

Australian Government
Repatriation Medical Authority

EXPLANATORY STATEMENT

**STATEMENT OF PRINCIPLES CONCERNING
CORONAVIRUS DISEASE 2019 (COVID-19)
(REASONABLE HYPOTHESIS) (NO. 46 OF 2020)**

VETERANS' ENTITLEMENTS ACT 1986
MILITARY REHABILITATION AND COMPENSATION ACT 2004

1. This is the Explanatory Statement to the *Statement of Principles concerning coronavirus disease 2019 (COVID-19) (Reasonable Hypothesis)* (No. 46 of 2020).

Background

2. The Repatriation Medical Authority (the Authority) has determined, under subsection 196B(2) of the *Veterans' Entitlements Act 1986* (the VEA), Statement of Principles concerning **coronavirus disease 2019 (COVID-19)** (Reasonable Hypothesis) (No. 46 of 2020).
3. The Authority is of the view that there is sound medical-scientific evidence that indicates that **COVID-19** and **death from COVID-19** can be related to particular kinds of service. The Authority has therefore determined this Statement of Principles concerning COVID-19 pursuant to subsection 196B(2) of the VEA.

Purpose and Operation

4. The Statement of Principles will be applied in determining claims under the VEA and the *Military Rehabilitation and Compensation Act 2004* (the MRCA).
5. The Statement of Principles sets out the factors that must as a minimum exist, and which of those factors must be related to the following kinds of service rendered by a person:

- operational service under the VEA;
- peacekeeping service under the VEA;
- hazardous service under the VEA;
- British nuclear test defence service under the VEA;
- warlike service under the MRCA;
- non-warlike service under the MRCA,

before it can be said that a reasonable hypothesis has been raised connecting COVID-19 or death from COVID-19, with the circumstances of that service. The Statement of Principles has been determined for the purposes of both the VEA and the MRCA.

6. The Repatriation Commission, Military Rehabilitation and Compensation Commission, Veterans' Review Board or Administrative Appeals Tribunal cannot accept any claim for pension; or a claim for liability or compensation relating to **COVID-19** or **death from COVID-19** that was lodged on or after 1 June 1994 in the case of the VEA, or 1 July 2004 in the case of the MRCA respectively, unless this

Statement of Principles upholds that claim (subsection 120A(3) of the VEA or subsection 338(3) of the MRCA).

Investigation

7. This new Instrument results from an investigation notified by the Authority in the Government Notices Gazette of 23 April 2020 concerning COVID-19 in accordance with section 196G of the VEA. The investigation involved an examination of the sound medical-scientific evidence available to the Authority.
8. The sound medical-scientific evidence identified COVID-19 as an acute infectious disease with the ubiquitous severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) as its sole cause. This Statement of Principles determines exposure to SARS-CoV-2 within the 14 days before the clinical onset of COVID-19 as the sole cause of infection and also prescribes the means of that exposure that can be related to service.
9. The sound medical-scientific evidence also identified a number of chronic conditions potentially related to service that each can increase the risk of severe disease, disability and death associated with the onset of COVID-19. These conditions include:
 - autoimmune disorders;
 - being in an immunocompromised state;
 - being obese;
 - cardiovascular disease;
 - cerebrovascular disease;
 - chronic kidney disease;
 - chronic liver disease;
 - chronic lung disease (including asthma and chronic obstructive pulmonary disease);
 - chronic neurological diseases;
 - having a current or recent smoking habit (within the five years before the clinical onset of COVID-19); or
 - hypertension.

Examples of conditions which can cause an immunocompromised state include:

- being treated with an immunosuppressive drug;
- having a haematological or solid organ malignancy;
- having human immunodeficiency virus infection;
- having severe malnutrition; or
- undergoing solid organ, stem cell or bone marrow transplantation.

No worsening factors for COVID-19

10. These chronic conditions could not be included as worsening factors for COVID-19. This is so as both the VEA and MRCA (see subsections 8(1)(e) and 9(1)(e) of the VEA and subsections 27(d) and 28(1)(d) of the MRCA) require worsening to occur as a result of service rendered after the veteran or member contracted COVID-19. As COVID-19 is an acute infectious disease these chronic conditions could not meet that requirement for the worsening of COVID-19.

COVID-19 as a contributing factor

11. However, the corollary of this sound medical-scientific evidence is that if these chronic conditions precede an onset of COVID-19, that event increases the risk of disability and death from that chronic condition and COVID-19 may materially

contribute to or aggravate that chronic condition. The assessment of these matters is made in each case by the Repatriation Commission and the Military Rehabilitation and Compensation Commission depending on whether the chronic condition is potentially war-caused or service related (see sections 8 and 9 of the VEA and sections 27 and 28 of the MRCA).

Consultation

12. Prior to determining this Instrument, the Authority advertised its intention to undertake an investigation in relation to COVID-19 in the Government Notices Gazette of 23 April 2020, and circulated a copy of the notice of intention to investigate to a wide range of organisations representing veterans, service personnel and their dependants. The Authority invited submissions from the Repatriation Commission, the Military Rehabilitation and Compensation Commission, organisations and persons referred to in section 196E of the VEA, and any person having expertise in the field. No submissions were received for consideration by the Authority in relation to the investigation.

Human Rights

13. This instrument is compatible with the Human Rights and Freedoms recognised or declared in the International Instruments listed in Section 3 of the *Human Rights (Parliamentary Scrutiny) Act 2011*. A Statement of Compatibility with Human Rights follows.

Finalisation of Investigation

14. The determining of this new Instrument finalises the investigation in relation to COVID-19 as advertised in the Government Notices Gazette of 23 April 2020.

Statement of Compatibility with Human Rights

(Prepared in accordance with Part 3 of the Human Rights (Parliamentary Scrutiny) Act 2011)

Instrument No.: **Statement of Principles No. 46 of 2020**

Kind of Injury, Disease or Death: **Coronavirus disease 2019 (COVID-19)**

This Legislative Instrument is compatible with the human rights and freedoms recognised or declared in the international instruments listed in section 3 of the *Human Rights (Parliamentary Scrutiny) Act 2011*.

Overview of the Legislative Instrument

1. This Legislative Instrument is determined pursuant to subsection 196B(2) of the *Veterans' Entitlements Act 1986* (the VEA) for the purposes of the VEA and the *Military Rehabilitation and Compensation Act 2004* (the MRCA). Part XIA of the VEA requires the determination of these instruments outlining the factors connecting particular kinds of injury, disease or death with service such being determined solely on the available sound medical-scientific evidence.
2. This Legislative Instrument:-
 - facilitates claimants in making, and the Repatriation Commission in assessing, claims under the VEA and the MRCA respectively, by specifying the circumstances in which medical treatment and compensation can be extended to eligible persons who have COVID-19;
 - facilitates the review of such decisions by the Veterans' Review Board and the Administrative Appeals Tribunal; and
 - outlines the factors which the current sound medical-scientific evidence indicates must as a minimum exist, before it can be said that a reasonable hypothesis has been raised, connecting COVID-19 with the circumstances of eligible service rendered by a person, as set out in clause 5 of the Explanatory Statement.
3. The Instrument is assessed as being a technical instrument which improves the medico-scientific quality of outcomes under the VEA and the MRCA.

Human Rights Implications

4. This Legislative Instrument does not derogate from any human rights. It promotes the human rights of veterans, current and former Defence Force members as well as other persons such as their dependents, including:
 - the right to social security (Art 9, *International Covenant on Economic, Social and Cultural Rights*; Art 26, *Convention on the Rights of the Child* and Art 28,

Convention on the Rights of Persons with Disabilities) by helping to ensure that the qualifying conditions for the benefit are 'reasonable, proportionate and transparent'¹;

- the right to an adequate standard of living (Art 11, ICSECR; Art 27, CRC and Art 28, CRPD) by facilitating the assessment and determination of social security benefits;
- the right to the enjoyment of the highest attainable standard of physical and mental health (Art 12, ICSECR and Art 25, CRPD), by facilitating the assessment and determination of compensation and benefits in relation to the treatment and rehabilitation of veterans and Defence Force members;
- the rights of persons with disabilities by facilitating the determination of claims relating to treatment and rehabilitation (Art 26, CRPD); and
- ensuring that those rights "will be exercised without discrimination of any kind as to race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status" (Art 2, ICESCR).

Conclusion

This Legislative Instrument is compatible with human rights as it does not derogate from and promotes a number of human rights.

Repatriation Medical Authority

¹ In General Comment No. 19 (The right to social security), the Committee on Economic, Social and Cultural Rights said (at paragraph 24) this to be one of the elements of ensuring accessibility to social security.
