1 **7B Potential greenhouse gas emissions embodied in an amount of**  
2 **natural gas**

- 3 (1) For the purposes of this Act and the *Clean Energy Act 2011*, the  
4 ***potential greenhouse gas emissions*** embodied in an amount of  
5 natural gas is:  
6 (a) the amount of the greenhouse gas; or  
7 (b) the amounts of the greenhouse gases;  
8 that would be released into the atmosphere as a result of the  
9 combustion of the amount of the natural gas.

10 *Default method*

- 11 (2) The Minister may determine that the amount of greenhouse gas  
12 that would be released into the atmosphere as a result of the  
13 combustion of an amount of natural gas is taken, for the purposes  
14 of:  
15 (a) this Act (other than subsections (3) and (4) of this section);  
16 and  
17 (b) the *Clean Energy Act 2011*;  
18 to be the amount of the natural gas multiplied by a value specified  
19 in the determination.

20 *Prescribed alternative method*

- 21 (3) However, if:  
22 (a) a report relating to an eligible financial year was given by a  
23 person under section 22A; and  
24 (b) the report was given before the end of 4 months after the end  
25 of the eligible financial year; and  
26 (c) ascertaining the potential greenhouse gas emissions  
27 embodied in an amount of natural gas is relevant to working  
28 out a provisional emissions number of the person for the  
29 eligible financial year; and  
30 (d) the report contained a statement to the effect that the person  
31 has made a choice to use the prescribed alternative method to  
32 ascertain the potential greenhouse gas emissions; and  
33 (e) the prescribed alternative method was complied with in  
34 ascertaining the potential greenhouse gas emissions;  
35 then, for the purposes of this Act and the *Clean Energy Act 2011*:

- 1 (f) the potential greenhouse gas emissions are to be ascertained  
2 in accordance with the prescribed alternative method; and  
3 (g) a determination under subsection (2) does not apply in  
4 ascertaining the potential greenhouse gas emissions.

- 5 (4) For the purposes of this section, the *prescribed alternative method*  
6 is a method that:  
7 (a) is for ascertaining the potential greenhouse gas emissions  
8 embodied in an amount of natural gas; and  
9 (b) is specified in a determination made by the Minister; and  
10 (c) involves testing one or more samples of the natural gas.

11 *Combustion*

- 12 (5) The Minister may determine that, for the purposes of this section, it  
13 is to be assumed that the *combustion* of an amount of natural gas  
14 takes place in the circumstances specified in the determination.

15 *Determination*

- 16 (6) A determination made under subsection (2), (4) or (5) is a  
17 legislative instrument.

23 (a) an amount of a greenhouse gas; or  
24 (b) amounts of one or more greenhouse gases.

25 *Carbon dioxide equivalence*

- 26 (2) For the purposes of this Act and the *Clean Energy Act 2011*, the  
27 *carbon dioxide equivalence* of the potential greenhouse gas  
28 emissions is the total of the carbon dioxide equivalence of that  
29 amount of greenhouse gas or those amounts of greenhouse gases.

28 findings were based; and  
29 (c) giving the reasons for the decision or determination;  
30 except where subsection 28(4) of that Act applies.
- 31 (5) If the \*Agriculture Secretary fails to comply with subsection (3) or

- (3) A document purporting to be a certificate under subsection (1) must, unless the contrary is established, be taken to be such a certificate and to have been properly given.

11 **Guide to Division 420**

12 **420-1 What this Division is about**

13 This Division deals with amounts you can deduct, and amounts  
14 included in your assessable income, because of these situations:

- 15 • you acquire a registered emissions unit;
- 16 • you hold a registered emissions unit at the start or the end of  
17 the income year;
- 18 • you dispose of a registered emissions unit.

20	420-5	The 4 key features of tax accounting for registered emissions units
----	-------	---

21 **420-5 The 4 key features of tax accounting for registered emissions**  
22 **units**

23 The purpose of income tax accounting for registered emissions  
24 units is to produce the same tax treatment, irrespective of your  
25 purpose in acquiring or holding the registered emissions units.

26 There are 4 key features:

---

- 1 (1) You bring your gross expenditure and gross proceeds to account,  
2 not your net profits and losses on disposal of a registered emissions  
3 unit.
- 4 (2) The gross expenditure is deductible.
- 5 (3) The gross proceeds are assessable income.
- 6 (4) You must bring to account any difference between the value of  
7 your registered emissions units held at the start and at the end of  
8 the income year. This is done in such a way that:
- 9 (a) any increase in value is included in assessable income; and  
10 (b) any decrease in value is a deduction.

## 11 **Subdivision 420-A—Registered emissions units**

### 12 **Table of sections**

13	420-10	Meaning of <i>registered emissions unit</i>
14	420-12	Meaning of <i>hold</i> a registered emissions unit

### 15 **420-10 Meaning of *registered emissions unit***

19 (c) a \*prescribed international unit; or  
20 (d) an \*Australian carbon credit unit;  
21 for which there is an entry in a Registry account (within the  
22 meaning of the *Australian National Registry of Emissions Units*  
23 *Act 2011*).

### 24 **420-12 Meaning of *hold* a registered emissions unit**

- 25 (1) You *hold* a \*registered emissions unit if you are the entity in whose  
26 Registry account (within the meaning of the *Australian National*  
27 *Registry of Emissions Units Act 2011*) there is an entry for the unit.
- 28 (2) However, if the entity (the *nominee entity*) in whose Registry  
29 account (within the meaning of the *Australian National Registry of*  
30 *Emissions Units Act 2011*) there is an entry for a \*registered  
31 emissions unit holds the unit as nominee for another entity:

**Part 2** Amendments commencing at the same time as section 3 of the Clean Energy Act 2011 commences

- 1 (a) the other entity is taken to *hold* the unit; and  
2 (b) the nominee entity is taken not to hold the unit.

3 **Subdivision 420-B—Acquiring registered emissions units**

4 **Table of sections**

5	420-15	What you can deduct
6	420-20	Non-arm's length transactions and transactions with associates
7	420-21	Incoming international transfers of emissions units
8	420-22	Becoming taxable in Australia on the proceeds of sale of registered
9		emissions units

10 **420-15 What you can deduct**

- 11 (1) You can deduct expenditure to the extent that you incur it in  
12 becoming the \*holder of a \*registered emissions unit.

13 Note: A carbon unit is an example of a registered emissions unit. You can  
14 become the holder of a carbon unit as a result of the unit being issued  
15 to you under the *Clean Energy Act 2011* or as a result of your  
16 acquisition of the unit from another entity.

17 *Timing*

- 18 (2) You deduct the expenditure in the income year in which you start  
19 to \*hold the \*registered emissions unit.

20 *Free carbon units*

- 21 (3) You cannot deduct under this section expenditure you incur in  
22 becoming the \*holder of a \*carbon unit issued to you in accordance  
23 with:

32 or lodging:

- 1 (a) an application for a certificate of entitlement (within the  
2 meaning of that Act); or  
3 (b) an offsets report (within the meaning of that Act).

4 *No deduction if sale proceeds would not be assessable*

- 5 (5) You cannot deduct under this section expenditure you incur in  
6 becoming the \*holder of a \*registered emissions unit if, assuming  
7 that you had sold the unit to someone else immediately after you  
8 started to \*hold the unit, the proceeds of the sale would not have  
9 been included in your assessable income under section 420-25.

10 Note: Under the *International Tax Agreements Act 1953*, for some foreign  
11 residents, the proceeds of the sale of a registered emissions unit are  
12 not assessable income in Australia.

13 **420-20 Non-arm's length transactions and transactions with**  
14 **associates**

- 15 (1) If:  
16 (a) an entity becomes the \*holder of a \*registered emissions unit;

20 deal with each other at arm's length; or  
21 (ii) the previous holder is the entity's \*associate; and  
22 (c) the entity did not pay or give consideration equal to the  
23 \*market value of the unit for becoming the holder of the unit;  
24 the entity is treated as if:

32 (b) \*passes to a beneficiary in the individual's estate.
- 33 (3) This section does not apply to:

2 status commencement time instead of at the time mentioned  
3 in paragraph (a).

4 Note: Under the *International Tax Agreements Act 1953*, for some foreign  
5 residents, the proceeds of the sale of a registered emissions unit are  
6 not assessable income in Australia.

20 **420-25 Assessable income on disposal of registered emissions units**

21 (1) Your assessable income includes an amount that you are entitled to  
22 receive because you cease to \*hold a \*registered emissions unit.

23 *Timing*

24 (2) The amount is included in your assessable income for the income  
25 year in which you cease to \*hold the unit.

26 *Source*

27 (3) An amount included in your assessable income under  
28 subsection (1) is taken, for the purposes of the \*income tax laws, to  
29 have a source in Australia.

1 **420-30 Non-arm's length transactions and transactions with**  
2 **associates**

3 If:

- 4 (a) an entity (the *transferor*) ceases to \*hold a \*registered  
5 emissions unit; and  
6 (b) the cessation is because of the transfer of the unit to:  
7 (i) a Registry account (within the meaning of the  
8 *Australian National Registry of Emissions Units Act*  
9 *2011*); or  
10 (ii) a foreign account (within the meaning of that Act);  
11 kept by another entity (the *transferee*); and  
12 (c) either:  
13 (i) the transferor and the transferee did not deal with each  
14 other at arm's length; or  
15 (ii) the transferee is the transferor's \*associate; and  
16 (d) the transferee did not pay or give consideration equal to the  
17 \*market value of the unit for the transfer of the unit;

18 the transferor is treated as if the transferor were entitled to receive  
19 an amount equal to that market value because the transferor ceased  
20 to be the holder of the unit.

21 Note: In the application of Division 13 of Part III of the *Income Tax*  
22 *Assessment Act 1936* (about international transfer-pricing  
23 arrangements), this section is disregarded—see subsection 136AB(2)  
24 of the *Income Tax Assessment Act 1936*.

25 **420-35 Outgoing international transfers of emissions units**

26 If:

- 27 (a) you stop \*holding a \*registered emissions unit; and  
28 (b) you do so as a result of the transfer of the unit to:  
29 (i) if the unit is a \*carbon unit—your foreign account  
30 (within the meaning of the *Clean Energy Act 2011*) or  
31 your nominee's foreign account (within the meaning of  
32 that Act); or  
33 (ii) if the unit is an \*international emissions unit—your  
34 foreign account (within the meaning of the *Australian*  
35 *National Registry of Emissions Units Act 2011*) or your  
36 nominee's foreign account (within the meaning of that  
37 Act); or

**Schedule 2** Taxation amendments

**Part 2** Amendments commencing at the same time as section 3 of the Clean Energy Act 2011 commences

- 
- 1 (iii) if the unit is an \*Australian carbon credit unit—your  
2 foreign account (within the meaning of the *Carbon*  
3 *Credits (Carbon Farming Initiative) Act 2011*) or your  
4 nominee’s foreign account (within the meaning of that  
5 Act);  
6 you are treated as if:  
7 (c) just before the transfer, you had sold the unit to someone else  
8 for its \*market value just before the transfer; and  
9 (d) you had, immediately after the sale, bought it back for the  
10 same amount.
- 11 Example: An Australian resident company carries on a business of trading in  
12 emission units. The company owns 10,000 emission reduction units (a  
13 type of international emissions unit) that are registered in Australia.  
14 5,000 of those units are transferred from the company’s Australian  
15 registry account to the company’s New Zealand registry account.
- 16 The company is treated as having sold each unit to someone else at its  
17 market value just before it stopped being a registered emissions unit.  
18 As the unit was a registered emissions unit, the market value is  
19 included in the company’s assessable income (section 420-25).
- 20 The company is also treated as having bought 5,000 emission  
21 reduction units for the same amount. As those units are trading stock,  
22 the company may be able to deduct that amount under section 8-1.

23 **420-40 Disposal of registered emissions units for a purpose other**  
24 **than gaining assessable income**

- 25 (1) If:
- 26 (a) an entity (the *first entity*) incurs expenditure in:  
27 (i) becoming the \*holder of a \*registered emissions unit; or  
28 (ii) ceasing to hold a registered emissions unit; and  
29 (b) the first entity has deducted or can deduct the expenditure  
30 under section 420-15 or 420-42; and  
31 (c) the first entity ceases to hold the unit in a particular income  
32 year; and  
33 (d) the cessation is neither:  
34 (i) in gaining or producing the first entity’s assessable  
35 income; nor  
36 (ii) in carrying on a \*business for the purpose of gaining or  
37 producing the first entity’s assessable income; and

1 (e) section 420-30 (non-arm's length transactions and  
2 transactions with associates) did not apply to the first entity  
3 ceasing to hold the unit;  
4 the first entity's assessable income for that income year includes an  
5 amount equal to the amount the first entity has deducted or can  
6 deduct.

7 *Death*

8 (2) If:  
9 (a) the first entity is an individual; and  
10 (b) the cessation is because of the first entity's death; and  
11 (c) the \*registered emissions unit devolves to the first entity's  
12 \*legal personal representative;  
13 then:  
14 (d) the first entity's legal personal representative is treated as  
15 having bought the unit for the amount included in the first  
16 entity's assessable income under subsection (1); and  
17 (e) if the unit \*passes to a beneficiary in the first entity's estate:  
18 (i) the first entity's legal personal representative is treated  
19 as having disposed of the unit for the amount included  
20 in the first entity's assessable income under  
21 subsection (1); and  
22 (ii) the beneficiary is treated as having bought the unit for  
23 the amount included in the first entity's assessable  
24 income under subsection (1).

25 (3) If:  
26 (a) the first entity is an individual; and  
27 (b) the cessation is because of the first entity's death; and  
28 (c) the \*registered emissions unit \*passes to a beneficiary in the  
29 first entity's estate without devolving to the first entity's  
30 \*legal personal representative;  
31 the beneficiary is treated as having bought the unit for the amount  
32 included in the first entity's assessable income under  
33 subsection (1).

34 *Transfer—treatment of acquirer*

35 (4) If:

**Schedule 2** Taxation amendments

**Part 2** Amendments commencing at the same time as section 3 of the Clean Energy Act 2011 commences

---

- 1 (a) the cessation is because of the transfer of the unit to another  
2 entity; and  
3 (b) neither subsection (2) nor (3) applies;  
4 the other entity is treated as having bought the unit for the amount  
5 included in the first entity's assessable income under  
6 subsection (1).
- 7 (5) If subsection (4) applies to the transfer of the unit to another entity:  
8 (a) the first entity must inform the other entity that, as a result of  
9 subsection (4) applying, the other entity is treated as having  
10 bought the unit for a particular amount; and  
11 (b) the first entity must do so:  
12 (i) at, or as soon as practicable after, the time of the  
13 transfer; or  
14 (ii) by a later time allowed by the Commissioner.

15 *Source*

- 16 (6) An amount included in the first entity's assessable income under  
17 subsection (1) is taken, for the purposes of the \*income tax laws, to  
18 have a source in Australia.

19 **420-41 Ceasing to be taxable in Australia on the proceeds of sale of**  
20 **registered emissions units**

21 If:

- 22 (a) you start to \*hold a \*registered emissions unit; and  
23 (b) assuming that you had sold the unit to someone else  
24 immediately after you started to hold the unit, the proceeds of  
25 sale would have been included in your assessable income  
26 under section 420-25; and  
27 (c) you hold the unit until a later time (the *taxable status*  
28 *cessation time*), where the following conditions are satisfied:  
29 (i) assuming that you had sold the unit to someone else  
30 immediately before the taxable status cessation time, the  
31 proceeds of the sale would have been included in your  
32 assessable income under section 420-25;  
33 (ii) assuming that you had sold the unit to someone else at  
34 the taxable status cessation time, the proceeds of sale  
35 would not have been included in your assessable income  
36 under section 420-25;
-

- 1                   you are treated as if:
- 2                   (d) just before the taxable status cessation time, you had sold the
- 3                   unit to someone else for its \*market value; and
- 4                   (e) you had, at the taxable status cessation time, bought it back
- 5                   for the same amount.

6                   Note:        Under the *International Tax Agreements Act 1953*, for some foreign

7                   residents, the proceeds of the sale of a registered emissions unit are

8                   not assessable income in Australia.

9                   **420-42 Deduction for expenses incurred in ceasing to hold a**

10                   **registered emissions unit**

- 11                   (1) You can deduct expenditure to the extent that you incur it in
- 12                   ceasing to \*hold a \*registered emissions unit.

13                   *Timing*

- 14                   (2) You deduct the expenditure in the income year in which you cease
- 15                   to \*hold the \*registered emissions unit.

16                   **420-43 Deduction for charge imposed on the surrender of an eligible**

17                   **international emissions unit**

- 18                   (1) You can deduct an amount of charge imposed by the *Clean Energy*
- 19                   (*International Unit Surrender Charge*) *Act 2011* on the surrender
- 20                   by you of an eligible international emissions unit (within the
- 21                   meaning of the *Australian National Registry of Emissions Units*
- 22                   *Act 2011*).

23                   *Timing*

- 24                   (2) You deduct the amount in the income year in which you pay the
- 25                   amount.

8	420-58	Value of registered emissions units at end of income year—certain free
9		carbon units
10	420-60	Cost of registered emissions units

**420-45 You include the value of your registered emissions units in working out your assessable income and deductions**

- (1) You compare:
- (a) the \*value of all \*registered emissions units you \*held at the start of the income year; and
  - (b) the value of all registered emissions units you held at the end of the income year.

*Increase in value is included in assessable income*

- (2) Your assessable income includes any excess of the \*value at the end of the income year over the value at the start of the income year.

*Decrease in value is a deduction*

- (3) On the other hand, you can deduct any excess of the \*value at the start of the income year over the value at the end of the income year.

*Source*

- (4) An amount included in your assessable income under subsection (2) is taken, for the purposes of the \*income tax laws, to have a source in Australia.

*Disregard value of unit if sale proceeds would not be assessable*

- (5) For the purposes of this Subdivision, disregard the \*value of a \*registered emissions unit you \*held at the end of the income year if, assuming that you had sold the unit to someone else immediately after you started to hold the unit, the proceeds of the

1 sale would not have been included in your assessable income under  
2 section 420-25.

3 Note: Under the *International Tax Agreements Act 1953*, for some foreign  
4 residents, the proceeds of the sale of a registered emissions unit are  
5 not assessable income in Australia.

#### 6 **420-50 Value of registered emissions units at start of income year**

- 7 (1) The *value* of a \*registered emissions unit you \*held at the start of  
8 an income year is the same amount at which it was taken into  
9 account under this Subdivision at the end of the last income year.
- 10 (2) The *value* of the unit is a nil amount if the unit was not taken into  
11 account under this Subdivision at the end of the last income year.

#### 12 **420-51 Valuation methods**

- 13 (1) The *value* of a \*registered emissions unit you \*held at the end of an  
14 income year is worked out using one of the following methods:  
15 (a) the \*FIFO cost method;  
16 (b) the \*actual cost method;  
17 (c) the \*market value method.  
18 Sections 420-55 and 420-57 tell you which method applies.
- 19 (2) This section has effect subject to section 420-58 (certain free  
20 carbon units).

#### 21 **420-52 FIFO cost method of working out the value of units**

22 The *FIFO cost method* for working out the \*value of the  
23 \*registered emissions units you \*held at the end of an income year  
24 means that the value of the units is the \*cost of the registered  
25 emissions units, and, for the purposes of the application of this  
26 Subdivision to you for the income year:

- 27 (a) if any of the registered emissions units are:  
28 (i) \*carbon units that have a \*vintage year that is the same  
29 as, or earlier than, the financial year to which the  
30 income year relates; or  
31 (ii) eligible international emissions units (within the  
32 meaning of the *Australian National Registry of*  
33 *Emissions Units Act 2011*); or

**Schedule 2** Taxation amendments

**Part 2** Amendments commencing at the same time as section 3 of the Clean Energy Act 2011 commences

---

- 1 (iii) \*Australian carbon credit units;  
2 you must account for those units on a first-in first-out basis;  
3 and  
4 (b) if:  
5 (i) any of the registered emissions units are carbon units  
6 that have the same vintage year; and  
7 (ii) that vintage year is later than the financial year to which  
8 the income year relates;  
9 you must account for those units on a first-in first-out basis;  
10 and  
11 (c) if any of the registered emissions units are \*Kyoto units that  
12 are not eligible international emissions units (within the  
13 meaning of the *Australian National Registry of Emissions*  
14 *Units Act 2011*)—you must account for those units on a  
15 first-in first-out basis.

16 **420-53 Actual cost method of working out the value of units**

17 The *actual cost method* for working out the value of the \*registered  
18 emissions units you \*held at the end of the income year means that  
19 the value of the units is the \*cost of the units, and, for the purposes  
20 of the application of this Subdivision to you for the income year,  
21 you must not account for any of those units on a first-in first-out  
22 basis.

23 **420-54 Market value method of working out the value of units**

24 The *market value method* for working out the value of the  
25 \*registered emissions units you \*held at the end of the income year  
26 means that the value of the units is the \*market value of the units at  
27 the end of the income year.

28 **420-55 Valuation method for first income year at the end of which**  
29 **you held registered emissions units**

30 *Scope*

- 31 (1) This section applies if:  
32 (a) you \*held one or more \*registered emissions units at the end  
33 of an income year; and
-

1 (b) the income year is the first income year at the end of which  
2 you held one or more registered emissions units.

3 *Choice of method*

4 (2) You may choose one of the following methods:

5 (a) the \*FIFO cost method;

6 (b) the \*actual cost method;

7 (c) the \*market value method;

8 for working out the *value* of the \*registered emissions units you  
9 \*held at the end of the income year.

10 *FIFO cost method applies if no choice made*

11 (3) If you do not make a choice under subsection (2) for the income  
12 year, the *value* of the \*registered emissions units you \*held at the  
13 end of the income year is worked out using the \*FIFO cost method.

14 *Time for making choice*

15 (4) You must make a choice under subsection (2) before you lodge  
16 your \*income tax return for the income year for which you make  
17 the choice.

18 *No revocation of choice*

19 (5) A choice made under subsection (2) cannot be revoked.

20 *Certain free carbon units*

21 (6) This section has effect subject to section 420-58 (certain free  
22 carbon units).

23 **420-57 Valuation method for later income years at the end of which**  
24 **you held registered emissions units**

25 *Scope*

26 (1) This section applies if:

27 (a) you \*held one or more \*registered emissions units at the end  
28 of an income year (the *current income year*); and

29 (b) the current income year is not the first income year at the end  
30 of which you held one or more registered emissions units.

  - (c) the \*market value method;
- for working out the **value** of the \*registered emissions units you \*held at the end of the current income year.

*Previous method applies if no choice made*

- (3) If you do not make a choice under subsection (2) for the current income year, the **value** of the \*registered emissions units you \*held at the end of the current income year is worked out using the method that applied to the most recent income year at the end of which you held one or more registered emissions units.

*Limitation on choice—before 2015-16 income year*

- (4) If the current income year is before the 2015-16 income year, you must not make a choice under subsection (2) for the current income year if you have previously made a choice under that subsection for an earlier income year.

*Limitation on choice—2015-16 income year or a later income year*

- (5) If the current income year is:
- (a) the 2015-16 income year; or
  - (b) a later income year;
- you must not make a choice under subsection (2) for the current income year unless:
- (c) the same method applied for each of the 4 most recent income years at the end of which you \*held one or more \*registered emissions units; and
  - (d) the method mentioned in paragraph (c) is different from the method to which your choice for the current income year relates.
-

1                                    *Limitation on choice—change from FIFO cost method to actual*  
2                                    *cost method*

- 3                                    (6) You must not choose under subsection (2) the \*actual cost method  
4                                    for the current income year if the \*FIFO cost method applied for  
5                                    the most recent income year at the end of which you \*held one or  
6                                    more \*registered emissions units.

7                                    *Time for making choice*

15                                   carbon units).

16                                   **420-58 Value of registered emissions units at end of income year—**  
17                                   **certain free carbon units**

18                                   *Scope*

- 19                                   (1) This section applies to a \*carbon unit with a particular \*vintage  
20                                   year if:  
21                                       (a) it was issued to you in accordance with the Jobs and  
22                                              Competitiveness Program (within the meaning of the *Clean*  
23                                              *Energy Act 2011*); and  
24                                       (b) you \*held it throughout the period:  
25                                           (i) beginning when it was issued to you; and  
26                                           (ii) ending at the end of an income year that ended before  
27                                              1 February in the financial year next following the

29                                   *Value*

**Schedule 2** Taxation amendments

**Part 2** Amendments commencing at the same time as section 3 of the Clean Energy Act 2011 commences

---

- 1 (3) For the purposes of:  
2 (a) subsection 420-57(3); and  
3 (b) paragraph 420-57(5)(c);  
4 the method that applied to a previous income year mentioned in  
5 that subsection or paragraph, as the case may be, is the method that  
6 would have applied if this section had not been enacted.

7 **420-60 Cost of registered emissions units**

8 *Free carbon units*

- 9 (1) If a \*carbon unit was issued to you free of charge under the *Clean*  
10 *Energy Act 2011*, the *cost* of the unit is its \*market value  
11 immediately after you began to \*hold the unit.  
12 (2) Subsection (1) does not affect the operation of section 420-58.

13 *Australian carbon credit units*

- 14 (3) If an \*Australian carbon credit unit was issued to you under the  
15 *Carbon Credits (Carbon Farming Initiative) Act 2011*, the *cost* of  
16 the unit is its \*market value immediately after you began to \*hold  
17 the unit.

18 *Other registered emissions units*

- 19 (4) If a \*registered emissions unit (other than an \*Australian carbon  
20 credit unit) was not issued to you free of charge under the *Clean*  
21 *Energy Act 2011*, the *cost* of the unit is the total of the expenditure  
22 that you:
