benefit multiple is that multiple.
- (4) If:
 - (a) an accrued benefit multiple is not defined under the governing rules of the eligible superannuation plan in which the defined benefit interest is held; and
 - (b) the benefit in respect of the interest is payable as a lump sum; and
 - (c) subregulation (3) does not apply in respect of the interest;the accrued benefit multiple is:

$$\frac{LSM \times T_1}{T_2}$$

where:

LSM is the multiple that will be applied to the member's salary figure at the member's earliest retirement date to calculate the lump sum retirement benefit that will be payable to the member at that date.

T₁ is the period beginning on the date when the member acquired the defined benefit interest and ending at the end of the day before the appropriate date.

Regulation 65

T_2 is the period beginning on the date when the member acquired the defined benefit interest and ending at the end of the day before the member's earliest retirement date.

(5) If:

- (a) an accrued benefit multiple is not defined under the governing rules of the eligible superannuation plan in which the defined benefit interest is held; and
- (b) the benefit in respect of the interest is payable as a pension; and
- (c) subregulation (3) does not apply in respect of the interest;

the accrued benefit multiple is:

$$\frac{PM \times T_1}{T_2}$$

where:

PM is the multiple that will be applied to the member's salary figure at the member's earliest retirement date to calculate the pension benefit that will be payable to the member at that date.

T_1 is the period beginning on the date when the member acquired the defined benefit interest and ending at the end of the day before the appropriate date.

T_2 is the period beginning on the date when the member acquired the defined benefit interest and ending at the end of the day before the member's earliest retirement date.

(6) For the purpose of calculating the accrued benefit multiple in respect of a defined benefit interest of a member of an eligible superannuation plan under subregulation (4) or (5), if the member's benefit in respect of the interest will, under the governing rules of the plan, depend on the amount of contributions made by the member to the plan and no particular rate of contributions is required under the governing rules of plan, it is to be assumed that:

- (a) the member has contributed to the plan at the rate that, under the governing rules of the plan, is the standard rate of contributions, unless the member has exercised any election under those rules to contribute at a different rate; or
- (b) if, under the governing rules of the plan, a range of contribution rates is available to the member, the member has contributed to the plan at the mid-point of that range, unless the member has exercised any election under the governing rules of the plan to contribute at a different rate.

(6A) For the definitions of the factors T_1 and T_2 in subregulations (4) and (5), a defined benefit interest of a member of an eligible superannuation plan is acquired on the earlier of:

- (a) the date when the member first became a member of the plan; and
- (b) the date when a benefit began to accrue to the member in respect of the interest.

(7) In this regulation:

member's earliest retirement date, for a member of an eligible superannuation plan, means the first date when the member could retire and become eligible, under the governing rules of the plan, to be paid a retirement benefit in respect of the member's superannuation interest in the plan.

66 Information about certain percentage-only interests (Act s 90MZB)

- (1) This regulation applies in relation to a superannuation interest of a member of an eligible superannuation plan if:
- (a) the interest is a percentage-only interest; and
 - (b) the interest is not an interest in a self managed superannuation fund; and
 - (c) regulation 68A does not apply in relation to the interest.
- (2) For subsection 90MZB(3) of the Act and subject to subregulation (6), the information about the superannuation interest that must be provided to an applicant by the trustee of the plan is as follows:
- (aa) if the interest is an unsplitable interest, a statement to that effect;
 - (a) a statement indicating whether the interest is subject to a payment split or payment flag and, if the interest is subject to a payment split (other than under a superannuation agreement, flag lifting agreement or splitting order in relation to which the non-member spouse's entitlement has been satisfied as required by Division 2.2), the information mentioned in subregulation (5);
 - (b) the date of commencement of the member's service period, within the meaning of subsection 995-1(1) of the *Income Tax Assessment Act 1997*;
 - (c) the date when the member first became a member of the plan;
 - (d) if the interest was in the payment phase at the appropriate date and the member is receiving ongoing pension payments—the payment phase information in relation to the interest mentioned in subregulation (3);
 - (da) if the interest is in a superannuation annuity and was in the payment phase at the appropriate date, and the member is receiving ongoing payments of benefits (***ongoing benefits***) under the annuity—the payment phase information in relation to the interest mentioned in subregulation (3A);
 - (e) if the interest (other than an interest in a deferred annuity) was in the growth phase at the appropriate date—the growth phase information in relation to the interest mentioned in subregulation (4);
 - (eaa) if the interest is in a deferred annuity and was in the growth phase at the appropriate date—the growth phase information in relation to the interest mentioned in subregulation (4A);
 - (ea) if the application for information specifically requests the trustee to provide information about the withdrawal benefit in relation to the member—the withdrawal benefit in relation to the member at the date when the information is provided;

Note: If an application for information specifically requests the information mentioned in paragraph (ea) to be provided, the trustee is required to provide only the information mentioned in that paragraph and paragraphs (4)(d) and (e) to the applicant, and is not

Regulation 66

required to provide any other information to the applicant under this regulation—see paragraph (6)(a).

Part 1—Preliminary

1 Application of Schedule 1A

This Schedule sets out the method for working out the value at a particular time of a non-member spouse's entitlement for a percentage-only interest in a superannuation fund or an approved deposit fund in the payment phase.

2 Definitions

In this Schedule:

accrued benefit multiple at payment means the member spouse's accrued benefit multiple, as defined in the governing rules of the eligible superannuation plan in which the superannuation interest is held, at the date when the new interest is created, or the amount is transferred or rolled over or paid to the non-member spouse, or a separate entitlement for the non-member spouse arose.

accrued benefit multiple at separation means the member spouse's accrued benefit multiple, as defined in the governing rules of the eligible superannuation plan in which the superannuation interest is held, at the date when the member spouse and non-member spouse separated or, if there have been 2 or more separations, at the date of the most recent separation.

F means the amount of any fees payable by the non-member spouse under regulation 59.

m means the number of completed months of the member spouse's age that are not included in the completed years at the date mentioned in the definition of the factor R_y .

OB means the amount of the other benefit payable to the member spouse in relation to the interest multiplied by the relevant discount valuation factor that applies under clause 4 of Schedule 6.

P_{y+m} means the pension valuation factor under Schedule 4 that applies to the particular pension payable to the member spouse at the member spouse's age at the date when the new interest is created, or the amount is transferred or rolled over or paid to the non-member spouse, or a separate entitlement for the non-member spouse arose.

r means:

- (a) if there is a surviving spouse of the member spouse—the reversionary percentage that would be payable to the surviving spouse if the member spouse had died on the day when the new interest is created, or the amount is transferred or rolled over or paid to the non-member spouse, or a separate entitlement for the non-member spouse arose; and
- (b) in any other case—zero.

R_y means the reversion valuation factor mentioned in clause 5 of this Schedule that applies to the pension and the member spouse's age in completed years at the date when the new interest is created, or the amount is transferred or rolled over or paid to the non-member spouse, or a separate entitlement for the non-member spouse arose.

R_{y+1} means the reversion valuation factor mentioned in clause 5 of this Schedule that applies to the pension and the member spouse's age at the completion of the next year after the year mentioned in the definition of the factor R_y .

X means the percentage specified in the relevant superannuation agreement, flag lifting agreement or splitting order.

YP means the amount of pension payable each year to the member spouse.

Part 2—Method for subparagraph 90MJ(1)(b)(i) and paragraph 90MT(1)(c) of the Act

3 Method for subparagraph 90MJ(1)(b)(i) and paragraph 90MT(1)(c) of the Act

- (1) If no benefit other than a pension is payable to the member spouse in relation to the interest, the value at a particular time of the non-member spouse's entitlement in relation to the interest is:

$$\left\{ \left(\frac{\text{accrued benefit multiple at separation}}{\text{accrued benefit multiple at payment}} \right) \times X \times \left[YP \times (P_{y+m} + r \times R_{y+m}) \right] \right\} - F$$

- (2) If another benefit, in addition to a pension, is payable to the member spouse in relation to the interest, the value at a particular time of the non-member spouse's entitlement in relation to the interest is:

$$\left\{ \left(\frac{\text{accrued benefit multiple at separation}}{\text{accrued benefit multiple at payment}} \right) \times X \times \left[YP \times (P_{y+m} + r \times R_{y+m}) + OB \right] \right\} - F$$

- (3) For subclauses (1) and (2), the reversion valuation factor (R_{y+m}) at the particular time is:

$$\frac{[R_y \times (12 - m)] + (R_{y+1} \times m)}{12}$$

- (4) In applying the factor P_{y+m} in the formula in subclauses (1) and (2), a reference in Schedule 4 to 'the relevant date' is to be read as if it were a reference to 'the date when the new interest was created, or the amount was transferred or rolled over or paid to the non-member spouse, or a separate entitlement for the non-member spouse arose'.
- (5) In applying the factor **OB** in the formula in subclause (2):
- (a) a reference in clause 4 of Schedule 6 to 'the lump sum' or 'a lump sum' is to be read as if it were a reference to 'the other benefit payable to the member spouse in relation to the superannuation interest'; and
 - (b) the minimum deferral period, in relation to the other benefit payable to the member spouse in relation to the superannuation interest, is the minimum period of time until the other benefit is payable.

Part 3—Method for subparagraph 90MJ(1)(b)(ii) and paragraph 90MT(1)(b) of the Act

4 Method for subparagraph 90MJ(1)(b)(ii) and paragraph 90MT(1)(b) of the Act

- (1) If no benefit other than a pension is payable to the member spouse in relation to the interest, the value at a particular time of the non-member spouse's entitlement in relation to the interest is:

$$X \times \left[YP \times \left(P_{y+m} + r \times R_{y+m} \right) \right] - F$$

- (2) If another benefit, in addition to a pension, is payable to the member spouse in relation to the interest, the value at a particular time of the non-member spouse's entitlement in relation to the interest is:

$$X \times \left[YP \times \left(P_{y+m} + r \times R_{y+m} \right) + OB \right] - F$$

- (3) For subclauses (1) and (2), the reversion valuation factor (R_{y+m}) at the particular time is:

$$\frac{\left[R_y \times (12 - m) \right] + \left(R_{y+1} \times m \right)}{12}$$

- (4) In applying the factor P_{y+m} in the formula in subclauses (1) and (2), a reference in Schedule 4 to 'the relevant date' is to be read as if it were a reference to 'the date when the new interest was created, or the amount was transferred or rolled over or paid to the non-member spouse, or a separate entitlement for the non-member spouse arose'.

- (5) In applying the factor OB in the formula in subclause (2):

- (a) a reference in clause 4 of Schedule 6 to 'the lump sum' or 'a lump sum' is to be read as if it were a reference to 'the other benefit payable to the member spouse in relation to the superannuation interest'; and
- (b) the minimum deferral period, in relation to the other benefit payable to the member spouse in relation to the superannuation interest, is the minimum period of time until the other benefit is payable.

Part 4—Reversion valuation factors

5 Reversion valuation factors

- (1) The table in this clause sets out the reversion valuation factors.
- (2) The factors in columns 2 and 3 apply if the pension is indexed in accordance with the consumer price index.
- (3) The factors in columns 4 and 5 apply if the pension is indexed in accordance with a general wage index (for example, average weekly earnings, or average weekly ordinary time earnings, published by the Australian Bureau of Statistics).

Schedule 2—Method for determining gross value of defined benefit interest

(regulation 29)

Part 1—Preliminary

1 Application of Schedule 2

This Schedule sets out the method for determining the gross value, at the relevant date, of a defined benefit interest that is in the growth phase at that date.

2 Method

- (1) If the superannuation interest is held as a result of employment in which the member spouse is still engaged at the relevant date, the method is:
 - (a) if the benefit in respect of the interest is payable only as a lump sum—the method set out in Part 2 of this Schedule; and
 - (b) if the benefit in respect of the interest is payable only as a pension—the method set out in Part 3 of this Schedule; and
 - (c) if the benefit in respect of the interest is payable as a lump sum, a pension, or a combination of a lump sum and a pension—the method set out in Part 4 of this Schedule.
- (2) If the superannuation interest is held as a result of employment in which the member spouse is no longer engaged at the relevant date and, under the governing rules of the plan in which the interest is held, the benefit in respect of the interest is payable on or after the relevant date, the method is:
 - (a) if the benefit in respect of the interest is payable only as a lump sum—the method set out in Part 5 of this Schedule; and
 - (b) if the benefit in respect of the interest is payable only as a pension—the method set out in Part 6 of this Schedule; and
 - (c) if the benefit in respect of the interest is payable as a lump sum, a pension, or a combination of a lump sum and a pension—the method set out in Part 7 of this Schedule.
- (3) For the purposes of subclause (1) and (2), a member spouse is taken to be engaged in employment at the relevant date if, at that date, the member spouse is on paid or unpaid leave from, or for any reason suspended in relation to, that employment.

Part 2—Interest relating to current employment—benefit payable only as lump sum

3 Method

- (1) The method is:

$$A \times f_{y+m}$$

where:

A is the value of the lump sum benefit that has accrued in respect of the interest at the relevant date, being the product of the member spouse's accrued benefit multiple for a lump sum, as provided by the trustee under section 90MZB of the Act, and the salary figure on which benefits in respect of the interest, at that date, would be based, assuming that the member spouse were eligible to retire at that date.

f_{y+m} is the lump sum valuation factor calculated in accordance with subclause (2).

- (2) For subclause (1), the lump sum valuation factor (f_{y+m}) at the relevant date is calculated as follows:

$$\frac{(f_y \times (12 - m)) + (f_{y+1} \times m)}{12}$$

where:

f_y is the lump sum valuation factor mentioned in clause 4 of this Schedule that applies at the relevant date to the term remaining in complete years until the member spouse reaches the member's retirement age.

m is the number of complete months of the remaining term that are not included in the remaining complete years at the relevant date.

f_{y+1} is the lump sum valuation factor mentioned in clause 4 of this Schedule that would apply if the member spouse's term to retirement in complete years were one year more than the member spouse's term to retirement in complete years at the relevant date.

5 Method

- (1) The method is:

$$VN \times f_{y+m}$$

where:

VN is the lump sum value of the accrued pension benefit in respect of the interest at the member's retirement age, calculated in accordance with subclause (2).

f_{y+m} is the lump sum valuation factor calculated in accordance with subclause 3(2) of this Schedule.

- (2) For subclause (1), the lump sum value of the accrued pension benefit in respect of the interest at the member's retirement age (VN) is calculated as follows:

$$B \times (P_{ra} + (R_{sa} \times r))$$

where:

B is the value of the pension benefit that had accrued in respect of the interest at the relevant date, being the product of the member's accrued benefit multiple for a pension, as provided by the trustee under section 90MZB of the Act, and the salary figure on which benefits in respect of the interest, at that date, would be based, assuming that the member were eligible to retire at that date.

P_{ra} is the pension valuation factor mentioned in the relevant clause of this Part that applies to the pension and the member's retirement age.

R_{sa} is the reversion valuation factor mentioned in the relevant clause of this Part that applies to the pension and the member's age in completed years at the relevant date.

r is the proportion of payments in respect of the interest that a non-member spouse would receive as the reversionary beneficiary of the member, on the death of the member, as provided by the trustee under section 90MZB of the Act.

6 Valuation factors—no guarantee period—pension not indexed

The pension valuation factors and reversion valuation factors set out in this clause apply if the pension:

Part 4—Interest relating to current employment—benefit payable as combination of lump sum and pension

28 Method—no restriction on combination of lump sum and pension that may be taken

- (1) This clause applies if there is no provision in the eligible superannuation plan in which the interest is held restricting the proportion of the interest that may be taken as a lump sum or as a pension.

Note: The method is based on the assumption that 50% of the interest will be taken as a lump sum and 50% of the interest will be taken as a pension.

- (2) The method is:

$$\frac{PV_{ls} + PV_p}{2}$$

where:

PV_{ls} is the present value of the lump sum that would apply if the whole benefit were to be taken as a lump sum, calculated using the method set out in Part 2 of this Schedule.

PV_p is the present value of the pension that would apply if the whole benefit were to be taken as a pension, calculated using the method set out in Part 3 of this Schedule.

29 Method—restriction on proportion of pension that may be commuted to lump sum

- (1) This clause applies if:
- (a) the benefit in respect of the interest is payable as a pension; and
 - (b) the governing rules of the eligible superannuation plan in which the interest is held restrict the proportion of the pension that may be commuted to a lump sum.

- (2) The method is:

$$(Max_{ls\%} \times PV_{ls}) + ((1 - Max_{ls\%}) \times PV_p)$$

where:

$Max_{ls\%}$ is:

- (a) the maximum possible amount of pension that may be commuted to a lump sum, expressed as a percentage of the amount of the pension that would be payable if the whole benefit were to be taken as a pension; or
- (b) if the percentage calculated under paragraph (a) is greater than 50%—50%.

PV_{ls} is the present value of the lump sum that would apply if the whole benefit could, and were to, be taken as a lump sum, calculated using the method set out in Part 2 of this Schedule.

PV_p is the present value of the pension that would apply if the whole benefit were to be taken as a pension, calculated using the method set out in Part 3 of this Schedule.

29A Method—restriction on lump sum amount that may be converted to pension

- (1) This clause applies if:
 - (a) the benefit in respect of the interest is payable as a lump sum; and
 - (b) the governing rules of the eligible superannuation plan in which the interest is held restrict the amount of the lump sum that may be converted to a pension.
- (2) The method is:

$$\left((1 - \text{Max}_{p\%}) \times PV_{ls} \right) + \left(\text{Max}_{p\%} \times PV_p \right)$$

where:

$\text{Max}_{p\%}$ is:

- (a) the maximum possible amount of lump sum that may be converted to a pension expressed as a percentage of the amount of the lump sum that would be payable if the whole benefit were to be taken as a lump sum; or
- (b) if the percentage calculated under paragraph (a) is greater than 50%—50%.

PV_{ls} is the present value of the lump sum that would apply if the whole benefit were to be taken as a lump sum, calculated using the method set out in Part 2 of this Schedule.

PV_p is the present value of the pension that would apply if the whole benefit could, and were to, be taken as a pension, calculated using the method set out in Part 3 of this Schedule.

30 Conversion of accrued benefit multiple

- (1) For the purpose of calculating the value of PV_{ls} under subclause 28(2), 29(2) or 29A(2) of this Schedule, if the accrued benefit multiple provided by the trustee under section 90MZB of the Act is expressed as a pension multiple, the multiple must be converted to a lump sum multiple using the commutation factor provided by the trustee under that section.
- (2) For the purpose of calculating the value of PV_p under subclause 28(2), 29(2) or 29A(2) of this Schedule, if the accrued benefit multiple provided by the trustee under section 90MZB of the Act is expressed as a lump sum multiple, the multiple must be converted to a pension multiple using the conversion factor provided by the trustee under that section.

Part 5—Interest relating to former employment—benefit payable only as lump sum

31 Method—lump sum comprising different components

- (1) This clause applies if the lump sum payable in respect of the interest comprises a number of components, the value of which will increase by different rates over the minimum deferral period.
- (2) The gross value of the interest is the sum of the gross value of each component comprising the lump sum, calculated as follows:

$$DB \times D_{y+m}$$

where:

minimum deferral period, in relation to the benefit payable to the member spouse in respect of the interest, means the period until the earliest date at which the benefit may be paid (other than for death or disability).

nominal value, of a component of a lump sum payable in respect of a superannuation interest at a particular date, means the amount of the component payable (excluding any superannuation contributions surcharge payable in respect of the interest) if the member spouse were able to take, and did take, the benefit in respect of the interest at that date.

Schedule 3—Method for determining gross value of partially vested accumulation interest

(regulation 32)

1 Application of Schedule 3

This Schedule sets out the method for determining the gross value, at the relevant date, of a partially vested accumulation interest that is in the growth phase at that date.

2 Method

- (1) The method is:

$$V + ((A - V) \times f_{Y+m})$$

where:

V is the value, at the relevant date, of the actual vested benefit in respect of the interest, determined in accordance with clause 3.

A is the amount that would be the total amount standing to the credit of the member spouse in respect of the interest if the benefit in respect of the interest were fully vested at the relevant date, determined in accordance with clause 3A.

f_{y+m} is the vesting factor at the relevant date calculated in accordance with subclause (2).

- (2) For subclause (1), the vesting factor (f_{y+m}) at the relevant date is:

$$\frac{(f_y \times (12 - m)) + (f_{y+1} \times m)}{12}$$

where:

f_y is the vesting factor mentioned in clause 4 of this Schedule that applies to the relevant vesting period and the length of the member spouse's membership in the plan in completed years at the relevant date.

m is the number of completed months of the member spouse's membership in the plan at the relevant date that are not included in the completed years of membership at that date.

f_{y+1} is the vesting factor mentioned in clause 4 of this Schedule that would apply to the relevant vesting period if the member spouse's length of membership in the plan were one year more than the member spouse's length of membership in complete years at the relevant date.

 - (8) For this clause, a reference to the value of the interest stated in a statement:
 - (a) is a reference to the value stated in the statement, however that value is described (for example, the member's account balance, share in the plan, withdrawal benefit); and
 - (b) if 2 or more values are stated in the statement, is taken to be a reference to the value of the benefits (before any taxes or other charges have been deducted) that would have been payable in respect of the interest if the member spouse had voluntarily ceased to be a member of the plan at the date at which the value is stated.
 - (9) In this clause:

valuation date, in relation to a superannuation interest to which a member information statement, or similar statement, applies, means the date as at which the value of the interest is stated in the statement.

(2) For subclause (1), the pension valuation factor (**P_{y+m}**) at the relevant date is:

$$\frac{(P_y \times (12 - m)) + (P_{y+1} \times m)}{12}$$

where:

P_y is the pension valuation factor mentioned in the relevant clause of this Schedule that applies to the pension and the member spouse's age in completed years at the relevant date.

m is the number of completed months of the member spouse's age that are not included in the completed years at the relevant date.

P_{y+1} is the pension valuation factor mentioned in the relevant clause of this Schedule that applies to the pension and the member spouse's age at the

completion of the next year after the year mentioned in the definition of the factor P_y .

- (3) For subclause (1), the reversion valuation factor (R_{y+m}) at the relevant date is:

$$\frac{(R_y \times (12 - m)) + (R_{y+1} \times m)}{12}$$

where:

R_y is the reversion valuation factor mentioned in the relevant clause of this Schedule that applies to the pension and the member spouse's age in completed years at the relevant date.

m is the number of completed months of the member spouse's age that are not included in the completed years at the relevant date.

Schedule 4A—Method for determining value of superannuation interest in lifetime annuity

(paragraph 14Q(7)(c))

1 Application of Schedule 4A

This Schedule sets out the method for determining the value, at the termination time, of a superannuation interest in a lifetime annuity if the interest was in the payment phase at the termination time.

2 Method

- (1) The method is:

$$B \times \left(\frac{(V_y \times (12 - m)) + (V_{y+1} \times m)}{12} \right)$$

where:

B is the amount of the annual benefit payable in respect of the superannuation interest at the termination time.

V_y is the pension valuation factor under Schedule 4 that applies to the particular lifetime annuity and the member spouse's age in completed years at the termination time.

m is the number of completed months of the member spouse's age that are not included in the completed years at the termination time.

V_{y+1} is the pension valuation factor under Schedule 4 that applies to the particular lifetime annuity and the member spouse's age at the completion of the next year after the year mentioned in the definition of the factor V_y .

- (2) For the purpose of applying the factors V_y and V_{y+1} in the formula in subclause (1), a reference in Schedule 4 to 'pension' is taken to be read as a reference to 'annuity'.

Schedule 5—Method for determining gross value of superannuation interest payable as fixed-term pension

(subregulation 42(3))

1 Application of Schedule 5

This Schedule sets out the method for determining the gross value, at the relevant date, of a superannuation interest that is in the payment phase at the relevant date, if the benefits in respect of the interest are payable as a pension for a fixed term.

2 Method

- (1) The method is:

$$B \times P_{y+m}$$

where:

B is the value of the annual pension benefit payable in respect of the superannuation interest at the relevant date.

P_{y+m} is the pension valuation factor calculated in accordance with subclause (2).

- (2) For subclause (1), the pension valuation factor (**P_{y+m}**) at the relevant date is:

$$\frac{(P_y \times (12 - m)) + (P_{y+1} \times m)}{12}$$

where:

P_y is the pension valuation factor mentioned in clause 3 of this Schedule that applies to the pension and the remaining term of the pension in complete years at the relevant date.

m is the number of complete months of the remaining term of the pension that are not included in the remaining complete years at the relevant date.

P_{y+1} is the pension valuation factor mentioned in clause 3 of this Schedule that would apply to the pension if the remaining term of the pension at the relevant date were one year more than the actual remaining term of the pension at that date.

3 Pension valuation factors

- (1) The table in this clause sets out the pension valuation factors.

Schedule 5A—Method for determining value of superannuation interest in fixed term annuity

(paragraph 14Q(7)(d))

1 Application of Schedule 5A

This Schedule sets out the method for determining the value, at the termination time, of a superannuation interest in a fixed term annuity if the interest was in the payment phase at the termination time.

2 Method

- (1) The method is:

$$B \times V_{y+m}$$

where:

B is the value of the annual benefit payable in respect of the superannuation interest at the termination time.

V_{y+m} is the valuation factor calculated in accordance with subclause (2).

- (2) For subclause (1), the valuation factor (V_{y+m}) at the termination time is:

$$\frac{(V_y \times (12 - m)) + (V_{y+1} \times m)}{12}$$

where:

V_y is the pension valuation factor under Schedule 5 that applies to the particular fixed term annuity payable to the member spouse and the remaining term of the annuity in complete years at the termination time.

m is the number of complete months of the remaining term of the fixed term annuity that are not included in the remaining complete years at the termination time.

V_{y+1} is the pension valuation factor under Schedule 5 that would apply to the particular fixed term annuity payable to the member spouse if the remaining term of the annuity at the termination time were one year more than the actual remaining term of the annuity at that time.

- (3) For the purpose of applying the factors V_y and V_{y+1} in the formula in subclause (2), a reference in Schedule 5 to ‘pension’ is taken to be read as a reference to ‘annuity’.

Schedule 6—Method for determining gross value of superannuation interest payable as pension and future lump sum

(subregulation 43(3))

1 Application of Schedule 6

This Schedule sets out the method for determining the gross value, at the relevant date, of a superannuation interest that is in the payment phase at the relevant date, if:

- (a) part of the benefits in respect of the interest is being paid as a pension at the relevant date; and
- (b) the remaining part of the benefits is payable, at any time after the relevant date, as a lump sum that is not a commutation of the pension.

2 Definitions for Schedule 6

In this Schedule:

minimum deferral period, in relation to a lump sum that is to be paid to a member spouse at any time after the relevant date, means the minimum period until the lump sum may be paid to the member spouse.

nominal value, of a lump sum at a particular date, means:

- (a) subject to paragraph (b), the value of the lump sum at that date; or
- (b) if the value of the lump sum is expressed as an amount of dollars to be paid at a time after that date, that amount.

3 Method

- (1) The method is:

$GVP + GVLS$

where:

GVP is the gross value of the pension, determined in accordance with regulation 42.

GVLS is the gross value of the lump sum, determined using the method of valuation set out in subclause (2).

- (2) For subclause (1), the method of determining the gross value of the lump sum (***GVLS***) is:

$LS \times D_{y+m}$

where:

LS is the nominal value of the lump sum at the relevant date.

D_{y+m} is the discount valuation factor calculated in accordance with subclause (3).

- (3) For subclause (2), the discount valuation factor (**D_{y+m}**) at the relevant date is:

$$\frac{(D_y \times (12 - m)) + (D_{y+1} \times m)}{12}$$

where:

D_y is the discount valuation factor mentioned in clause 4 of this Schedule that applies to the lump sum and the minimum deferral period in complete years at the relevant date.

m is the number of complete months of the minimum deferral period applicable to the lump sum that are not included in the remaining complete years of that period at the relevant date.

D_{y+1} is the discount valuation factor mentioned in clause 4 of this Schedule that applies to the lump sum and the minimum deferral period applicable to the lump sum at the completion of the next year after the year mentioned in the definition of the factor **D_y** .

4 Discount valuation factors

- (1) This clause sets out the discount valuation factors.
- (2) The factors in column 2 of the table in this clause apply if the lump sum is not indexed.
- (3) The factors in column 3 of the table in this clause apply if the lump sum is indexed in accordance with the consumer price index.
- (4) The factors in column 4 of the table in this clause apply if the lump sum is indexed in accordance with a general wage index (for example, average weekly earnings, or average weekly ordinary time earnings, published by the Australian Bureau of Statistics).
- (5) If the lump sum is indexed in accordance with a fund crediting rate, the factor is 1.
- (6) For this Schedule, a lump sum is taken to be not indexed if the nominal value of the lump sum is an amount within the meaning of paragraph (b) of the definition of **nominal value** in clause 2 of this Schedule.
