The ABA is required to renew these licences unless it decides that an applicant is no longer a suitable licensee.

A company is a suitable licensee if the ABA does not decide that sub-section 41(2) (for commercial) or 83(2) (for community) of the Act applies to the company.

The ABA may decide that either section 41(2) or 83(2) of the Act applies to a licensee if it is satisfied that allowing the licensee to provide or continue to provide either a commercial or a community broadcasting service under a licence would lead to a significant risk of:

- (a) an offence against the Act or the regulations being committed; or
- (b) a breach of the conditions of the licence occurring.

In deciding whether these sub-sections apply, the ABA is required by sections 41(3)(commercial) and 83(3)(community) of the Act, to take into account:

- (a) the business record of the company; and
- (b) the company's record in situations requiring trust and candour; and
- (c) (commercial) the business record of each person who is, or would be, if a licence were allocated to the applicant, in a position to control the licence; or (community) the business record of the chief executive and each director and secretary of the applicant; and
- (d) the record in situations requiring trust and candour of each such person; and
- (e) whether the company, or a person referred to in paragraph (c) or (d), has been convicted of an offence against this Act or the regulations.

Nothing in the provisions of the Act requires the ABA to hold an investigation or a hearing into whether a licence should be renewed.

EXEMPTION OF THE AUSTRALIAN CAPITAL TERRITORY FROM THE ENVIRONMENT PROTECTION (IMPACT OF PROPOSALS) ACT 1974

I, John Philip Faulkner, Minister for the Environment, Sport and Territories, ACTING UNDER paragraphs 11.4 and 11.5 of the *Environment Protection (Impact of Proposals) Administrative Procedures* ('the Procedures'), approved under section 6 of the *Environment Protection (Impact of Proposals) Act 1974* ('the Impact Act'), HAVING TAKEN INTO ACCOUNT all matters relevant under paragraph 11.3.1 of the Procedures AND HAVING HAD REGARD TO the general principle outlined in paragraph 11.3.2 of the Procedures, HEREBY GIVE NOTICE that I am granting an exemption to the Australian Capital Territory ('ACT') as established under section 7 of the *Australian Capital Territory (Self-Government) Act 1988* (Cth) and all authorities of the ACT, from the requirements of the Procedures in respect of proposed actions or classes of actions on land being non-designated Territory land, as defined in the *ACT (Planning and Land Management) Act 1988* to which the provisions of the *Land (Planning and Environment) Act 1991* (ACT) apply.

13 SEP 1994

Summary of Reasons: The reason for the granting of this exemption is that the ACT and its authorities are authorities of the Commonwealth for the purposes of the *Impact Act* and that the *Impact Act* and the *Procedures* would therefore apply to them in all circumstances, including in respect of non-designated Territory land. This is contrary to the policy of the Commonwealth Government which intends that all matters affecting the administration of non-designated Territory land should be the responsibility of the ACT and its authorities.

ESTRAPAK 50 combination pack oestradiol 4mg transdermal patches and medroxyprogesterone acetate tablets 10 mg.

Ciba-Geigy Australia Pty Limited.

Extension of Indications: Estraderm/Estrapak prevents the accelerated loss of bone density due to oestrogen deficiency and may be used for the prevention of post-menopausal bone mineral density loss. The effect is seen only while oestrogen replacement therapy continues and discontinuation may re-establish the natural rate of bone loss. As yet there is no evidence of the minimum duration of oestrogen replacement therapy for the younger post-menopausal woman which will be effective in reducing fracture subsequently at the age of greatest fracture risk of >75 years of age.

Serono Australia Pty Ltd.

Indications: For use by the intramuscular route, for the stimulation of follicular development in patients with hypothalamic-pituitary dysfunction, who present with either oligomenorrhoea or amenorrhoea (WHO Group II). Patients should be selected carefully according to the following guidelines:

1. Before treatment a thorough gynaecological and endocrinological evaluation must be performed, to exclude tubal pathology and document anovulation.
2. Primary ovarian failure should be excluded by determination of serum FSH and LH.
3. Appropriate tests should be performed to rule out the presence of early pregnancy
4. Aetiology of any abnormal vaginal bleeding should be established before starting urofollitrophin therapy.
5. Evaluation of semen quality of the prospective father.

FOSCAVIR foscarnet sodium 24 mg/mL, intravenous injection.

Astra Pharmaceuticals Pty Ltd.

Extension of Indications: To include the treatment of acyclovir resistant herpes simplex virus (HSV) infection (defined by clinical trial or in vitro resistance) in immunocompromised patients with HIV infection.

The recommended dose is 40 mg/kg by slow intravenous infusion (over one hour) every eight hours for two to three weeks or until the lesions heal. Appropriate dose modification is required in patients with impaired renal function.

INHIBACE cilazapril 0.5, 1.0, 2.5 or 5 mg tablets.

Roche Products Pty Limited.

Indications: The treatment of mild to moderate essential hypertension. The maintenance dose range is 2.5 to 5 mg per day, whereas the recommended dose for the first two days is 1 mg to 1.25 mg per day. Dosage should be adjusted individually in accordance with the blood pressure response.

KOGENATE factor VIII [rDNA] [bhk] 250 IU, 500 IU and 1000 IU with diluent, powder for reconstitution for injection.

Bayer Australia Ltd.

Indications: For use in haemophilia A (congenital factor VIII deficiency) for the treatment and prophylaxis of bleeding in previously treated and untreated patients; and in patients with factor VIII inhibitors (neutralising antibodies) who continue to respond to recombinant factor VIII (i.e. achievement of haemostasis).

KYTRIL granisetron (as hydrochloride) 3mg solution, intravenous injection.

SmithKline Beecham (Australia) Pty Ltd.

Indications: For use in adults for the prevention and treatment of nausea and vomiting induced by cytotoxic chemotherapy. Granisetron is administered at a dose of 3 mg diluted in 20 to 50 mL of infusion fluid, as an intravenous infusion over 5 minutes, starting within 30 minutes before the start of cytotoxic therapy. In the small proportion of patients with breakthrough nausea and vomiting, up to two additional 5 minute infusions of 3 mg can be administered at least 10 minutes apart within a 24 hour period. The maximum dose should be 9 mg in 24 hours.

PULMOZYME containing dornase alfa (recombinant human deoxyribonuclease 1) 2.5 mg (2500 units) per ampoule, inhalational solution.

Roche Products Pty Ltd.

Indications: For the management of demonstrated respiratory complications in patients over 5 years of age with cystic fibrosis with a FVC >40% of the predicted value. Continued use is dependent upon the demonstration of a sustained benefit, based on clinical response and pulmonary function tests. The dose should be 2.5 mg, administered by nebuliser, once daily.

TAXOL paclitaxel 30 mg/5 mL injection.

Bristol-Myers Squibb Pharmaceuticals.

Extension of Indications: The treatment of metastatic carcinoma of the breast after failure of standard therapy, to be administered by intravenous infusion at a dose of 175 mg/m², over three hours, every three weeks.

The 173rd Meeting of the Australian Drug Evaluation Committee (ADEC) (6 October 1994) resolved to advise the Minister for Family Services, and the Secretary, Department of Human Services and Health, that the following drug and drug products should be approved for registration, subject to resolution of all outstanding matters to the satisfaction of the Committee and the Therapeutic Goods Administration. The recommendation for approval is subject to specific conditions.

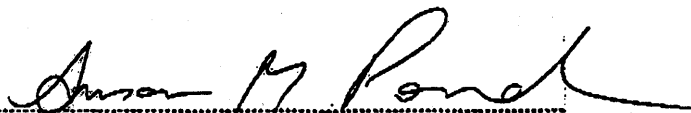

COGNEX, tacrine (as hydrochloride and base) 10, 20, 30 and 40 mg capsules.

Parke Davis Pty Ltd.

Indications: For the treatment of dementia in patients with Alzheimer's disease of mild to moderate severity, subject to the adoption of the following guidelines for prescribing:

1. Establishment of a probable diagnosis of mild to moderate Alzheimer's disease, based on formal assessment of cognition, functional status and activities of daily living.
2. Patients and care givers should be advised that the individual patient's response to tacrine is unpredictable and the success rate, even at the highest doses, is relatively low. Patients who may respond cannot be identified *a priori*.
3. The dosage will be titrated at 6 weekly intervals, commencing at 40 mg/day (10 mg qid) and progressing to a maximum of 160 mg/day (40 mg qid), depending on the tolerance to side effects. The responsibility of the carer in monitoring and reporting side effects to the prescribers, should be emphasised.
4. Advice should be given on the importance of compliance with the four times daily dosage regimen. Administration should be between meals if possible, depending on the patient's medical history and response to the cholinergic effects of tacrine.
5. Description of the requirements for close and regular monitoring of liver function and blood counts.
6. Having attained the maximum tolerated dose, the decision to stop or continue therapy should be based on clear evidence of benefit, such as continued improvement or stabilisation of the parameters outlined in (1), and the general well-being of the patient.
7. If a decision to stop the drug is made on the basis of acknowledged failure, there should be a gradual reduction in dose (when possible). In patients who have responded, a reduction in the emergence of rapid decline in cognitive function and behavioural disturbances may be avoided by a gradual reduction in dose.

8. In the occasional young patient with dementia, advice on the risks of pregnancy while taking tacrine is essential.

 - (iii) ensuring that employers provide certain equipment and facilities, and provide for the testing and monitoring at workplaces where lead processes are conducted, and
 - (iv) ensuring that emergency services and other relevant public authorities have access to relevant information on lead;
- (b) ensure that an employer controls lead exposure at the source in workplaces where lead processes are conducted;
- (c) ensure that an employer provides for the health surveillance of employees who work in lead-risk jobs;

- (e) prohibit certain activities at workplaces where lead processes are conducted;
- (f) ensure that information on lead exposures is available to public authorities (to be defined on a jurisdiction by jurisdiction basis);
- (g) ensure that the *National Standard for the Control of Inorganic Lead at Work* [NOHSC:1012(1994)] and *National Code of Practice for the Control and Safe Use of Inorganic Lead at Work* [NOHSC:2015(1994)] are reviewed within four years; and
- (h) progressively reduce lead exposure and blood lead levels to convert existing lead-risk jobs to non lead-risk jobs.

HOW COPIES MAY BE OBTAINED

DECLARATION No 5**

I, Frederick George Herbert Pooley, Insurance and Superannuation Commissioner, pursuant to subsection 333(1) of the *Superannuation Industry (Supervision) Act 1993* and subsection 33(3) of the Acts Interpretation Act 1901, AMEND temporary modification declaration number 5, which was made by me on 29 July 1994:

1. By omitting "**6.** ~~By~~ inserting after subsection 50(4) the following:" and substituting "**6.** ~~By~~ inserting after subsection 50(6) the following:"
2. By omitting "(4A)" wherever it appears and substituting "(6A)"
3. By omitting "(4B)" wherever it appears and substituting "(6B)"

Dated 27 October 1994

Commissioner

Superannuation Industry (Supervision) Act 1993

**AMENDMENT OF TEMPORARY MODIFICATION
DECLARATION No 5**

EXPLANATORY MEMORANDUM

1. On 21 October 1994 the Commissioner made temporary modification declaration number 6, which added a new subsection (4A) to section 50 of the Superannuation Industry (Supervision) Act 1993 (the "Act").
2. Temporary modification declaration number 5 has in fact already added a subsection (4A), as well as a subsection (4B), to section 50.
3. The making of temporary modification declaration number 6 thus resulted in there being two subsections (4A) in section 50 - the one added by temporary modification declaration number 5, and the one added by temporary modification declaration number 6. This was merely a clerical error which did not affect the legal validity of either temporary modification declaration.
4. To correct this anomaly, the amendment to temporary modification declaration number 5 changes the numbering of the subsections (4A) and (4B) which are set out in temporary modification declaration number 5 from "(4A)" and "(4B)" to "(6A)" and "(6B)" respectively.
5. Section 50 of the Act will thus have only one subsection (4A), namely the one added by temporary modification declaration number 6.

EXPLANATORY STATEMENT

Issued by the Authority of the Minister for Aboriginal
and Torres Strait Islander Affairs

Aboriginal and Torres Strait Islander Commission Act 1989

REGIONAL COUNCIL ELECTION RULES (AMENDMENT NO 4)

This Amendment to the Regional Council Election Rules was made under section 113 of the *Aboriginal and Torres Strait Islander Commission Act 1989* (the ATSIC Act).

Section 113 of the ATSIC Act provides that the Minister may after consulting the Aboriginal and Torres Strait Islander Commission and the Electoral Commissioner make Rules prescribing matters including the nomination of candidates for election to a Regional Council and the scrutiny of votes subsequent to that election.

The Amendment to Rule 9 will require a candidate at a Regional Council election to be enrolled in the ward for which he or she is standing for election. This amendment is necessary because of the introduction of the ward system of voting which was introduced by the *Aboriginal and Torres Strait Islander Commission Amendment Act (No 2) 1993*. The Amendment will enable the Australian Electoral Commission to reject a nomination if a candidate is not enrolled in respect of the ward for which he or she is nominating.

The *Aboriginal and Torres Strait Islander Commission Amendment Act (No 2) 1993* inserted a new schedule 2A as a method of determining the successful candidate at an election for a single member of a Regional Council ward. Consequentially section 111 of the ATSIC Act was amended to require votes at all elections for casual vacancies to be

counted in accordance with Schedule 2A. The Amendment to Rule 92 will require the officer conducting the scrutiny of votes in a Regional Council election for a casual vacancy to deal with the ballot papers in accordance with Schedule 2A of the ATSIC Act.

The Amendment to Rule 130 will require further elections for members of Regional Council wards following the partial failure of an election to be conducted in accordance with the Rules.

This Amendment to the Rules took effect from the date of notification in the Gazette.
