Standard 1.4.2

Maximum Residue Limits (Australia Only)

Purpose

This Standard lists the maximum permissible limits for agricultural and veterinary chemical residues present in food. Schedule 1 lists all of the agricultural and veterinary chemical limits in particular foods. If a maximum residue limit for an agricultural or veterinary chemical in a food is not listed in Schedule 1 there must be no detectable residues of that agricultural or veterinary chemical in that food. Schedule 2 lists all extraneous agricultural chemical limits in particular foods. If an extraneous residue limit for an agricultural chemical in a food is not listed in Schedule 2 there must be no detectable residues of that agricultural chemical in that food. Schedule 3 groups certain agricultural or veterinary chemicals according to their chemical groups. Commodity and commodity groups which are referred to in this Standard are listed in Schedule 4. Schedule 4 also specifies the part of the commodity to which the maximum or extraneous residue limit refers.

For New Zealand purposes, maximum residue limits for agricultural compounds are regulated in the New Zealand (Maximum Residue Limits of Agricultural Compounds) Mandatory Food Standard 1999 (and subsequent amendments) issued under sections 11C and 11Z of the Food Act 1981. Regulation 257 of the New Zealand Food Regulations 1984 also refers to MRLs, but if any inconsistency arises between Regulation 257 and the MRL Standard, the MRL Standard prevails.

Clauses

1 Interpretation

- (1) Commodity names specified in Schedule 4 of this Standard may differ to those used in other parts of this Code.
- (2) Commodity names specified in Schedule 4 apply only for the purposes of this Standard and Standard 1.4.1.
- (3) An asterix "*" appearing in Schedules 1 or 2 denotes that the maximum residue limit or the extraneous residue limit is set at or about the limit of determination.
- (4) A "T" appearing in Schedules 1 or 2 denotes that the maximum residue limit or the extraneous residue limit is a temporary maximum residue limit or extraneous residue limit.
- (5) An "E" appearing in Schedule 2 denotes an extraneous residue limit.
- (6) In this Standard
 - **chemical** means an agricultural or veterinary chemical listed in bold type in the shaded boxes in Schedules 1 or 2.
 - **extraneous residue limit (ERL)** means the maximum permitted limit of a pesticide residue, arising from environmental sources other than the use of a pesticide directly or indirectly on the food, expressed in milligrams of the chemical per kilogram of the food (mg/kg).

food means either a food or class of foods listed in unbolded type in Schedules 1, 2 or 4.

- maximum residue limit (MRL) means the maximum level of a chemical which is permitted to be present in a food, expressed in milligrams of the chemical per kilogram of the food (mg/kg) unless otherwise stated.
- **residue definition** means the residue to which the MRL or ERL applies for each chemical compound, appearing below the chemical listed in the shaded boxes in Schedules 1 and 2.

2 Maximum residue limits

- (1) The permitted MRL for a chemical in food is listed in Schedule 1.
- (2) If a MRL for a chemical is not listed in this Standard there must be no detectable residue of that chemical in that food.

Editorial note:

The MRLs for chemicals in water are listed under 'Pesticides' in Schedule 3 of the 'Guidelines for Drinking Water Quality in Australia' (1987) AWRC-NHMRC (Australian Water Resources Council - National Health and Medical Research Council).

3 Extraneous residue limits

- (1) The permitted ERL for a chemical in food is listed in Schedule 2.
- (2) If an ERL for a chemical is not listed in this Standard there must be no detectable residue of that agricultural chemical in that food.

4 Determination of maximum and extraneous residue limits

- (1) Schedule 4 of this Standard specifies the portion of food to which the MRL or ERL applies.
- (2) Unless Schedules 1 or 2 specify a separate MRL or ERL for a processed food, the MRL or ERL applies to that food whether raw or processed.
- (3) Where a food contains more than one of the chemicals listed in any group in Schedule 3 of this Standard, the combined proportions of those chemicals must not exceed unity.

Sample calculation			
Amount of chemical A present MRL or ERL for chemical A	+	Amount of chemical B present MRL or ERL for chemical B	≤ 1

(4) Where there is no MRL or ERL specified for a chemical in a food which has ingredients, the MRL or ERL of the chemical in that food is the combined proportionate quantities of the MRL or ERL specified for the ingredients of that food.

Sample calculation

$$MRL1 = \underbrace{Total\ A}_{Total} x MRL\ A + \underbrace{Total\ B}_{Total} x MRL\ B$$

In this calculation -

MRL1 = the MRL which applies to the chemical in the mixed food

MRL A = the MRL for the chemical which applies to food A

MRL B = the MRL for the chemical which applies to food B

Total A = total weight of food A

Total B = total weight of food B
