SUBSECTION 8(5)**

I, Christopher Martin Ellison, Minister for Justice and Customs, pursuant to subsection 8(5) of the *Customs Tariff (Anti-Dumping) Act 1975* hereby give a direction in respect of clear float glass exported from Thailand to Australia by Bangkok Float Glass Co Ltd as described in the Notice signed by the Minister for Justice and Customs on 29 January 2000.

From the date of Gazettal of this Notice, I DIRECT that the dumping duty ascertained by reference to the value and quantity of the goods, is the amount, if any, by which the export price of the goods described in columns 1 and 2 in the table attached is less than the amount in column 3 (the normal value of the goods) or column 4 (the non injurious free-on-board price of the goods), whichever is the lesser.

Dated this **5<sup>TH</sup>** day of **APRIL** 2000.

  
CHRISTOPHER MARTIN ELLISON  
Minister for Justice and Customs

***Note: Because of confidentiality, the amounts shown in the Attachments to this notice will not be published.***

**DECLARATION ON REVIEW OF ANTI-DUMPING MEASURES**  
**PURSUANT TO SUBSECTION 269ZDB(1)**

I, CHRISTOPHER MARTIN ELLISON, Minister for Justice and Customs, pursuant to subsection 269ZDB(1) of the *Customs Act 1901* **DECLARE** that, for the purposes of the *Customs Act 1901* and the *Customs Tariff (Anti-Dumping) Act 1975*, to the extent that anti-dumping measures on wound/skin closure strips, classified within tariff classification subheading 3005.10.00 (statistical code 23) exported to Australia from France by Smith and Nephew SA involved the publication of a dumping duty notice, that with effect from date of publication of this notice, the dumping duty notice is to be taken to have effect, as if the Minister had fixed different non-injurious prices relevant to the determination of duty, as set out in the attached table.

This notice applies to wound/skin closure strips, classified within tariff classification subheading 3005.10.00 (statistical code 23) entered for home consumption on or after the date of publication of this notice.

Dated this **5<sup>TH</sup>** day of **APRIL** 2001

**CHRISTOPHER MARTIN ELLISON**  
Minister for Justice and Customs

**Note:** Because of confidentiality, the revised non-injurious prices will not be published.

**AUSTRALIAN  
CUSTOMS SERVICE**

**CUSTOMS ACT 1901 - PART XVB**

**NOTICE PURSUANT TO SECTION 269TL**

**CERTAIN WOUND/SKIN CLOSURE STRIPS  
FEDERAL REPUBLIC OF GERMANY  
FINDING**

The Australian Customs Service has completed its investigation into the alleged dumping of certain wound/skin closure strips (wound closure strips) exported to Australia from the Federal Republic of Germany by Beiersdorf AG.

The goods under investigation are wound/skin closure strips used to provide a sterile painless adhesive strip for the closure of wounds and to maintain wound edge approximation. The goods are marketed under the Leukostrip brand name and manufactured in Germany by Beiersdorf AG. The goods are classified within subheading 3005.10.00 statistical code 23 of the Customs Tariff Act 1995. Imports from Germany attract the general duty rate of 5 per cent.

In Trade Measures Report No. 30 Customs has concluded that:

- the wound closure strips from Beiersdorf AG are dumped; but
- Surgi Supplies International Pty Ltd (Surgi) has not suffered material injury; and
- there is no foreseeable and imminent threat of material injury from future dumping.

Customs recommended, and the Minister accepted, that no anti-dumping action be taken against wound closure strips exported from Germany.

Customs will not publicise normal values and export prices as they may reveal confidential details of the companies concerned.

Report No. 30 contains the reasons for Customs' recommendation and is available on request from the Trade Measures Office Management, Australian Customs Service, Canberra, telephone (02) 6275 6547 or on the internet at:  
<http://www.customs.gov.au/notices/reports/report30.htm>

Interested parties may request a review of the Minister's decision by lodging an application for review with the Trade Measures Review Officer in the approved form and manner within 30 days of the publication of this notice. The legislation relating to the review of ministerial decisions is set out in the *Customs Act 1901* commencing at s. 269ZZA.

Enquiries about this notice may be directed to Ms Phoebe Brown on (02) 6275 6953.

### COMMONWEALTH OF AUSTRALIA

### OCCUPATIONAL HEALTH AND SAFETY (COMMONWEALTH EMPLOYMENT) ACT 1991

#### NOTICE OF REVOCATION AND APPROVAL

##### Notice No. 1 of 2001

I, Anthony John Abbott, Minister for Employment, Workplace Relations and Small Business, under subsection 70 (1) of the *Occupational Health and Safety (Commonwealth Employment) Act 1991* ("the Act"):

- i) revoke the approval given by Notice No.H1 of 1994 for the application of a code of practice prepared by the National Occupational Health and Safety Commission ("NOHSC") and entitled *National Code of Practice for Noise Management and Protection of Hearing at Work* [NOHSC: 2009 (1993)]; and
- ii) approve the code of practice prepared by NOHSC and entitled *National Code of Practice for Noise Management and Protection of Hearing at Work* [NOHSC: 2009 (2000)] as a code of practice to apply generally for the purposes of the Act.

The revocation and the approval will each come into effect on and from the date of publication of this notice in the *Commonwealth of Australia Gazette*.

### THERAPEUTIC GOODS ACT 1989

#### PUBLICATION OF LIST OF MANUFACTURERS LICENSED TO MANUFACTURE THERAPEUTIC GOODS

I, R W Tribe (Chief GMP Auditor), delegate of the Secretary for the purpose of s.42 of the Therapeutic Goods Act, hereby publish a list of:

- the persons who are licensed to manufacture therapeutic goods pursuant to Part 4 of the Act,
- the steps of manufacture that each of those licences authorise; and
- the address of each of those premises to which the licences relate.

6 April 2001

#### Persons who are licensed:

*Lipa Pharmaceuticals Pty Ltd*

#### Classes of goods:

*Manufacture of non-sterile therapeutic goods for human use.*

#### The steps of manufacture:

*This licence authorises only the manufacture of therapeutic goods in the following product or product classes: non-sterile therapeutic goods. This licence authorises all steps in the manufacture of non-sterile solid, liquid and semi solid dosage forms.*

*This licence does not authorise the manufacture of preparations containing penicillins, cephalosporins, hormones, steroids or antineoplastic drugs.*

The address of premises to which the licence relates:  
*Lipa Pharmaceuticals Pty Ltd*  
ACN: 070 106 526  
21 Reaghs Farm Road  
MINTO NSW 2566

#### Persons who are licensed:

*Cosmetic Manufacturers (Aust) Pty. Ltd.*

#### Classes of goods:

*Manufacture of non-sterile therapeutic goods for human use.*

#### The steps of manufacture:

*This licence authorises only the manufacture of therapeutic goods in the following product or product classes: non-sterile therapeutic goods for human use.*

*This licence authorises all steps in the manufacture of creams and lotions.*

*This licence does not authorise the manufacture of any drug to which any Schedule of the Poisons Standard applies.*

The address of premises to which the licence relates:  
*Cosmetic Manufacturers (Aust) Pty. Ltd.*  
ACN: 010 501 327  
Unit 3, 10 Kingston Drive  
GAVEN QLD 4211

#### Persons who are licensed:

*St Vincent's Hospital (Melbourne) Limited trading as St Vincent's Pathology*

#### Classes of goods:

*Manufacture of therapeutic goods from human tissue.*

#### The steps of manufacture:

*This licence authorises only the manufacture of therapeutic goods in the following product or product classes: human tissue.*

*This licence authorises only the following tests: virology screening and syphilis testing.*

The address of premises to which the licence relates:  
*St Vincent's Hospital (Melbourne) Limited trading as St Vincent's Pathology*  
ACN: 052 110 755  
Microbiology Department  
41 Victoria Parade  
FITZROY VIC 3065

#### Persons who are licensed:

*Olive Leaf Australia Pty. Ltd.*

#### Classes of goods:

*Manufacture of non-sterile herbal therapeutic goods for human use.*

#### The steps of manufacture:

*This licence authorises only the manufacture of therapeutic goods in the following product or product classes: non-sterile herbal therapeutic goods for human use.*

*This licence authorises all steps in the manufacture of non-sterile liquid herbal products.*

*This licence does not authorise chemical and microbiological testing.*

The address of premises to which the licence relates:  
*Olive Leaf Australia Pty. Ltd.*  
ACN: 088 796 445  
767 Bischoffs Road  
COOMINYA QLD 4311

Persons who are licensed:

*Dolphin Products Proprietary Limited*

Classes of goods:

*Manufacture of sterile therapeutic goods for human use.*

The steps of manufacture:

*This licence authorises only the manufacture of therapeutic goods in the following product or product classes: sterile therapeutic devices.*

*This licence authorises all steps in the manufacture of allergen inoculation devices – except sterilisation.*

*This licence authorises the manufacture of sterile therapeutic goods only where the sterilisation process is carried out under contract by a third party.*

The address of premises to which the licence relates:

*Dolphin Products Proprietary Limited  
ACN: 004 241 945  
600 Waterdale Road  
HEIDELBERG WEST VIC 3081*

Persons who are licensed:

*Air Liquide Australia Limited*

Classes of goods:

*Manufacture of non-sterile therapeutic goods for human use.*

The steps of manufacture:

*This licence authorises only the manufacture of therapeutic goods in the following product or product classes: non-sterile therapeutic goods for human use, namely medical oxygen.*

*This licence authorises the following steps of manufacture: filling, testing, labelling and release for supply of medical oxygen.*

The address of premises to which the licence relates:

*Air Liquide Australia Limited  
ACN: 004 385 782  
11 Windsor Street  
INVERMAY TAS 7240*

Persons who are licensed:

*Arrow Pharmaceuticals Limited*

Classes of goods:

*Manufacture of non-sterile therapeutic goods for human use.*

The steps of manufacture:

*This licence authorises only the manufacture of therapeutic goods in the following product or product classes: tablets, capsules and powders for bioequivalence studies only.*

*This licence authorises all steps of manufacture except micronization of raw materials and testing. This licence authorises only the manufacture of drugs except preparations containing penicillins, cephalosporins, hormones, steroids or antineoplastic agents.*

The address of premises to which the licence relates:

*Arrow Pharmaceuticals Limited  
ACN: 088 417 403  
96 Merrindale Drive  
CROYDON SOUTH VIC 3136*

Persons who are licensed:

*Diamed Australia Pty. Limited*

Classes of goods:

*Manufacture of in-vitro diagnostic kits.*

The steps of manufacture:

*This licence authorises all steps in the manufacture of in-vitro diagnostic devices.*

*This licence authorises only the manufacture of in-vitro diagnostic reagents and kits.*

The address of premises to which the licence relates:

*Diamed Australia Pty. Limited  
ACN: 050 104 875  
14 Palmer Court  
MT WAVERLEY VIC 3149*

Persons who are licensed:

*Psiron Ltd*

Classes of goods:

*Manufacture of in-vitro diagnostic kits.*

The steps of manufacture:

*This licence authorises only the manufacture of therapeutic goods in the following product or product classes: in-vitro diagnostic kits.*

*This licence authorises all steps in the manufacture of non-sterile diagnostic reagents and kits.*

The address of premises to which the licence relates:

*Psiron Ltd  
ACN: 010 657 351  
Unit 8, 10 Anella Avenue  
CASTLE HILL NSW 2154*

**Persons who are licensed:**

**Pharmapak Technologies Pty Ltd**

**Classes of goods:**

*A single step in the manufacture of therapeutic goods for human use, namely: packaging and labelling.*

**The steps of manufacture:**

*This licence authorises the following steps of manufacture: a) primary packaging and labelling of non-sterile tablets, capsules, powders, liquids and creams; b) secondary packaging and labelling of sterile preparations when enclosed in final sealed containers; c) primary and secondary packaging and labelling of non-sterile devices and device kits; and d) release for supply.*

*The licence does not authorise the manufacture of: primary packaging of penicillins, cephalosporins, steroids, hormones or antineoplastic preparations, microdose preparations and drugs to which Schedule 8 of the Poisons Standard applies.*

**The address of premises to which the licence relates:**

**Pharmapak Technologies Pty Ltd  
ACN: 093 794 104  
Unit 10/7 Jubilee Avenue  
WARRIEWOOD NSW 2102**

---

**Persons who are licensed:**

**Intertek Testing Services (Australia) Pty. Ltd. trading as Probe Analytical**

**Classes of goods:**

*A single step in the manufacture of therapeutic goods for human use, namely: analysis and testing.*

**The steps of manufacture:**

*This licence authorises only the following steps of manufacture: analysis and testing of therapeutic goods for human use.*

*This licence authorises only the physical and chemical analysis and testing associated with the manufacture of therapeutic goods.*

**The address of premises to which the licence relates:**

**Intertek Testing Services (Australia) Pty. Ltd. trading as Probe Analytical  
ACN: 001 722 854  
Building 1  
19-23 Paramount Road  
WEST FOOTSCRAY VIC 3012**

---

**Persons who are licensed:**

**The Wheelchair & Disabled Association of Australia trading as House With No Steps and National House Group Packaging**

**Classes of goods:**

*A single step in the manufacture of therapeutic goods for human use, namely: packaging and labelling.*

**The steps of manufacture:**

*This licence authorises only the secondary packaging of therapeutic goods except any drug to which any Schedule of the Poisons Standard applies.*

**The address of premises to which the licence relates:**

**The Wheelchair & Disabled Association of Australia trading as House With No Steps and National House Group Packaging  
ACN: 001 813 403  
14 Grattan Crescent

## **GENETIC MANIPULATION ADVISORY COMMITTEE**

### **NOTICE OF RECEIPT OF PROPOSALS FOR DELIBERATE RELEASE OF GENETICALLY MODIFIED ORGANISMS**

#### **REQUEST FOR SUBMISSIONS**

The Genetic Manipulation Advisory Committee (GMAC) has received applications for the deliberate release of genetically modified organisms. The Committee invites written submissions on matters relevant to the environmental and safety issues of these proposals. Submissions should be received by GMAC within 30 days of the date of this Gazette.

All correspondence, including submissions and inquiries, should be addressed to:

The Secretary  
Genetic Manipulation Advisory Committee  
GPO Box 2183  
CANBERRA ACT 2601

Tel: 02 6271 4221  
Fax: 02 6271 4202  
Email: [gmac.secretariat@health.gov.au](mailto:gmac.secretariat@health.gov.au)

**PR-151: Field evaluation of transgenic cotton expressing a new insecticidal gene from *Bacillus thuringiensis***

**Organisation proposing release:** CSIRO Plant Industry  
GPO Box 1600  
Canberra ACT 2601

**Organism to be released:** Cotton (*Gossypium hirsutum*)

**Purpose of the release:** The aim of the release is to examine the field performance of a cotton line modified to express a novel insecticidal protein that confers resistance to caterpillar pests. In addition, seed increase of this new cotton line for subsequent trials and for an on-going breeding program will also be undertaken. The use of insect-resistant cotton plants has the potential to reduce the use of chemical pesticides on cotton crops.

**Brief description of the nature and effect of the genetic modification:** The cotton plants contain a new insecticidal gene derived from the bacterium *Bacillus thuringiensis*. The new insecticidal gene is a possible alternative to the Cry toxin gene that is present in the insect tolerant transgenic cotton (INGARD®) currently available to cotton growers. The insecticidal gene produces a protein that is toxic to the major caterpillar pests (*Helicoverpa armigera* and *H. punctigera*) that attack cotton.

In addition to the insecticidal gene, the plants contain a selectable marker gene that confers resistance to the antibiotic hygromycin.

**Location and size of trial:** Approximately 3000 plants in an area under 0.5 hectare spread over 2 fields at one site in the cotton-growing region of Narrabri (NSW).

**Further information:** The institution's contact officer for this proposal is Dr Danny Llewellyn, telephone (02) 6246 5470.

◇ ◇ ◇

**PR-152: Field test of pineapple plants modified for control of natural flowering**

**Organisation proposing release:** Qld Department of Primary Industries  
Maroochy Research Station  
PO Box 5083  
Nambour Qld 4560

**Organism to be released:** Pineapple (*Ananas comosus* (L.) Merrill) cultivar Smooth Cayenne

**Purpose of the release:** The aim of the trial is to assess the control of natural flowering in genetically modified pineapple plants. The proponent's ultimate aim is to develop pineapple plants with uniform time of flowering and ripening characteristics. This would allow a reduction in harvesting costs.

**Brief description of the nature and effect of the genetic modification:** The pineapple plants have been modified by suppressing the expression of an endogenous pineapple gene. This gene *acacs2* encodes for an enzyme S-adenosyl-L-methionine methylthioadenosine-lyase (ACC synthase), which is involved in the control of the time of flowering. This has been achieved by cloning the appropriate gene from pineapple and reintroducing it in the sense and/or antisense (opposite) orientation in order to suppress ACC2 expression in pineapple plants. The transgenic pineapple plants therefore have reduced ACC synthase activity.

The transgenic plants also contain a selectable marker gene conferring resistance to the antibiotic geneticin.

**Location and size of trial:** A total of 2,000 plants in an area of 0.1 hectare at Redlands and Maroochy Research Stations, Queensland.

**Further information:** The institution's contact officer for this proposal is Dr Michael Kevin Smith, telephone (07) 5441 2211, facsimile (07) 5441 2235.

◇ ◇ ◇

## GENETIC MANIPULATION ADVISORY COMMITTEE

### NOTICE OF EXTENSIONS TO PROPOSALS TO RELEASE GENETICALLY MODIFIED ORGANISMS

#### REQUEST FOR SUBMISSIONS

The Genetic Manipulation Advisory Committee (GMAC) has received applications for extensions to proposals for the deliberate release of genetically modified organisms. The Committee invites written submissions on matters relevant to the environmental and safety issues of these proposals. Submissions should be received by GMAC within 30 days of the date of this Gazette.

All correspondence should be addressed to:

The Secretary  
Genetic Manipulation Advisory Committee  
GPO Box 2183

Tel: 02 6271 4221  
Fax: 02 6271 4202

CANBERRA ACT 2601

Email: gmac.secretariat@health.gov.au

**PR-69X(5): Release of transgenic cotton expressing tolerance to the herbicide bromoxynil – weed management studies**

**Organisation proposing release:** CSIRO Plant Industry  
GPO Box 1600  
Canberra ACT 2601

**Organism to be released:** Cotton (*Gossypium hirsutum*)

**Purpose of the release:** The aim of this extension is to continue integrated weed management studies and examine long-term weed ecology issues with cotton plants modified for resistance to the herbicide bromoxynil. It is expected that the use of bromoxynil-tolerant cotton plants will allow more effective weed control in cotton crops by allowing spraying of the crop with bromoxynil to kill broadleaf weeds without damaging the crop itself.

**Brief description of the nature and effect of the genetic modification:** The herbicide resistance gene introduced into the transgenic plants is a nitrilase gene from a soil bacterium (*Klebsiella ozaenae*) that normally degrades bromoxynil in soil. When over-expressed in the plant, this enzyme breaks down the herbicide before it can cause any damage to the plant. In addition, the plants contain a selectable marker gene that confers resistance to the antibiotics kanamycin and neomycin.

**Location and size of trial:** Approximately 80 000 plants in an area under 0.8 hectares at the Australian Cotton Research Institute, Myall Vale, NSW.

**Further information:** The institution's contact officers for this proposal are Dr Danny Llewellyn, telephone (02) 6246 5470; Dr Greg Constable, telephone (02) 6799 1522; and Mr Graham Charles, telephone (02) 6799 1524.

◇ ◇ ◇

**PR-99X(3): Field evaluation of transgenic cotton for enhanced tolerance to waterlogging**

**Organisation proposing release:** CSIRO Plant Industry  
GPO Box 1600  
Canberra ACT 2601

**Organism to be released:** Cotton (*Gossypium hirsutum*)

**Purpose of the release:** The aim of this extension is to continue agronomic studies of cotton plants that have been genetically modified for increased tolerance to waterlogging. Yield losses due to waterlogging are common in Australian cotton crops when heavy rain follows irrigation of the crop.

**Brief description of the nature and effect of the genetic modification:** The cotton plants have been modified to over-produce two plant enzymes that are normally involved in helping plants survive long periods of waterlogging. The two enzymes are alcohol dehydrogenase from cotton and pyruvate decarboxylase from rice. The modified plants contain an extra copy of either or both of these genes.

For comparison, genetically modified cotton plants are also being trialled which contain the alcohol dehydrogenase gene in the opposite or antisense orientation. This results in plants that have lower levels of the alcohol dehydrogenase enzyme than normal.

In addition, all of the genetically modified plants contain a selectable marker gene conferring resistance to the antibiotics kanamycin and neomycin.

**Location and size of trial:** Approximately 40 000 plants in an area under 0.5 hectares at the Australian Cotton Research Institute, Myall Vale, NSW.

**Further information:** The institution's contact officers for this proposal are Dr Marc Ellis, telephone (02) 6246 5306; Dr Greg Constable, telephone (02) 6799 1522; and Dr Ian Rochester, telephone (02) 6799 1574.

◇ ◇ ◇

**PR-118X(2): Regulatory trials for efficacy, crop safety and environmental impact with CryIA(c)/CryX 2001-2003**

**Organisation proposing release:** Deltapine Australia Pty Ltd  
PO Box 196  
Narrabri NSW 2390

**Organism to be released:** Cotton (*Gossypium hirsutum*)

**Purpose of the release:** The aim of the release is to continue field assessment of lines of cotton plants that have been modified for resistance to insect pests. Specifically, assessments will be made of the insecticidal efficacy of the plants, the impact of the CryX gene (see below) on non-target insects occurring in cotton crops, and agronomic performance of the plants.

**Brief description of the nature and effect of the genetic modification:** The genes introduced into the cotton plants are either one or both of the insect

tolerant genes CryIA(c) and CryX. The CryIA(c) and CryX genes are derived from the bacterium *Bacillus thuringiensis*. These genes encode toxins which act against lepidopteran (caterpillar) larvae, including two *Helicoverpa* species which are major pests of cotton.

The plants also contain a marker gene, which confers resistance to the antibiotics kanamycin and neomycin.

**Location and size of trial:** A maximum of 150 hectares at 21 sites in the cotton-growing regions of New South Wales and Queensland.

**Further information:** The institution's contact officer for this proposal is Stewart Addison, telephone (02) 6742 4251.

◇ ◇ ◇

**PR-123X(2): Field evaluation of transgenic cotton expressing the CryIA(c) and Cry2A(b) (formerly CryX) delta-endotoxins from *Bacillus thuringiensis***

**Organisation proposing release:** CSIRO Plant Industry  
GPO Box 1600  
Canberra ACT 2601

**Organism to be released:** Cotton (*Gossypium hirsutum*)

**Purpose of the release:** The purpose of this extension is to continue evaluation of the field performance and selection of breeding material of transgenic cotton expressing two different insecticidal genes over a variety of sites and environments. The insecticidal genes control caterpillar pests of cotton. 'Stacking' of the two genes in a single plant is expected to enhance the control of the pests and minimise the potential for the insects to become resistant to the insecticidal proteins. The use of insect-resistant cotton plants has the potential to reduce the use of chemical pesticides on cotton crops.

**Brief description of the nature and effect of the genetic modification:** The transgenic plants contain either the CryIA(c) or the Cry2A(b) gene from the bacterium *Bacillus thuringiensis*, or both genes. These genes produce insecticidal proteins that are toxic to the major caterpillar species that attack cotton.

Plants with the Cry2A(b) gene also express a marker gene,  $\beta$ -glucuronidase (GUS), from the bacterium *Escherichia coli*. This gene enables visual identification of tissues expressing the Cry2A(b) gene. Plants with the CryIA(c) gene contain a selectable marker gene which confers resistance to the antibiotics kanamycin and neomycin.

**Location and size of trial:** A total of approximately 6 hectares over sixteen sites, at the Australian Cotton Research Institute, Myall Vale; the Plant Breeding Institute, Narrabri; and private farms at Boggabilla, Bourke, Breeza, Collarenabri, Hillston, Merah, Moree and Warren (NSW), and Biloela, St George, Moura, Dalby and Emerald (Queensland).

**Further information:** The institution's contact officers for this proposal are Dr Danny Llewellyn, telephone (02) 6246 5470; Dr Gary Fitt, telephone (02) 6799 1514; and Dr Greg Constable, telephone (02) 6799 1522.

◇ ◇ ◇

**PR-124X(2): Release of transgenic cotton expressing tolerance to the herbicide Basta®**

**Organisation proposing release:** CSIRO Plant Industry  
GPO Box 1600  
Canberra ACT 2601

**Organism to be released:** Cotton (*Gossypium hirsutum*)

**Purpose of the release:** The aim of the extension is to continue the field evaluation and breeding of new lines of cotton that have been modified to be tolerant to the herbicide glufosinate ammonium (phosphinothricin, Basta®). As well, seed will be increased for subsequent trials. In addition, weed management studies will examine how the herbicide-tolerant cotton would fit into the cotton production system in Australia. It is expected that use of glufosinate ammonium-tolerant cotton plants will allow more effective weed control in cotton crops by allowing the crop to be sprayed with glufosinate ammonium to kill problem weeds without damaging the crop itself.

**Brief description of the nature and effect of the genetic modification:** The plants contain one of two genes conferring tolerance to glufosinate ammonium. Both genes encode the enzyme phosphinothricin acetyltransferase, which acts to detoxify the active ingredient of Basta®. The two genes have been isolated from two different species of the soil bacterium *Streptomyces*.

**Location and size of trial:** Approximately 220 000 plants in an area under 2.2 hectares at the Australian Cotton Research Institute, Myall Vale, NSW.

**Further information:** The institution's contact officers for this proposal are Dr Danny Llewellyn, telephone (02) 6246 5470; and Dr Greg Constable, telephone (02) 6799 1522.

◇ ◇ ◇

**PR-131X(4): Seed increase of transgenic cotton expressing CryX and CryIA(c)**

**Organisation proposing release:** Cotton Seed Distributors Ltd  
GPO Box 117  
Wee Waa NSW 2388

**Organism to be released:** Cotton (*Gossypium hirsutum*)

**Purpose of extension to the release:** The aim of this extension is to evaluate insect-resistant cotton lines and produce commercial quantities of seed for further evaluation prior to a possible general release. The use of insect-resistant cotton has the potential to reduce the use of chemical pesticides on cotton crops.

**Brief description of the nature and effect of the genetic modification:** The genes introduced into the cotton plants are the CryIA(c) and CryX [Cry2A(b)] genes from the bacterium *Bacillus thuringiensis*. These genes produce proteins that are toxic to certain insects, including the major caterpillar pests that attack cotton. INGARD<sup>®</sup> cotton, which has been released commercially, contains only a single insecticidal gene, CryIA(c). The presence of more than one insecticidal gene in a single plant may give better insect control and reduce the potential for the insect pests to become resistant to the toxins.

**Location and size of trial:** A maximum of 3000 hectares (approximately, 300,000,000 modified cotton plants) at seventeen sites in the cotton growing regions of New South Wales and Queensland.

**Further information:** The institution's contact officer for this proposal is Mr Robert Eveleigh, telephone (02) 6795 0000.

◇ ◇ ◇

**PR-138X: Evaluation of sub-clover stunt virus promoters in cotton plants under field conditions**

**Organisation proposing release:** CSIRO Plant Industry  
GPO Box 1600  
Canberra ACT 2601

**Organism to be released:** Cotton (*Gossypium hirsutum*)

**Purpose of the release:** The aim of the extension is to continue field trial of cotton plants containing two novel promoters isolated from a virus that infects subterranean clover plants. Promoters are genetic 'switches' which, when coupled to a gene of interest, control the expression of the gene in particular tissues of a plant.

Many of the genes, such as insect-resistance and herbicide-resistance genes, that have been used in field trials of genetically modified plants in the past have used a promoter from a virus that infects cauliflowers, the cauliflower mosaic virus. In glasshouse tests, the new promoters from sub-clover stunt virus seem to work as well as the cauliflower mosaic virus promoter. This trial aims to test the performance of the new promoters under field conditions.

**Brief description of the nature and effect of the genetic modification:** Most of the modified cotton plants to be trialled contain one of two promoters from the sub-clover stunt virus coupled to a marker gene. The marker gene encodes an enzyme,  $\beta$ -glucuronidase, from the bacterium *Escherichia coli* which enables the visual identification of plant tissues where the promoter is driving the expression of this gene. The plants also contain another marker gene which confers resistance to the antibiotics kanamycin and neomycin.

A small number of the modified cotton plants to be trialled will contain the same set of promoters driving the expression of an insecticidal gene (CryIA(b), derived from the bacterium *Bacillus thuringiensis*) that is toxic to caterpillar pests of cotton. These plants also contain a marker gene that confers tolerance to the herbicide Basta.

**Location and size of trial:** Approximately 6000 plants in two different fields on an area of less than 0.5 hectares at the Australian Cotton Research Institute, Myall Vale, NSW.

**Further information:** The institution's contact officers for this proposal are Dr Danny Llewellyn, telephone (02) 6246 5470; and Dr Greg Constable, telephone (02) 6799 1522.

◇ ◇ ◇

**PR-140X: Agronomic selection and seed increase of INGARD® (Bt)/ CryX and INGARD® / CryX/ Roundup Ready® (RR) cotton plants 2001-2003**

**Organisation proposing release:** Deltapine Australia Pty Ltd  
PO Box 196  
Narrabri NSW 2390

**Organism to be released:** Cotton (*Gossypium hirsutum*)

**Purpose of the release:** The aim of the trial is to continue agronomic evaluation and selection of new breeding lines of cotton which have been modified for resistance to insect attack, as well as lines expressing the insect-resistance genes in combination with a gene conferring tolerance to the herbicide glyphosate (Roundup Ready®). This includes multi-site yield and fibre trials, and

seed increase of new crossbred selections. It is expected that use of the herbicide-tolerant cotton will permit more effective control of weeds in cotton crops, while the insect-resistance trait has the potential to reduce the amount of insecticide applied to cotton crops.

**Brief description of the nature and effect of the genetic modification:** The cotton plants have been modified to contain the 5-enolpyruvyl shikimate-3-phosphate synthase (EPSPS) gene from *Agrobacterium* and an insect-resistance gene CryIA(c) from the bacterium *Bacillus thuringiensis*. The EPSPS gene confers tolerance to the herbicide glyphosate, the active ingredient of Roundup®. The CryIA(c) gene confers tolerance to the major insect pests of cotton. In addition, some plants contain a combination of three genes: EPSPS, CryIA(c) and CryX. The CryX gene, derived from the bacterium *Bacillus thuringiensis*, also produces an insecticidal protein.

All the plants also contain a selectable marker gene that confers resistance to the antibiotics kanamycin and neomycin.

**Location and size of trial:** A total of 60 hectares in 2001/2002 season and up to 400 hectares in 2002/2003 season in the cotton-growing regions of New South Wales and Queensland.

**Further information:** The institution's contact officer for this proposal is Richard Leske, telephone (07) 4671 3136

*Navigation Act 1912*

**DIRECTION UNDER SUBSECTION 421(1)**

I, JOHN DUNCAN ANDERSON, Minister for Transport and Regional Services, under subsection 421(1) of the *Navigation Act 1912* (the Act) DIRECT that the provisions of Part VI of the Act do not apply to the class of ships described in the Schedule below.

This direction is in force for the period 8 April 2001 to 7 April 2004.

Date:

4<sup>th</sup> April

2001

JOHN ANDERSON

---

**Schedule**

All ships undertaking any voyage for the carriage of goods or passengers between Christmas Island and any port in the Commonwealth or in the Territories, but not including any voyage in the course of which a ship takes on cargo or passengers from any port in the Commonwealth or in the Territories other than a port in Christmas Island for unloading or disembarking at another such port.

Stamp

*[Signature]*  
Delegate of the Minister for Transport  
and Regional Services

**CONDITIONS SUBJECT TO WHICH THIS PERMIT IS ISSUED**

1. That the Cross-Modal and Maritime Transport Division is notified, within 14 days after every sailing, of the date of the voyage and the cargo carried by the ship.
2. This permit covers the period 29 APRIL 2001 to 29 OCTOBER 2001.
3. This permit is valid for shipments of cargo only in those instances where CONTSHIP CONTAINER LINES has obtained documentary evidence from appropriate licensed ship operators that no licensed ship is available to transport the cargo and provided a copy of written proof to the Cross-Modal and Maritime Transport Division before each voyage.
4. CONTAINERS only may be carried.
5. The cargo may only be carried from SYDNEY, MELBOURNE to FREMANTLE .
6. If there is a change in schedule the Department of Transport and Regional Services must be advised before the vessel sails.
7. That the vessel is not detained under Australia's PSC program nor under investigation by the ATSB during the currency of this permit

This permit remains in force until cancelled by me upon not less than six months' notice to the master, owner, or agent of the ship of the intended cancellation.

**Names of ports for which permit issued**

**TOWNSVILLE TO NEWCASTLE**

Dated at **CANBERRA** this <sup>10<sup>th</sup></sup> day of April 2001

Official  
Stamp

  
Delegate of the Minister for Transport  
and Regional Services

**CONDITIONS SUBJECT TO WHICH THIS PERMIT IS ISSUED**

1. That the Cross-Modal and Maritime Transport Division is notified, within 14 days after every sailing, of the date of the voyage and the cargo carried by the ship.
2. This permit covers the period 10 APRIL 2001 to 10 OCTOBER 2001.
3. This permit is valid for shipments of cargo only in those instances where ASC has obtained documentary evidence from appropriate licensed ship operators that no licensed ship is available to transport the cargo and provided a copy of written proof to the Cross-Modal and Maritime Transport Division before each voyage (it is noted that, at the date of issue, there are no licensed vessels available for the shipments scheduled).
4. CONTAINERS AND BREAKBULK only may be carried.
5. The cargo may only be carried from TOWNSVILLE to NEWCASTLE.
6. If there is a change in schedule the Department of Transport and Regional Services must be advised before the vessel sails.
7. That the vessel is not detained under Australia's PSC program nor under investigation by the ATSB during the currency of this permit

**COMMONWEALTH OF AUSTRALIA**

***Foreign Acquisitions and Takeovers Act 1975***

**ORDER UNDER SUBSECTION 21A(2)**

**WHEREAS -**

- (A) Chu Ming and Kozui Onozaki are foreign persons for the purposes of section 21A of the *Foreign Acquisitions and Takeovers Act 1975* ("the Act");
- (B) Chu Ming and Kozui Onozaki propose to acquire an interest in the Australian urban land described in the notice furnished on 30 March 2001 under section 26A of the Act;

NOW THEREFORE I, James Hagan, General Manager of the Foreign Investment Policy Division of the Treasury and authorised to make this order for and on behalf of the Treasurer, being satisfied that:

- (i) Chu Ming and Kozui Onozaki propose to acquire an interest in Australian urban land; and
- (ii) the proposed acquisition would be contrary to the national interest;

PROHIBIT the proposed acquisition pursuant to subsection 21A(2) of the Act.

Dated this

9th

day of

April

2001.

*James Hagan*

General Manager

COMMONWEALTH OF AUSTRALIA

*Foreign Acquisitions and Takeovers Act 1975*

ORDER UNDER SUBSECTION 21A(2)

WHEREAS –

- (A) Charles and Heather Callus are foreign persons for the purposes of section 21A of the *Foreign Acquisitions and Takeovers Act 1975* (“the Act”);
- (B) Charles and Heather Callus propose to acquire an interest in Australian urban land as specified in the notice furnished on 16 March 2001 under section 26A of the Act.

NOW THEREFORE I, Jim Hagan, General Manager, Foreign Investment Policy Division, for and on behalf of the Treasurer, being satisfied that:

- (i) Charles and Heather Callus propose to acquire an interest in Australian urban land; and
- (ii) the proposed acquisition would be contrary to the national interest.

PROHIBIT the proposed acquisition pursuant to subsection 21A(2) of the Act.
