- (1) This section applies in relation to a proposed arrangement for operations to prepare prescribed rabbit meat, ratite meat, rabbit meat products or ratite meat products for export at a registered establishment.

General requirements

- (2) The proposed arrangement must record that the applicant for approval of the arrangement is committed:
 - (a) to meeting the objects referred to in section 3 of the Act that are applicable to the operations and the prescribed rabbit meat, ratite meat, rabbit meat products or ratite meat products to be covered by the arrangement; and
 - (b) to complying with the requirements of the Act in relation to those operations.
- (3) The proposed arrangement must cover each stage of the operations.
- (4) The proposed arrangement must record details of the following matters:
 - (a) the applicant's management practices;
 - (b) the organisational structure of the applicant;
 - (c) the resources to be provided to carry out the operations to be covered by the arrangement;
 - (d) the personnel who are to carry out the operations and the training those personnel receive;
 - (e) the system of controls to be implemented to ensure that the conditions prescribed by Divisions 2 to 8 of Part 2 of this Chapter will be complied with in relation to the operations to be covered by the arrangement;
 - (f) any other system of controls to be implemented to ensure that there will be reasonable grounds for issuing:

Section 5-2

- (i) an export permit for the prescribed rabbit meat, ratite meat, rabbit meat products or ratite meat products to be covered by the arrangement; or
 - (ii) a government certificate in relation to the prescribed rabbit meat, ratite meat, rabbit meat products or ratite meat products to be covered by the arrangement.
- (5) The matters required to be recorded in the proposed arrangement by paragraphs (4)(a) to (d) must be appropriate to ensure compliance with the requirements of the Act in relation to the operations to be covered by the arrangement.
- (5A) Without limiting subsection (4), if operations to prepare prescribed rabbit meat, ratite meat, rabbit meat products or ratite meat products to be covered by the arrangement include those that are to be the last operations to prepare the meat or meat products carried out at a registered establishment before export, the proposed arrangement must record details of:
 - (a) the information, methods, procedures, tests, monitoring and other evaluations to be used to verify that:

 - (a) identify each importing country requirement that will not be met; and
 - (b) record details of the control measures to be implemented to ensure that each importing country requirement referred to in paragraph (a) will be met.

Note: It is a condition of an approved arrangement for export operations in relation to prescribed rabbit meat, ratite meat, rabbit meat products or ratite meat products that all importing country requirements relating to export operations carried out in relation to the meat or meat products in accordance with the arrangement, and the meat or meat products, are met (see section 5-4).

Requirement for HACCP plan

- (7) The proposed arrangement must provide for the implementation of an HACCP plan for each stage of the operations to prepare the prescribed rabbit meat, ratite meat, rabbit meat products or ratite meat products for export.

Note: See clause 3.11 of the Australian Meat Standard for the requirements for HACCP plans.

Requirement relating to rabbit meat, ratite meat, rabbit meat products or ratite meat products that are not for export etc.

Requirement relating to potable water

- (9) If the proposed arrangement provides for potable water to be used in carrying out operations to prepare prescribed rabbit meat, ratite meat, rabbit meat products or ratite meat products for export, the arrangement must record details of the system of controls (including in relation to treatment, testing and verification) to be implemented to ensure that the water will be free from:

Legislation history and amendment history—Endnotes 3 and 4

Amending laws are annotated in the legislation history and amendment history.

The legislation history in endnote 3 provides information about each law that has amended (or will amend) the compiled law. The information includes commencement details for amending laws and details of any application, saving or transitional provisions that are not included in this compilation.

The amendment history in endnote 4 provides information about amendments at the provision (generally section or equivalent) level. It also includes information about any provision of the compiled law that has been repealed in accordance with a provision of the law.

Editorial changes

The *Legislation Act 2003* authorises First Parliamentary Counsel to make editorial and presentational changes to a compiled law in preparing a compilation of the law for registration. The changes must not change the effect of the law. Editorial changes take effect from the compilation registration date.

If the compilation includes editorial changes, the endnotes include a brief outline of the changes in general terms. Full details of any changes can be obtained from the Office of Parliamentary Counsel.

Misdescribed amendments

A misdescribed amendment is an amendment that does not accurately describe how an amendment is to be made. If, despite the misdescription, the amendment can be given effect as intended, then the misdescribed amendment can be incorporated through an editorial change made under section 15V of the *Legislation Act 2003*.

If a misdescribed amendment cannot be given effect as intended, the amendment is not incorporated and “(md not incorp)” is added to the amendment history.
