Automotive Industry Authority Act 1984

DIRECTIONS TO THE AUTHORITY PURSUANT TO SECTION 26M

I, JOHN NORMAN BUTTON, Minister of State for Industry, Technology and Commerce, pursuant to Section 26M of the *Automotive Industry Authority Act 1984* ("the Act"), give the following directions with respect to the policies and practices to be followed by the Authority when entering into grant agreements under Part IVA of the Act:

1. The Authority shall first satisfy itself with respect to an eligible company and any automotive development project proposed by it that;

(a) the project may reasonably be expected to result in the development of a new or substantially improved eligible product of Australian design,

(b) the project is consistent with the Government's objectives for the development of the automotive industry, and for this purpose the Authority shall take into account such factors as the extent to which the project:

- promotes greater integration and domestication of the industry's skills and facilities, including design, research and production facilities,
- improves economies of scale of the industry,
- increases export activity of the industry,
- promotes cost containment or cost reduction for the industry,
- increases standardisation within the industry,
- has or is likely to receive significant market acceptance, and
- results in benefits accruing to other local businesses and industries,

(c) the project is within the capability of the applicant and for this purpose, the Authority shall take into account;

- the facilities available for the proposed project, including qualified staff of the applicant,
- the known recent financial performance of the applicant,
- the extent of previous research endeavours, and the success, or otherwise, of those endeavours in respect of the applicant,
- the quality control system and quality control performance of the applicant,
- the marketing expertise of the applicant to progress the project to exploitation on normal commercial terms,
- the expected period required before the results of the proposed project may be exploited,
- the extent to which dependence on overseas technology, or on other factors, may restrict the applicant's ability to exploit the results of the project in international markets,
- any present or possible restrictions on the development by the applicant of export markets for the product resulting from the project,

and;

(d) the commercial prospects of the proposed project are commensurate with the risks involved.

2. Where, with regard to 1 (c) above, the Authority considers the applicant does not have the capability to undertake all of the matters associated with a proposed project, the Authority shall satisfy itself that the applicant has demonstrated that any matter beyond its capability will be undertaken to the Authority's satisfaction by another person.

3. (a) The Authority shall determine the extent of any financial assistance that may be provided to the applicant, having regard to the extent to which the proposed project will improve the applicant's ability both to contribute to the sound development of the automotive industry and to act in accordance with Government policy, and without limiting the criteria for assessing the foregoing, the Authority shall assess those abilities having regard to the applicant's present or potential capability to;

- compete in the domestic market against import competition, and
- develop export markets for the eligible product resulting from any such financial assistance,

(b) In addition to (a) above, the Authority shall, in determining the extent of any financial assistance that may be provided to an applicant, have regard to all other proposed projects for which it is considering providing financial assistance under Part IVA of the Act and shall have regard to the extent to which each proposed project and applicant satisfies the matters referred to in clause (a) above in determining the amount of financial assistance to be provided for the respective proposed project.

(c) Those aspects of the proposed project which fall within paragraph (a) (i) of the definition of automotive development project in Sub-section 4 (1) of the *Automotive Industry Authority Act 1984*, shall be supported at the prevailing rate of grant assistance being applied generally to project grants made under the Industrial Research and Development Incentives Act, while other aspects of the proposed project shall attract, as a minimum, a rate of grant assistance of 25 per cent.

4. In determining whether a project is to be supported, and the extent of such support, the Authority shall;

(a) take into account the extent to which the applicant will contribute to the fulfilment of the Government's Motor Vehicle Policy,

- in considering (a) the Authority shall have particular regard to matters relating to, but not limited to;
 - model reduction
 - facility sharing
 - product sharing
 - export
 - investment
 - the design, manufacture and/or use of common components

and the proposed timing of action in regard to these matters by the applicant,

(b) where the Authority determines that the applicant will contribute to the fulfilment of the Government's Motor Vehicle Policy, include in any grant agreement, in addition to any provisions relating to

the proposed project, provisions relating to, but not limited to, any one or more of the following:

- model reduction
- facility sharing
- product sharing
- export
- investment
- the design, manufacture and/or use of common components

and the timing of implementation of changes in these areas by the applicant.
