Australian Government
Attorney-General's Department
Office of Legislative Drafting and Publishing

This Gazette is published by the Office of Legislative Drafting and Publishing (OLDP) on behalf of the Commonwealth of Australia.

OLDP is a specialist professional drafter and the pre-eminent drafter of Commonwealth subordinate legislation.

OLDP strives to maintain and enhance its reputation as a centre of drafting excellence. OLDP produces legislative and administrative instruments of the highest standard through the innovative use of plain English, current technology and rigorous quality assurance procedures.

Through its responsibility for maintaining the Federal Register of Legislative Instruments (FRLI), OLDP plays an important role in the legislative process for Commonwealth legislative instruments.

OLDP prepares compilations of a range of Commonwealth legislation, arranges publication of Commonwealth legislation and legislative materials in hard copy form, and provides online access to Commonwealth legislation and legislative materials via the ComLaw (www.comlaw.gov.au) and the FRLI (www.frli.gov.au) websites.

OLDP's responsibilities

- drafting
- advising about drafting and interpreting instruments created under a statutory power
- maintaining the Federal Register of Legislative Instruments, registering legislative instruments and lodging registered instruments for tabling in Parliament
- preparing compilations of Acts and select legislative instruments

- providing ready public access to the law through ComLaw (www.comlaw.gov.au) and the Federal Register of Legislative instruments (www.frli.gov.au)
- ensuring that printed copies of Acts, select legislative instruments and related legislative material are available in 'as made' and compiled form

Other assistance

OLDP can provide advice on:

- the basis and role of delegated legislation and other instruments made under a statutory power
- the requirements and procedures for lodgment, registration, disallowance and sunseting of legislative instruments
- sound techniques for developing efficient drafting instructions (important for efficient achievement of your legislative program).

Other OLDP services

OLDP can provide a range of other services on a billable basis, including:

- arranging gazettal and tabling of other OLDP drafted non-legislative instruments.
- preparing compilations of legislative and non-legislative instruments

Some public notifications on the Internet and in the Gazette relating to the processing of referrals for approval under Chapter 4 of the *Environment Protection and Biodiversity Conservation Act 1999* may occasionally be missed in processing by the Department of Environment and Heritage, or may not meet timeframes for notification. The Department of the Environment and Heritage has implemented systems and ongoing quality assurance procedures to minimise any risk of missing a notification within the required timeframe. Where a missed notification is identified the practice will be to notify these even though the timeframe for notification has lapsed. This will ensure that the history of notifications for each referral is available to the public. The Department of the Environment and Heritage regrets any inconvenience that may be caused by a missed notification. Please note that late notifications have not affected subsequent processing of referrals or assessments and they do not affect decisions made.

SPECIAL PROGRAM GRANTS IN TYPE 1 DIABETES (ROUND 3)

Call for Expressions of Interest

NHMRC and JDRF have established a joint program in Australia to advance research into Type 1 diabetes, funded by Special Program Grants for up to five years. Each Special Program Grant awarded will support a critical mass of investigators, working on a problem of importance to people with Type 1 diabetes. Multi-disciplinary team approaches are encouraged. Special Program Grants will also support the training and development of young scientists and clinical investigators. Applications are sought particularly from groups who bring novel approaches from disciplines not traditionally associated with diabetes research. Partnerships with other public and private sector entities are encouraged.

General Research Goals

The aim of this partnership program is to support research to find a cure for Type 1 diabetes and its complications. The three key research objectives are:

- Restoration and maintenance of normal blood sugar levels
- Prevention and improved treatment of complications
- Prevention of Type 1 diabetes

Note that clinical human islet transplantation, clinical trials in new-onset Type 1 diabetes, or clinical trials in at-risk populations, are not part of this Special Program in Type 1 diabetes, and will not be supported.

Expressions of Interest are invited from Australian individuals or groups from universities, hospitals, research institutes, and research laboratories, state and local governments, and agencies of the Commonwealth government; companies interested in helping to achieve the research goals.

Announcement	26 August 2006
Closing date for Expressions of Interest	4 October 2006
Invitation for full applications	1 December 2006
Closing dates for full applications	1 February 2007

Industry Research and Development Act 1986

Pharmaceuticals Partnerships Program Directions No 1 of 2006

I, Ian Elgin Macfarlane, Minister for Industry, Tourism and Resources, acting under subsections 19 (1) and 20 (1) of the *Industry Research and Development Act 1986*, give the following directions to the Industry Research and Development Board.

Dated 8/8/06

Minister for Industry, Tourism and Resources

PART 1 - PRELIMINARY

Name of directions

1. These directions are the *Pharmaceuticals Partnerships Program Directions No 1 of 2006*.

Commencement

2. These Directions will come into effect on and from the day on which both of the following steps have been completed:
 - (a) the Directions have been registered on the Federal Register of Legislative Instruments; and
 - (b) the Directions have been published in the Gazette.

Object of these directions

3. The object of this instrument is to give directions to the Board in relation to:
 - (a) an additional function of the Board in respect of the Pharmaceuticals Partnerships Program, a program to increase the level of high quality pharmaceuticals research and development activity in Australia by companies at all stages of the pharmaceuticals development process and the development of partnerships within the *pharmaceuticals industry*;
 - (b) the policies and practices to be followed by the Board in the performance of the function.

Interpretation

4. (1) In these directions, unless the contrary intention applies:

agreed portfolio of activities means the portfolio of activities that is specified in an *agreement*.

agreement means an *agreement* between a *recipient* and the Commonwealth for grant funding under the *program*, as amended from time to time in accordance with the rules for the *program*.

applicant means an entity that makes an application for grant funding under the *Program*.

delegate of the Minister means an employee of the *Department* who has been empowered by the *Minister*, or otherwise duly authorised, to carry out the relevant function in respect of the *program*.

Department means the Department of Industry, Tourism and Resources.

eligible application means an application for grant funding under the *Program*, that the *delegate of the Minister* has determined to be eligible to be admitted for merit assessment by the Board.

eligible Australian pharmaceutical research and development (R&D) activities means *pharmaceuticals research and development (R&D) activities* that are carried out in Australia.

funding round means a period of time in which applications received by the *delegate of the Minister* will be assessed for eligibility and technical merit under the rules of the *Program*.

Minister means the Minister for Industry, Tourism and Resources.

pharmaceuticals industry means companies that participate in the discovery, creation and supply of *pharmaceuticals* that are, or are intended to be, regulated under the *Therapeutic Goods Act 1989* as registered drugs or under equivalent provisions in comparable countries (such as, in the United States, through the Food and Drug Administration, and in Europe, through the European Medicines Agency).

pharmaceutical means a chemical or biological substance containing one or more active ingredients used, or intended for use, in the treatment or prevention of disease in humans. For the purposes of this *program*, a pharmaceutical is a drug registered or intended to be registered under the *Therapeutic Goods Act 1989* or under equivalent provisions in comparable countries (such as, in the United States, through the Food and Drug Administration, and in Europe, through the European Agency for the Evaluation of Medicinal Products). For the purposes of this *program*, vaccines and blood products for human use are pharmaceuticals.

pharmaceutical research and development (R&D) activities means:

1. Systematic, investigative and experimental activities:
 - (a) that involve innovation or technical risk;
 - (b) the object of which is new knowledge, or new or improved materials, products, processes, services, or devices for the delivery of *pharmaceuticals*; and
 - (c) which have a direct link to, or are of direct relevance to, the development of a *pharmaceutical* or a device for the delivery of a *pharmaceutical*.

2. Activities that directly contribute to systematic, investigative and experimental activities of the kind described above.

Subject to the application of the definition of *pharmaceutical research and development (R&D) activities*, the following broad types of activity may be eligible:

- (a) basic pharmaceutical research;
- (b) drug discovery, including biological screening;
- (c) the synthesis and/or extraction of therapeutic substances;
- (d) drug formulation;
- (e) bioequivalence studies
- (f) stability testing on a *pharmaceutical*;
- (g) pre-clinical (including animal toxicology) work and phase I, II and III trials;
- (h) clinical trials of a registered drug in a new indication, formulation, route of administration or dosage;
- (i) pharmaceutical development activities relating to the building and testing of prototypes;
- (j) laboratory evaluation to determine likely commercial production processes;
- (k) scale-up from laboratory to pilot plant;
- (l) significant process improvements;
- (m) obtaining industrial rights, including patents (but note expenditure limits);
- (n) computer software activities integral to the R&D; and
- (o) supporting activities that are directly related to the carrying on of the R&D activities referred to above, including pharmaceutical services such as protocol development; the development, preparation and supply of active ingredients for use in non-clinical testing and clinical trials; clinical trial management; bioinformatics; and biostatistical analysis, activities associated with complying with statutory requirements or standards needed for drug or device registration.

The following activities are, for the purposes of these directions, deemed not to be *pharmaceutical R&D activities*:

- (a) market research, market testing, market development or sales promotion (including consumer surveys, post-registration studies and product familiarisation programs);
- (b) quality control related to the manufacture of finished product intended for sale;
- (c) the making of cosmetic modifications or stylistic changes to products, processes or production methods;
- (d) pre-production activities, such as demonstration of commercial viability, tooling-up or trial runs, which are not related to the product registration process such as with the Therapeutic Goods Administration;
- (e) any activity related to the reproduction of a commercial product or process by a physical examination of an existing system or from plans, blueprints, detailed specifications or publicly available information;
- (f) epidemiology studies;
- (g) management studies or efficiency surveys;

- (h) research in social sciences, arts or humanities;
- (i) the making of donations;
- (j) routine collection of information, except as part of the R&D process;
- (k) preparation for teaching;
- (l) activities associated with complying with statutory requirements or standards other than those needed for drug or device registration; and
- (m) specialised routine medical care or the provision of drugs under the Special Access Scheme (SAS), except when they are a component of an investigative program with an established protocol.

program means the Pharmaceuticals Partnerships Program, a merit-based program that is administered by the *Department* and is designed to increase the level of high quality *eligible Australian pharmaceutical R&D activity* in Australia and the development of partnerships within the *pharmaceuticals industry*.

proposed portfolio of activities means all *eligible Australian pharmaceutical R&D activities* that are proposed to be undertaken by or on behalf of the *applicant*.

recipient means an entity that is entitled to receive funding under the *program* pursuant to an *agreement* between the entity and the Commonwealth.

revised portfolio of activities means a portfolio of activities that is proposed to replace the *agreed portfolio of activities* pursuant to a proposal of the kind contemplated in clause 9.

revoked directions mean the directions revoked by clause 17.

three year history of pharmaceutical R&D activities means the *pharmaceutical R&D activities* undertaken by or on behalf of an *applicant* in each of 2004-05, 2005-06 and 2006-07 financial years.

- (2) In these directions,
 - (a) **may** is permissive and not mandatory.
 - (b) a reference to **financial year** means the 12 month period beginning on 1 July in one calendar year and ending on 30 June in the following calendar year.

PART 2 – CONSIDERATION OF APPLICATIONS TO PARTICIPATE IN THE PROGRAM

Procedure

- 5. (1) Subject to clause 6, the Board will assess *eligible applications* and provide a merit ranking of those applications to the *delegate of the Minister*.
- (2) The Board must consider *eligible applications* made in relation to a particular *funding round* as soon as practicable after those applications have been provided to the Board by the *delegate of the Minister*.

Board may decline to provide merit ranking

6. The Board may decide to refuse to provide a merit ranking in respect of a particular *eligible application* if it is not satisfied:
- (a) with the level of merit of an *eligible application* in relation to one or more of the merit criteria; or
 - (b) that the *applicant* is part of the *pharmaceuticals industry*;
 - (c) that the activities described in the *eligible application* are *eligible Australian pharmaceutical R&D activities*; or
 - (d) that the applicant has a three year history of pharmaceutical R&D activities.

PART 3 – ASSESSMENT AND MERIT RANKING OF APPLICATIONS

Assessment of applications

7. Subject to clause 6, the Board must assess each *eligible application* on its merit according to the extent to which the application meets the merit criteria.

Merit criteria

8. The merit of *eligible applications* must be assessed against the following criteria:

Criterion 1: The Track Record and Capabilities of the Applicant

The Board/Committee will assess each *applicant's* track record of undertaking *pharmaceutical R&D activities*, and their capabilities to undertake the proposed *eligible Australian pharmaceutical R&D activities*.

In respect of this merit criterion, *applicants* could address the following factors:

- (a) their record in successfully managing pharmaceutical R&D projects in the proposed fields/therapeutic areas;
- (b) their record in achieving commercial outcomes from their pharmaceutical R&D; and
- (c) their record in meeting commitments in Government programs they have participated in.

In respect of capabilities, *applicants* could address the following factors:

- (d) whether they have access to financial resources to fund the proposed program of projects;
- (e) the facilities and research infrastructure available to the *applicant*, and the capabilities of the personnel to be involved (this can include the facilities and personnel of contract partners);
- (f) the existence of clearly focused business plans, including R&D plans, intellectual property management and creditable commercialisation strategies; and

- (g) the facilities, capabilities and expertise brought about through partnerships and collaborations.

These factors should not be considered exhaustive nor will they all be applicable to all *applicants*. *Applicants* are also welcome to provide further relevant evidence to support their claims under this merit criterion.

Criterion 2: Scope and Nature of Partnerships and Collaborations

The Board/Committee will assess whether each *applicant* has established, or proposes to establish, an appropriate range of R&D partnerships and collaborations between themselves and research and medical institutions, biotechnology companies, local or global pharmaceuticals companies and pharmaceutical service providers, and the nature of those partnerships and collaborations.

The Board/Committee will consider the extent to which the *applicant's* existing and proposed partnerships and collaborations contribute to the *applicant's* business strategy, and benefit the Australian industry overall, such as through the transfer of skills and technology; the development of infrastructure and/or co-location of partners; and the generation and sharing of intellectual property and/or royalties.

In relation to partnerships and collaborations that are proposed or still to be finalised, applicants must provide in their application evidence of the intended partnership or collaboration. This may include letters of intent, draft agreements or memoranda of understanding from potential partners or collaborators describing the nature, timing and scope of the arrangements.

In respect of this merit criterion, *applicants* could address the following factors:

- (a) the number, value and form of existing R&D partnerships and collaborations (including contractual arrangements and joint venture partnerships);
- (b) the quality of R&D partners – their capabilities and track record;
- (c) the extent to which the *applicant* proposes to extend existing, or forge new, R&D partnerships and linkages;
- (d) how the existing and proposed partnerships and collaborations contribute to the *applicant's* business strategy;
- (e) the extent that partnerships will result in the development of infrastructure and/or co-location of partners in Australia, the sharing of intellectual property and/or royalties, and the sharing and/or transfer of skills and technology in Australia; and
- (f) how the *applicant* proposes to utilise and add value to the Australian Government's investment in health and medical research.

These factors should not be considered exhaustive nor will they all be applicable to all *applicants*. *Applicants* are also welcome to provide further relevant evidence to support their claims under this merit criterion.

Criterion 3: Technical Merit of the Proposed Activities

The Board/Committee will assess whether the *eligible Australian pharmaceutical R&D activities* proposed by each *applicant* are of high technical merit.

In respect of this merit criterion, *applicants* could address the following factors:

- (a) the extent to which the proposed activities involve leading edge technologies, techniques or skills;

- (b) the degree of innovation evident in the proposed activities;
- (c) whether the proposed activities include activity that is new and different for the *applicant* in Australia;
- (d) the extent to which the proposed activities are world class in nature;
- (e) the level of technical risk associated with the proposed activities, and the robustness of strategies to manage that risk; and
- (f) whether the research is conducted to global good laboratory, clinical and manufacturing practice standards.

These factors should not be considered exhaustive nor will they all be applicable to all *applicants*. *Applicants* are also welcome to provide further relevant evidence to support their claims under this merit criterion.

Criterion 4: Level of Benefit to the Australian Economy

The Board/Committee will assess the level of benefit to the Australian economy from the *eligible Australian pharmaceutical R&D activities* proposed by each *applicant*, including the contribution to the sustainability of an internationally competitive *pharmaceuticals industry* in Australia.

In respect of this merit criterion, *applicants* could address the following factors:

- (a) how the *applicant's* proposed R&D activities will enhance or strengthen the Australian industry's capabilities (for example, by filling a gap in the value chain, developing expertise, or introducing new skills, knowledge, technologies or techniques);
- (b) the extent that the *applicant's* proposed R&D activities will bring benefits to Australia through existing and new partnerships and collaborations;
- (c) the utilisation and development of Australian competitive strengths and capabilities, resources and inputs, including Australian-developed intellectual property in undertaking the proposed projects;
- (d) the extent to which there is potential for benefit to other industries as a result of the company's introduction of new transferable skills, knowledge, technologies or techniques;
- (e) the extent to which there is likely to be future licensing and other revenues from the *proposed portfolio of activities*;
- (f) the extent to which the *applicant*, in undertaking its proposed R&D, will contribute to improved health outcomes for Australians;
- (g) the extent to which the *applicant* is committed to doing business in Australia in the longer-term, including by reference to the *applicant's* long-term R&D and business strategy in Australia;
- (h) how participation in P³ secures Australia's position as a provider of world-class pharmaceutical R&D, through, for example, the establishment of an R&D hub in Australia; and
- (i) whether the *applicant's* R&D facilities in Australia will be responsible for a higher proportion of its global R&D as a result of participation in the Program.

These factors should not be considered exhaustive nor will they all be applicable to all *applicants*. *Applicants* are also welcome to provide further relevant evidence to support their claims under this merit criterion.

PART 4 – ASSESSMENT OF PROPOSALS FOR CHANGES TO THE AGREED PORTFOLIO OF ACTIVITIES

9. If a *recipient* has submitted a proposal to the *Department* for approval of changes to the *agreed portfolio of activities*, including the addition of new activities, the discontinuance of activities, or the substitution of new activities in the place of discontinued activities, the *delegate of the Minister* may request the Board to assess the proposal.
10. If the Board receives a request under clause 9, it must assess the proposal as soon as is practicable and provide the assessment to a *delegate of the Minister*.
11. In undertaking an assessment of a proposal to change the *agreed portfolio of activities* the Board will determine:
 - (a) whether any new activities that are proposed to be added to the *agreed portfolio of activities* are *eligible Australian pharmaceutical R&D activities*;
 - (b) the effect that the proposed changes would have had on the relative merit of the application under the merit criteria in clause 8 if the *revised portfolio of activities* had been admitted for assessment instead of the *proposed portfolio of activities* in the *funding round* in which the application was assessed by the Board.

PART 5 – TECHNICAL ASSESSMENTS

12. A *delegate of the Minister* may request the Board to provide a technical assessment as to whether an *applicant's three year history of pharmaceutical R&D activities* comprises *pharmaceutical R&D activities*.
13. A *delegate of the Minister* may request the Board to provide a technical assessment of the progress reported by a *recipient* against the technical milestones for the *agreed portfolio of activities*.
14. A *delegate of the Minister* may request the Board to provide a technical assessment as to whether a specific activity undertaken or proposed to be undertaken by an *applicant* or a *recipient* is an *eligible Australian pharmaceutical R&D activity*.
15. If the Board receives a request under clause 12, clause 13 or clause 14, it must assess the proposal as soon as is practicable and provide the assessment to a *delegate of the Minister*.

PART 6 - EVALUATION OF THE PROGRAM

16. The Board must, at the request of a *delegate of the Minister*, cooperate with any independent evaluation of the *program*, and provide comment on the operations of these Directions.

PART 7 – REVOCATION OF EARLIER DIRECTIONS

17. The Pharmaceuticals Partnerships Program Directions No 1 of 2003 and the Pharmaceuticals Partnerships Program Directions No 1 of 2004 are revoked.

PART 8 – TRANSITIONAL PROVISIONS

18. The *revoked directions*, as in force immediately before the commencement of these Directions, continue to apply in relation to assessments made by the Board under the *revoked directions*.
19. (1) This clause applies to an application to participate in the *Program* made under either the Pharmaceuticals Partnerships Program Directions No 1 of 2003 or the Pharmaceuticals Partnerships Program Directions No 1 of 2004 before those directions were revoked.
- (2) The Board must consider, in relation to applications that were made under subclause 19(1):
- (i) a request by the Delegate to provide a technical assessment of a proposal for approval of changes to the *agreed portfolio of activities* by a *recipient*; or
 - (ii) a request by the Delegate to provide a technical assessment of the progress reported by a *recipient* against a technical milestone for the *agreed portfolio of activities*; or
 - (iii) a request by the Delegate to provide a technical assessment as to whether a specific activity undertaken by a *recipient* is an eligible pharmaceutical R&D activity;
- as if the *revoked directions* under which the application was made continued to apply.
