

Beagle B121 (Pup) Series Aeroplanes

AD/BEA 121/4

Dual Throttle Control

8/70

- Applicability: All models modified in accordance with Beagle 121 Series Modification BE 10.
- Requirement: Inspect the cable assembly connecting the left throttle lever to the lower end of the right throttle lever for signs of kinking of the cable and of distortion of the forward sliding end. Defective cable assemblies shall be replaced before further flight.
- Compliance: At intervals not exceeding 100 hours time in service after incorporation of Beagle 121 Series Modification BE 10.
