My reasons for granting the exemption dated 6 August 1976 are that:

- (a) it would be prejudicial to the interests of Australia; and
- (b) it would be otherwise contrary to the public interest, for the requirements of the Procedures to apply in relation to the proposed action referred to in the exemption.

In concluding that the exemption should be granted, I have had regard to the following amongst other matters—

- (1) that the supply contract under which the delivery is to be made was approved on behalf of the Commonwealth in 1970, that is to say, at a time before the *Environment Protection (Impact of Proposals) Act 1974* and the *Environment Protection Administrative Procedures* entered into force;
- (2) that successive Governments have publicly stated that it is their policy to permit contracts of this kind to be honoured;
- (3) that, nevertheless, the Government would, if it is practicable, wish to have available the report of the *Environment Inquiry on Uranium Development in the Northern Territory* directed on 12 June 1975 before uranium oxide is exported from Australia in fulfilment of the contracts referred to above;
- (4) that the agreement or arrangement proposed to be entered into would permit the supply contract to be honoured and would also facili-

tate the achieving of the Government's desire referred to in (3) above;

- (5) that the United States of America is a Party to the Treaty on the Non-Proliferation of Nuclear Weapons done at London, Moscow and Washington on 1 July 1968;
- (6) that officers of the Australian Atomic Energy Commission have advised that stringent controls will apply under relevant law in the United States of America in relation to the accountability for, and the conversion and use of, the uranium oxide and derivatives therefrom, and in relation to the storage and disposal of waste material resulting therefrom;
- (7) that, in the circumstances, a default by Mary Kathleen Uranium Limited under its agreement with Commonwealth Edison Company would be prejudicial to Australia's international trading reputation and to the possible successful establishments of an Australian uranium industry, should the Government decide, in the light of the report of the *Environmental Inquiry on Uranium Development in the Northern Territory*, to support the development of such an inquiry;
- (8) that, in the circumstances, for the present Government not to take all reasonable steps to facilitate the honouring of the contract would be prejudicial to the international credibility of Australian Governments.

Dated this sixth day of August 1976.
