Under sub-clause 1(1) of Schedule 1 to the *Classification (Publications, Films and Computer Games) Act 1995* (SA), if:

- (a) the National Director has reasonable grounds to believe that a publication is a submittable publication; and

**Notice to submit publication for classification within three days**

I am writing to advise you that I have reviewed the following publication and that you are now required to submit an application for classification of this publication within three business days.

Title: ***W&NK***  
Volume: **Issue 03**  
Australian publisher/distributor: **NDD Distribution**  
Number of pages: **84**  
Country of origin: **Marked 'Printed in England'**

Under sub-clause 1(1) of Schedule 1 to the *Classification (Publications, Films and Computer Games) Act 1995* (SA), if:

- (a) the National Director has reasonable grounds to believe that a publication is a submittable publication; and
- (b) the publication is being published in South Australia, or the National Director has reasonable grounds to believe that it will be published in South Australia,

the National Director may, by notice in writing given to the publisher of the publication, require the publisher to submit an application for classification of the publication, or of subsequent issues of the publication, by the National Board.

'Submittable publication' is defined in section 5 of the *Classification (Publications, Films and Computer Games) Act 1995* (Cth) (the Classification Act) to mean:

an unclassified publication that, having regard to section 9A or to the Code and the classification guidelines to the extent that they relate to publications, contains depictions or descriptions that:

- (a) are likely to cause the publication to be classified RC; or

- (b) are likely to cause offence to a reasonable adult to the extent that the publication should not be sold or displayed as an unrestricted publication; or
- (c) are unsuitable for a minor to see or read.

‘Publish’ is defined in section 5 of the Classification Act to include ‘sell, offer for sale, let on hire, exhibit, display, distribute and demonstrate’.

It is an offence in South Australia to sell or deliver a submittable publication: subsection 46(2) of the *Classification (Publications, Films and Computer Games) Act 1995* (SA).

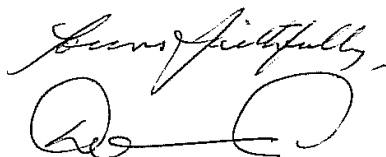

I have reasonable grounds to believe the above named publication is a submittable publication and I believe it has been published in South Australia.

I have therefore decided to issue this notice requiring the publisher to submit an application for classification of the publication.

## **INVITATION TO COMMENT**

### **CONSULTATION RARMP FOR LICENCE APPLICATION DIR 095 FROM BSES LTD**

#### **Limited and Controlled Release of Genetically Modified (GM) Sugarcane**

Australia's gene technology regulatory system is designed to protect the health and safety of people and the environment by identifying risks posed by, or as a result of, gene technology and managing those risks.

The Gene Technology Regulator is currently assessing Licence Application DIR 095 from BSES Ltd for a limited and controlled release to undertake research with 12,500 lines of sugarcane genetically modified to alter plant growth, enhance drought tolerance, enhance nitrogen use efficiency, to alter sucrose accumulation, or to improve cellulosic ethanol production from sugarcane biomass.

The purpose of the trial is to evaluate agronomic properties of the GM sugarcane lines grown under field conditions. Promising lines would be selected for crossing under controlled conditions to other GM sugarcane lines or non-GM sugarcane cultivars for possible future commercial development (subject to additional approvals). The trial is proposed to take place on six BSES stations in the Queensland local government areas of Moreton Bay, Bundaberg, Mackay, Burdekin and Cairns, on a maximum area of 21 ha, between June 2009 and June 2015. The GM sugarcane would not be used for human food or animal feed.

A consultation Risk Assessment and Risk Management Plan (RARMP) has been prepared, which concludes that the proposed release would pose negligible risk to human health and safety or to the environment. A range of licence conditions are proposed, including measures to restrict the release to the size and locations requested by BSES Ltd. Conditions are also proposed to limit the release to six years, rather than the 15 years proposed by the applicant.

The Regulator welcomes written submissions in order to finalise the RARMP, which will then form the basis of a decision on whether to issue the licence. The consultation RARMP and related documents can be obtained from the website <<http://www.ogtr.gov.au>> under 'What's New' or by contacting the Office. Please quote application DIR 095 in any correspondence.

Submissions should be received by close of business on **26 June 2009**.

AUSTRALIAN COMMUNICATIONS AND MEDIA AUTHORITY

Radiocommunications Act 1992

Notice under section 136 of the *Radiocommunications Act 1992*

NOTIFICATION OF PROPOSED VARIATION OF *RADIOCOMMUNICATIONS  
(LOW INTERFERENCE POTENTIAL DEVICES) CLASS LICENCE 2000*

Notice is given that the Australian Communications and Media Authority (ACMA) proposes to vary the *Radiocommunications (Low Interference Potential Devices) Class Licence 2000* under section 134 of the *Radiocommunications Act 1992* (the Act).

**Proposed changes**

The *Radiocommunications (Low Interference Potential Devices) Class Licence 2000* (the LIPD Class Licence) contains the licence conditions, operating requirements and technical parameters associated with the operation of a wide range of low power radiocommunications devices operating in various segments of the radiofrequency spectrum.

ACMA is proposing to vary the LIPD Class Licence by:

- including a definition of DAB which means digital audio broadcasting;
- including a definition of ERP which means effective radiated power;
- an addition to authorise the operation of DAB in-store repeaters in the 174-230 MHz band;
- an addition to authorise the operation of in-store pricing system transmitters in the 0.0366-0.0402 MHz band for indoor use only;
- an amendment to delete medical implant telemetry systems transmitters as this item is covered by medical implant communication systems transmitters through the standards referenced therein;
- an amendment to clarify that the radiated power spectral density limit for RLANs in the 5150-5250 MHz band is relative to an isotropic radiator;
- an amendment to add ERP value for wireless audio transmitters, in addition to the existing limit already specified (the insertion of the ERP value does not increase the power level for this item, but is an alternative unit of measurement); and
- an amendment to insert a limitation on the use of telemetry and telecommand transmitters for video sending or software downloading.

## **Comments**

Under section 136 of the *Radiocommunications Act 1992*, ACMA is seeking representations about the proposed variation to the LIPD Class Licence.

A package containing a copy of the existing class licences, the proposed variation and background paper are available on ACMA's website. Alternatively, copies of the documentation may be obtained by contacting:
