Some public notifications on the Internet and in the Gazette relating to the processing of referrals for approval under Chapter 4 of the Environment Protection and Biodiversity Conservation Act 1999 may occasionally be missed in processing by the Department of the Environment and Water Resources, or may not meet timeframes for notification. The Department of the Environment and Water Resources has implemented systems and ongoing quality assurance procedures to minimise any risk of missing a notification within the required timeframe. Where a missed notification is identified the practice will be to notify these even though the timeframe for notification has lapsed. **INVITATION TO COMMENT ON A RISK ASSESSMENT AND RISK  
MANAGEMENT PLAN FOR GENETICALLY MODIFIED WHEAT**

Australia's gene technology regulatory system is designed to protect the health and safety of people and the environment by identifying risks posed by, or as a result of, gene technology and managing those risks.

The Gene Technology Regulator is currently assessing licence application DIR 071/2006 from the Victorian Department of Primary Industries (DPI Victoria) to release genetically modified (GM) wheat into the environment under limited and controlled conditions.

DPI Victoria has applied for a licence to release up to 30 lines of wheat that have been genetically modified to enhance drought tolerance. The trial is proposed to take place at two sites in the local government areas of Horsham and Mildura, Victoria, on a maximum total area of 0.315 hectares over one growing season (May 2007 – March 2008).

The purpose of the proposed trial is to conduct 'proof of concept' research to evaluate the agronomic performance of the GM wheat lines under rain-fed, drought prone conditions. Seed will also be collected and retained for seed increase for further trials (subject to additional approvals). No products from the release would be used for human food or animal feed.

The Regulator has prepared a risk assessment and risk management plan (RARMP) for the proposed release and suggests a range of conditions (including containment measures) that would be imposed if a licence was issued.

The Regulator welcomes written submissions in order to finalise the RARMP, which will then form the basis of her decision on whether to issue the licence. The consultation RARMP and related documents can be obtained from [www.ogtr.gov.au](http://www.ogtr.gov.au) under 'What's New' or by contacting the Office. Please quote application DIR 071/2006 in any correspondence.

Submissions should be received by close of business on **25 May 2007**.
