## COMMONWEALTH OF AUSTRALIA

### *Prices Surveillance Act 1983*

#### **DIRECTION NO 20**

I, Joe Hockey, Minister for Financial Services and Regulation, pursuant to section 20 of the *Prices Surveillance Act 1983*, hereby direct the Australian Competition and Consumer Commission (ACCC), in exercising its powers and performing its functions under the Act in relation to the pricing of services at Adelaide, Alice Springs, Brisbane, Canberra, Coolangatta, Darwin, Hobart, Launceston, Melbourne, Perth and Townsville airports, to give special consideration to the following matters:

- (1) Services that have been notified for the purposes of sub-section 21(1) of the *Prices Surveillance Act 1983* (declared services) are to be subject to a price cap. The price cap will be a  $CPI - X$  (Consumer Price Inflation *minus* X) price cap.
- (2) The CPI measure used will be the Treasury Underlying Rate of Consumer Price Inflation, recorded in the year to the previous March quarter, as determined by the ACCC, and adjusted to exclude the impact on the price index of *A New Tax System*.
- (3) The value of the 'X' in each airport's price cap reflects productivity improvements which the Government considers can be made in the provision of declared services at each airport. The Government has determined the following 'X' values to apply in each year of the price cap:
  - (a) 4.0 per cent for Adelaide airport;
  - (b) 3.0 per cent for Alice Springs airport;
  - (c) 4.5 per cent for Brisbane airport;
  - (d) 1.0 per cent for Canberra airport;
  - (e) 4.5 per cent for Coolangatta airport;
  - (f) 3.0 per cent for Darwin airport;
  - (g) 3.0 per cent for Hobart airport;
  - (h) 2.5 per cent for Launceston airport;
  - (i) 4.0 per cent for Melbourne airport;
  - (j) 5.5 per cent for Perth airport;
  - (k) 1.0 per cent for Townsville airport.
- (4) The starting point for the price cap arrangements are the Federal Airports Corporation prices introduced on 1 January 1997, as adjusted in accordance with the price cap arrangements applying since that time, and accounting for under-recoveries or over-recoveries under those price cap arrangements.
- (5) The price equation to be subject to the cap is a modified revenue-weighted average price (MWP). Declared services are to be divided into components, each of which is based on a charging category. The percentage change in price for each component will be calculated and weighted according to each component's share of total revenue in the previous period.

The price cap formula in its general form is:

$$MWP^t = \sum_i S_i^{t-1} \Delta P_i^t$$

where

$$S_i^{t-1} = \frac{R_i^{t-1}}{\sum_i R_i^{t-1}} \quad \text{and} \quad \Delta P_i^t = \frac{P_i^t - P_i^{t-1}}{P_i^{t-1}} \times 100$$

The main variables in the price equation are:

- revenue shares ( $S_i$ ), which represents component  $i$ 's share of total aeronautical revenue;
- prices ( $P_i$ ), which represents the average price of  $i$  over the relevant time period;
- the percentage change in the price ( $\Delta P_i$ ) of component  $i$  from period to period; and
- revenue ( $R_i$ ) derived from component  $i$ .

Superscripts denote the time or period reference, while subscripts denote the service or charging component:

- $t$  denotes the current period (the year under consideration);
- $t-1$  denotes the previous period (the year prior to that under consideration); and
- and  $i$  denotes individual services or charging components.

(6) The ACCC is to allow any under-recoveries to be carried over between years within the five year duration of the price cap. The ACCC is to require over-recoveries to be passed back to customers within the following two years from the period of over-recovery (except in the case of year 4, where the over-recovery is to be passed back fully in year 5).

(7) Direct costs related to Government mandated security requirements are to be allowed 100 per cent pass-through in the price cap.

(8) Congestion charges employed as part of an airport demand management scheme under the *Airports Act 1996* are to be allowed 100 per cent pass-through in the price cap.

(9) The net impact of *A New Tax System*, as determined by the ACCC, is to be allowed pass-through in the price cap. In determining the net impact of *A New Tax System* the ACCC will have regard to *Price Exploitation Guidelines* and *Application of the Price Exploitation Guidelines to Regulated Industries: The Process*.

(10) Quality of service information obtained under Part 8 of the *Airports Act 1996* may be taken into account by the ACCC in assessing compliance with price cap arrangements. In reporting on the quality of service indicators, the ACCC will focus on the facilities and services provided by, or which could be substantially influenced by, the airport operator.

(11) New or varied charges on existing services and charges on new or varied services are to be factored into the price cap arrangements if the services are declared services.

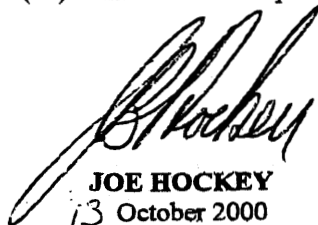

(12) The ACCC is to use the following criteria to guide its assessment of proposals to increase charges for declared services at a rate in excess of the price cap as a result of necessary new investment:

- (a) the operator's plans for new investment or service innovation and the associated costs;
- (b) the relationship between the proposed increases in charges and the costs (including the rate of return) of the new investment or service;
- (c) support from airport users with a significant interest in the investment for the operator's proposals, including in relation to charging changes;
- (d) contribution of the new investment/service to productivity improvements at the airport;
- (e) overall efficiency of the airport's operation;
- (f) the particular demand management characteristics of individual airports, including any demand management schemes in place, capacity constraints and any under-utilisation of airport infrastructure;
- (g) airport performance against quality of service measures, including services not directly under the control of the airport operator;
- (h) airport performance *vis-à-vis* other Australian airports and any comparable international airports; and
- (i) the extent to which the proposed investment will facilitate the operations of new entrants to domestic or international aviation.

While the ACCC must take the above into account in deciding whether to approve a proposal to increase charges outside the cap, in relation to new investment, each proposal will be considered on its merits having regard to the information available to the ACCC. The weight provided by the ACCC to each of the criteria may vary on a case-by-case basis.

The ACCC will provide a statement of reasons for its determination.
