The compression screws are self-tapping cannulated screws, which present two types of thread diameter (one on the screw head and a body part of the screw). They are particularly intended to repair the 1st metatarsal in the foot. The pitch difference between the proximal and the distal part allows creating a compression are between the upper and lower bone fragment of 1st metatarsal improving the healing process.	10 sizes Head diameter: 3.8mm Proximal diameter: 3mm Internal diameter: 1.10mm Different length from 10mm to 34mm by pitch of 2mm between each reference	\$421.00
