Subdivision 2.1—General

6 Amount of levy

The amount of levy payable by a liable entity for a financial year is the sum of each levy component the entity has for the financial year.

7 Levy component

When an entity has a levy component

- (1) A liable entity has a **levy component** for a financial year in respect of each sub-sector of which the entity forms part at any time in the financial year.

Amount of a levy component

- (2) The amount of a liable entity's levy component for a financial year in respect of a sub-sector is:
 - (a) if a provision of Part 3 provides that the basic levy component applies to the sub-sector for the financial year—the basic levy component for the entity for the sub-sector for the financial year; or
 - (b) otherwise—the amount of the levy component worked out for the entity and the sub-sector under Part 3.

Note: For the basic levy component, see section 9.

8 Levy component for liable entities that are deregistered

However, the amount of levy payable by a liable entity for a financial year is nil if:

- (a) the entity is required to lodge a return relating to the financial year with ASIC under section 11 of the *ASIC Supervisory Cost Recovery Levy (Collection) Act 2017*; and
- (b) before the end of the day on which the return is required to be lodged:
 - (i) the entity is deregistered under Part 5A.1 of the *Corporations Act 2001*; or

- (c) the entity's registration has not been reinstated before the end of that day.

Subdivision 2.2—Levy components

9 Basic levy component

- (1) The **basic levy component** for a liable entity for a sub-sector for a financial year is the amount worked out using the formula:

Section 10

$$\text{Sub-sector regulatory costs} \times \frac{\text{Basic rate entity metric}}{\text{Sub-sector metric}}$$

where:

basic rate entity metric means:

- (a) unless paragraph (b) applies—the entity’s entity metric for the sub-sector for the financial year; or
- (b) if no provision in Part 3 specifies an amount to be the entity metric for the sub-sector for the financial year—1.

sub-sector metric means the number specified by ASIC in an annual determination to be the sum of the amounts of **basic rate entity metric** for all leviable entities that form part of the sub-sector for the financial year.

sub-sector regulatory costs means the sub-sector regulatory costs in relation to the sub-sector for the financial year.

- (2) However, if a component of the formula is nil or a negative amount, the amount of the basic levy component is nil.

10 Graduated levy component

- (1) The **graduated levy component** for a leviable entity for a sub-sector for a financial year is the amount worked out using the formula:

$$\left[\text{Sub-sector regulatory costs} - \left(\text{Minimum levy component} \times \text{Sub-sector population} \right) \right] \times \frac{\text{Graduated entity metric}}{\text{Sub-sector metric}}$$

where:

graduated entity metric means:

- (a) unless paragraph (b) applies—the entity’s entity metric for the sub-sector for the financial year; or
- (b) if a provision of Part 3 specifies a minimum levy threshold for the sub-sector for the financial year—the difference between the entity’s entity metric for the sub-sector for the financial year and the minimum levy threshold.

minimum levy component means the minimum levy component for the sub-sector for the financial year.

sub-sector metric means the number specified by ASIC in an annual determination to be the sum of the amounts of **graduated entity metric** for all leviable entities that form part of the sub-sector for the financial year.

sub-sector population means the sub-sector population in relation to the sub-sector for the financial year.

sub-sector regulatory costs means the sub-sector regulatory costs in relation to the sub-sector for the financial year.

- (2) However, if a component of the formula is nil or a negative amount, the amount of the graduated levy component is nil.

11 Pro-rata of entity metric

- (1) This section applies to a liable entity for a financial year if:
- (a) a provision of Part 3 (the *pro-rata provision*) that applies to the entity provides that there is a pro-rata of the entity metric for a sub-sector for a financial year; and
 - (b) the number of counted days for the entity for the financial year under the pro-rata provision is less than the number of days in the financial year.
- (2) The *entity metric* for the liable entity is to be reduced by multiplying it by the following fraction:

$$\frac{\text{Counted days}}{\text{Number of days in the financial year}}$$

where:

counted days means the number of days counted for the entity under the pro-rata provision.

12 Rules about amounts

- (1) An amount worked out under this Division must be rounded to the nearest whole dollar (rounding 50 cents upwards).
- (2) If an entity metric worked out under this instrument is not a whole number, the entity metric must be rounded to the nearest whole number (rounding 0.5 upwards).
- (3) If an entity metric is an amount worked out in Australian dollars, the amount of the entity metric is instead the number of dollars in the amount.
- (4) If a minimum levy threshold is an amount in Australian dollars, the amount of the threshold is instead the number of dollars in the amount.

Legislation history and amendment history—Endnotes 3 and 4

Amending laws are annotated in the legislation history and amendment history.

The legislation history in endnote 3 provides information about each law that has amended (or will amend) the compiled law. The information includes commencement details for amending laws and details of any application, saving or transitional provisions that are not included in this compilation.

The amendment history in endnote 4 provides information about amendments at the provision (generally section or equivalent) level. It also includes information about any provision of the compiled law that has been repealed in accordance with a provision of the law.

Editorial changes

The *Legislation Act 2003* authorises First Parliamentary Counsel to make editorial and presentational changes to a compiled law in preparing a compilation of the law for registration. The changes must not change the effect of the law. Editorial changes take effect from the compilation registration date.

If the compilation includes editorial changes, the endnotes include a brief outline of the changes in general terms. Full details of any changes can be obtained from the Office of Parliamentary Counsel.

Misdescribed amendments

A misdescribed amendment is an amendment that does not accurately describe the amendment to be made. If, despite the misdescription, the amendment can be given effect as intended, the amendment is incorporated into the compiled law and the abbreviation “(md)” added to the details of the amendment included in the amendment history.

If a misdescribed amendment cannot be given effect as intended, the abbreviation “(md not incorp)” is added to the details of the amendment included in the amendment history.
