Part 3 Other

8. Timing of applications to have a prosthesis listed

As a matter of normal administrative practice, applications made under subsection 72-10 (2) of the Act will be considered after they have been received and, if the Minister decides to grant the application, the kind of prosthesis will be listed in the Schedule the next time the Minister makes or varies the Rules.

Note 1: Under subsection 72-10 (5) of the Act the Minister must list the kind of prosthesis, set out the minimum benefit and, if the Minister considers it appropriate, the maximum benefit for the prosthesis in these Rules on the next occasion that the Minister makes or varies the Rules after he or she grants an application and the applicant has paid to the Commonwealth any initial listing fee within 14 days of being informed of the Minister's decision to grant the application.

Note 2: Under subsection 72-15 (3) of the Act, the Minister may remove a kind of prosthesis from the list in the Rules if the applicant fails to pay an ongoing listing fee.

9. Minister may have regard to recommendations and advice

(1) In making the decision under subsection 72-10 of the Act, the Minister may have regard to a recommendation from the Prostheses List Advisory Committee.

(2) In setting the minimum and the maximum (if any) benefits for a kind of prosthesis, the Minister may have regard to the benefits as negotiated between the Negotiating Oversight Committee and the applicant.

10. Listing criteria for prostheses to be listed in Part C of the Schedule

For a listing application to be granted to list a kind of prosthesis in Part C of the Schedule, the listing criterion is that the kind of prosthesis is an:

(i) insulin infusion pump; or

(ii) implantable cardiac event recorder.

Note: 1. The power to make listing criteria is in subsection 72-10(6) of the Act.

2. Under subsection 72-10(7) of the Act the Minister must not grant a listing application if any applicable listing criteria are not satisfied in relation to the application.

3. Under the Act the Minister may refuse to grant a listing application even if the listing criteria are satisfied. See Note to subsection 72-10(7) of the Act.

OE023	NexFix Compression Staples	The NexFix Compression Staples are made of stainless steel and are used for internal fixation of fractures, fusions, bone grafts and osteotomies in the bones of the hand and foot. It is designed so the surgeon can control the amount of compression they are applying across the osteotomy/fracture site. Once compressed the surgeon can also reduce the amount of compression applied with the specialised clamp provided. This does not affect the final stability of the implant but allows for greater control at the time of surgery.	10 mm in width, leg length varies 13 mm - 20 mm	$300.00	$350.00

DE302	BioComposite Corkscrew Suture Anchor	The threaded design over the entire length of the suture anchor provides substantially higher pull-out strength than comparable anchors in poor quality bone. The fully threaded design also prevents anchor "pull-back" that may occur with countersunk anchors. The internal drive mechanism substantially increases resistance to stripping during insertion into hard bone. The recessed FiberWire suture eyelet is self-aligning and minimizes suture abrasion during knot tying.	4.5mm - 5.5mm	$435.00		
DE304	BioComposite SutureTak Suture Anchor	Absorbable suture anchor with a molded-in suture eyelet. The unique suture eyelet maintains its strength throughtout most of the degradation cycle and eliminates suture abrasion during knot tying. BT107	PRO-Kinetic Energy	The PRO-Kinetic Energey stent is a tubular, balloon-expandable stent sculpted by laser from a single tube of L-605 cobalt chromium (CoCr) alloy. The stent consists of circular segments at each end followed by a transition zone and helicoidally arranged struts in the middle. Each loop of the helix is connected to the next loop by 3 longitudinal struts. The stent surface is fully coated with a layer of amorphous hydrogen-rich silicon carbide (aSiC:H). This material has semiconducting properties that efficiently prevent the electron transfer from fibrinogen to the metal surface in vitro. Thereby the conversion from fibrinogen to fibrin and it's depoisition at the stent surface is reduced. Additionally, aSiC:H - coated stents exhibit a lower adhesion and activation of blood platelets and leucocytes. Finally, the release of potentially allergenic ions from a silicon carbide coated stent is substantially reduced in comparison to an uncoated metal stent3. This coating is used on all Biotronik coronary stents producedso far and was subject to extensive clinical testing.	The PRO-Kinetic Energy stent is available in 66 different diameter/length combinations. It is available in lengths from 8mm to 40mm. It is premounted on a delivery system which has nominal balloon diameters between 2.0mm and 5.0mm.	$1,248.00

YC001	Adiana Permanent Contraceptive System	The Adiana Permanent Contraceptive System provides permanent female sterilisation by occlusion of the fallopian tubes via a hysteroscopic transuterine approach. The Adiana Permanent Contraceptive System consists of the Adiana Radiofrequency Generator and an Adiana Delivery catheter with detachable Adiana Matrix. To provide patients with an alternative, highly safe, effective, accessible, and widely acceptable female sterilisation option, the Adiana System was develpoed as the next generation trancervical device. The intention was to further improve the safety profile of the trancervical device. The Adiana System can be placed in the day procedure setting without the use of general or regional anesthesia.	The Adiana Delivery Catheter and handle is approx. 58 cm in length, with an attached connector cable that is 49 cm in length. The shaft has a maximum shaft OD of 0.060 inches (+0.005in). The distal tip of the device up to the depth make, which enters the fallopian tube, has a maximum OD of 0.053 inches (1.27mm). The matrix is a cylindrical shape of approx. 1.60 mm in diameter of approx. 0.44mm is created within the centre of the matrix.	$645.00	$800.00
